

How It Works

Chemical Guys Wet Mirror Finish is the unique gloss-magnifying glaze that takes any vehicle's shine to the next level! Wet Mirror Finish is the unique glaze that cleanses light stains and water spots from paintwork to enhance the look of any car. Use Wet Mirror Finish to fill light swirls and scratches, and enhance the bright shine and deep-wet reflection on any color paintwork. Wet Mirror Finish makes any car look like a mirror! Use Wet Mirror Finish to add extra shine, depth, and reflection to your brand new or well used car. Apply Wet Mirror Finish by hand or machine for fantastic results. Wet Mirror Finish is blended with durable UV blockers that protect your paint from harmful solar rays that can damage and fade the paint finish over time. Top Wet Mirror Finish with your favorite Chemical Guys sealant or wax to lock in the exclusive deep-wet reflection and bright shine for months on end. Use Chemical Guys Wet Mirror Finish for a bright and deep reflective shine that lasts and lasts.

Add Extra Eye Candy Shine With A Coat Of Glaze

Chemical Guys Wet Mirror Finish is a unique gloss magnifying glaze that takes shine to the next level! The synthetic formula bonds to the surface delivering a brilliant shine with a slick finish. The deep-penetrating formula goes deep into light swirls and scratches, creating an even surface that better reflects light for an extra-wet shine. Wet Mirror Finish cleanses paintwork of light stains and contamination, fills minor swirls and scratches, and bonds to the paint to enhance the color and add extra lustrous shine to any vehicle. Wet Mirror Finish adds extra protection with UV blockers that stop the damaging effects of the sun. Anti-static agents within Wet Mirror Finish reduce static charge on the vehicle surface to minimize dirt and dust adhesion, keeping your car cleaner for longer. Wet Mirror Finish turns any color paintwork into a mirror! For extra protection and enhanced look for your vehicle, simply top Wet Mirror Finish with any Chemical Guys wax or sealant. Create an amazing shine on any color paintwork with Chemical Guys Wet Mirror Finish.

Gloss Magnifier

Wet Mirror Finish bonds to paintwork at the nano-tech level, filling in minor defects and delivering a deep lustrous shine on any color paintwork. Gloss enhancers and UV blockers deliver a bright crisp shine with deep reflection that protects the paint from sun damage and fading. Use Wet Mirror Finish on any painted car, truck, motorcycle, or RV. Wet Mirror Finish enhances the look of single stage, clear coat, and ceramic automotive finishes. Use Wet Mirror Finish on any color paint finish for extra gloss, shine, and deep-wet look. Make any car look like a mirror with Chemical Guys Wet Mirror Finish!

Surface Cleanser

No car has a perfect finish: brand new cars off the dealership lot have swirls, scratches, water spots, stains, and more. Wet Mirror Finish contains special paintwork cleansers and cleaning agents that remove contaminants and light stains from paintwork from new and old vehicles. Use Wet Mirror Finish on a dual action polisher and light finishing pad to remove stains, water spots, and minor swirls and scratches as you apply it deep into the pores of the paint for the most durable bond.

Add Extra Surface Protection Technologies

Wet Mirror Finish contains static reducing agents and advanced UV blockers. Static reducing agents help prevent dirt and dust from sticking to the paint over time, keeping the car cleaner for longer. Special UV blockers reject harmful solar rays that can fade and degrade paint finishes over time. Adding Wet Mirror Finish to your detailing arsenal keeps your car better protected and looking better over the lifetime of the car. Protect your investments and have the shiniest car on your block with Chemical Guys Wet Mirror Finish.

Other Sizes Available

Wet Mirror Finish is also available in a **16 ounce** and **64 ounce (1/2 Gallon)** size.

How To Use:

- Shake well
- Clean surface.
- Place a small amount of the Wet Mirror Finish on a foam or microfiber applicator pad.
- Apply a thin coat over the vehicle. Allow a 15 minute dry time before removing.
- Remove using a premium microfiber towel for a high gloss shine.
- For best results, follow with your favorite Chemical Guys sealant or wax.
