

About This Towel

The Chemical Guys Microfiber Max 2-Faced Soft Touch Microfiber Towel combines two ultra-soft towels into one plush finishing towel. Premium Microfiber Towels are perfect for final-touch detailing because they are ultra-soft, ultra-plush, and stitched for scratch-free buffing and wiping. Microfiber is the industry-standard cloth for touching and wiping cars because it is super-soft, super-absorbent, and will not scratch paint when used properly. Every luxurious towel is woven with plush symmetrical strands that are sure to put a smile of the face of even the toughest auto enthusiasts. 2-Faced Microfiber Towels are made with a select 70/30 blend of microfiber for exceptional softness and durability, and a luxurious silk-banded edge to further reduce the chances of scratching sensitive paintwork. The bright yellow microfiber easily shows dirt and debris. Once the yellow side is filled, flip to the plush gray side for final scratch-free buffing and wiping on any surface. Gently wipe away dust and debris with any fine Chemical Guys detail spray for a streak-free shine. When only the best towels will do for exquisite detailing work, choose the Chemical Guys Microfiber Max 2-Faced Soft Touch Microfiber Towel.

Exquisite Finishing Detail Towel

The Microfiber Max 2-Faced Soft Touch Microfiber Towel is tailored for final touch detailing and sensitive cleaning on fragile auto finishes. The dual-towel design sandwiches two premium towels together to make one extremely soft and thick towel. Bright yellow microfiber easily highlights any dirt or debris to cue when to flip to the gray side for final scratch-free buffing. The twin high pile length soaks up wash water, premium detail sprays, and waterless wash solutions. Gently pick up light dirt and dust without scratching to reveal the deep lustrous reflection below. The fine silk-banded edge further reduces the chance of scratching when buffing and drying all the way to the edge of the towel. Use the Microfiber Max 2-Faced Soft Touch Microfiber Towel during any full detail, weekly maintenance wash, or for quick cleanups at a car show or concours showcase.

Premium Grade Microfiber

Microfiber is a miraculous blend of Polyester and Polyamide, and the ratio of the two determines the softness of the fabric. Low grade microfiber towels are made with 80/20 microfiber, and can scratch paint. Chemical Guys Microfiber Max 2-Faced Soft Touch Microfiber Towels are made with premium 70/30 blended microfiber for an extra soft feel that drastically reduces the risk of scratching sensitive automotive surfaces. Microfiber Max 2-Faced Towels also feature silk-banded edges for an extra-soft feel all the way to the edge. Professional detailers, meticulous collectors, and serious enthusiasts all choose Microfiber Max 2-Faced Soft Touch Microfiber Towels for all their final-touch detailing jobs.

Luxurious Silk Edging

The Microfiber Max 2-Faced Soft Touch Microfiber Towel uses ultra-soft microfiber and exclusive silk-banded edges to help prevent any swirls or scratches on sensitive paintwork and automotive surfaces. Every Chemical Guys Microfiber Max 2-Faced Towel features an ultra-soft silk edge. While cheap microfiber towels have hard nylon edges that scratch paint, Chemical Guys 2-Faced Towels use soft silk edges to protect paint from damage with 100% of the towel's surface. Detailers and weekend warriors routinely spend countless hours of meticulous work to achieve the perfect finish, only to have it ruined by the final wipe of their cheap bulk-bought towel. Don't get fooled again: see why detailing professionals, hardcore enthusiasts, and show car gurus choose Chemical Guys Microfiber Max 2-Faced Soft Touch Microfiber Towels for luxurious detailing jobs where scratch sensitivity is a vital factor.

Keep Your Towels Clean And Soft

Clean and soft microfiber is crucial to preventing scratches on paint. Use Chemical Guys [Microfiber Wash](#) to keep your microfiber towels clean, soft, and absorbent! To wash and dry microfiber goods:

- Separate microfiber towels by type into designated wash & dry loads.
 - Keep grimy towels separate from cleaner paint towels!
 - Start by washing "cleaner" towels first, then finish with "grimier" towels.
- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
 - Hot water opens the fibers to better release dirt and grease.
 - Do not use fabric softener: fabric softeners clog microfiber and render them unabsorbent and useless.
- Machine dry microfiber goods on LOW heat.
 - High heat cooks fibers, makes them hard, and then they can scratch paint.
 - Do not use fabric softener dryer sheets: fabric softeners clog microfiber and render them unabsorbent and useless.

Feel the difference with Chemical Guys.
