

About This Applicator

The Premium Grade Microfiber Applicator is the ideal choice for applying your favorite Chemical Guys products. This applicator works great for applying waxes, sealants, glazes, dressings and more. This premium applicator pad is inside stitched two times to ensure that the edges never touch the surface of your paint reducing surface scratches and improving the application of product. Premium 100% machine washable microfiber fabric is wrapped around a plush, durafoam pad that is engineered to deliver just the right amount of pressure to easily mold itself to the surface delivering just the right amount of product. This applicator pad will not saturate the sponge and will not retain product which would lead to product waste.

Versatile Applicator

Chemical Guys Premium Grade Microfiber Applicators are professional grade applicators for every detailing job. Microfiber is the industry-standard cloth for touching and wiping cars because it is super-soft, super-absorbent, and will not scratch paint when used properly. Chemical Guys Microfiber Applicators are made with premium 70/30 blended microfiber for ultimate softness and longevity. Use Premium Microfiber Applicators to spread glaze, sealant, wax, or dressing on any car, truck, motorcycle, or RV. Premium Applicators are extremely versatile, and can be used to spread wax, polish small areas, dress plastic, condition leather, and more! Premium Grade Microfiber Applicators are color coded, so anyone can tell which pad is designated for specific detailing jobs—a crucial step towards avoiding cross-contamination between sensitive automotive surfaces. Accept only the best: Chemical Guys Premium Grade Microfiber Applicators are the only microfiber applicators that belong in your detailing arsenal!

Color Coded For Professional Detailing Results

Chemical Guys Premium Grade Microfiber Applicators are color coded for different areas across your car. Cross-contamination is an amateur mistake: using an engine bay applicator for interiors can stain and ruin leather surfaces; dressing residue can streak on glass; brake dust stuck in wheel and tire applicators can scratch and swirl paint. Use the Chemical Guys/Smart Detailing University Color Coding System for perfect results:

- Green: Paint
- Blue: Glass
- Yellow: Interior carpets, fabric, and upholstery
- Tan: Leather and Vinyl
- Gray: Wheels, rims, polished metals, bumpers
- Black: Engine bays, tires, rubber/plastic/vinyl trim pieces

Premium Grade Scratchless Microfiber

Microfiber is a miraculous blend of Polyester and Polyamide, and the ratio of the two determines the softness of the fabric. Low grade microfiber goods are made with 80/20 microfiber, and can scratch paint. Chemical Guys Premium Grade Microfiber Applicators are made with premium 70/30 blended microfiber for an extra soft feel that drastically reduces the risk of scratching sensitive automotive surfaces. Chemical Guys Premium Grade Microfiber Applicators are the safest and most versatile applicators for serious collectors, detailers, and enthusiasts. Spread any cream sealant or carnauba wax without causing any swirls or scratches. Easily prepare carnauba paste wax and spread a thin, even coat over any paint finish effortlessly. Apply any spray or cream dressings to textured plastic on bumpers and mirrors, around rubber window molding, or on tires and engine bays in a flash. There is a Premium Grade Microfiber Applicator for every detailing application.

Keep Your Applicator Clean

Keep your microfiber applicator at the peak of its softness and performance with [Microfiber Wash Cleaning Detergent Concentrate](#). If used regularly, Microfiber Wash will retain and restore microfiber softness and protect your microfiber towels keeping them soft and absorbent.

How To Use:
Keep Your Microfiber Clean and soft microfiber is crucial to preventing scratches on paint. Use Chemical Guys Microfiber Wash to keep your microfiber goods clean, soft, and absorbent!

To wash and dry microfiber goods:

- Separate microfiber goods and applicators by type into designated wash & dry loads.
 - Keep grimy goods separate from cleaner paint goods.
 - Start by washing "cleaner" goods first, then finish with "grimier" goods.
- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
 - Hot water opens the fibers to better release dirt and grease.
 - Do not use fabric softener: fabric softeners clog microfiber and render them unabsorbent and useless.
- Machine dry microfiber goods on LOW heat.
 - High heat cooks fibers, makes them hard, and then they can scratch paint.
 - Do not use fabric softener: fabric softeners clog microfiber and render them unabsorbent and useless.
