

About These Towels

The Chemical Guys Blue Extra Thick Happy Ending Edgeless Interior Touch Microfiber Towel is an ultra plush and scratch-free towel. Happy Ending Microfiber Towels are made with premium 70/30 blended microfiber for ultra-soft scratch-free cleaning and wiping. Fluffy piles of soft microfiber trap harmful dust and dirt particles to protect paintwork from swirls and scratches with every wipe. Use the Blue Happy Ending Microfiber Drying Towel when cleaning and dusting car interiors. Plush Happy Ending Towels remove dust, body oils, and grime from dashboards, wood trim, navigation screens, gauge clusters, seats, leather, and cupholders. The immense surface area of each microfiber strand captures any missed bits of dirt and grime, and insulates them to prevent paint swirls and scratches. The unique laser-cut edgeless design removes any hard surface from the towel, and guarantees the gentlest touch from every square inch of the fabric. To combat cross-contamination between sensitive surfaces, Chemical Guys manufactured Happy Ending Towels in multiple colors to easily distinguish between interior and exterior towels, and between towels suited for specific jobs. Separate wheel and engine towels from paint and leather towels to avoid spreading grease on seats, or swirls and scratches on paintwork. The most sensitive areas require the softest touch; finish them off with the Extra Thick Happy Ending Towel.

Blue Happy Ending Towels For A Scratch And Chemical Free Interior Touch

Blue Happy Ending Towels are perfect for cleaning and dusting car interiors. The soft and fluffy microfiber picks up dirt, dust, body oils, and grime from leather seats, wood dashboard trim, sensitive plastic screens and gauges, and more. The luxurious plush microfiber pile traps and insulates any missed dirt, dust, and debris away from the painted surface. Less friction means fewer chances for installing swirls and scratches caused by improper rubbing and buffing. Microfiber can even clean and dust interior parts without added cleaners or chemicals. Microfiber's insulating properties are unique amongst all fabrics, and drastically reduce the chances of scratching and damaging paintwork with particulate contamination. The fluffy Blue Happy Ending Towel cleans and conditions car interiors without installing extra swirls or scratches. Choose the Blue Extra Thick Happy Ending Microfiber Towel for safe and fast interior detailing.

Edgeless & Scratchless Construction

Low grade microfiber towels are made with hard polyester edges that chafe and scratch sensitive automotive surfaces like paint. Chemical Guys Happy Ending Microfiber Towels are laser cut to help eliminate the risk of hard edges rubbing on paint. This seamless technology delivers perfect detailing performance, and drastically reduces the risk of scratching sensitive automotive surfaces. Happy Ending Microfiber Towels are the only towels for serious collectors, professional detailers, and hardcore enthusiasts.

Premium Microfiber

Microfiber is a manmade fabric blended with polyester and polyamide. Extra Thick Happy Ending Microfiber Towels are made with premium 70/30 blended microfiber. This luxurious blend contains more polyamide, which gives microfiber the softness needed for the most sensitive surfaces. Lower grade towels are blended with 80/20 microfiber, which contains more polyester. Polyester is sensitive to heat and hardens after multiple runs through the dryer. Hard polyester can scratch sensitive automotive surfaces. Happy Ending Microfiber Towels are made with high quality materials to last for years of perfect interior and exterior use. Great for removing wax or quick detail spray. The extra thick design ensures your vehicle always looks its best.

Color Coded For Perfect Detailing

Chemical Guys Happy Ending Microfiber Towels are color coded to eliminate cross-contamination between different areas around the car. Cleaning paintwork with a wheel towel can spread brake dust and cause swirls and scratches on the glossy finish. Wiping leather seats with an engine bay towel can smear grease and oil into the upholstery and cause permanent stains. Designating specific towels for certain jobs keeps undesirable contaminants from places where they don't belong for every detailing results. Follow the Chemical Guys Smart Detailing University color scheme or make up your own and stick to it to guarantee a happy ending with superior detail.

The Happy Ending Line				
Happy Ending Green Scratch-free drying towel	Happy Ending Red Waterless car wash towel	Happy Ending Blue Soft touch interior detailing towel	Happy Ending Purple Wax, glaze, and sealant buffing towel	Happy Ending Black Final quick detail wipe down towel

Keep Your Towels Clean And Soft

Clean and soft microfiber is crucial to preventing scratches on paint. Use Chemical Guys [Microfiber Wash](#) to keep your microfiber towels clean, soft, and absorbent! To wash and dry microfiber goods:

- Separate microfiber towels by type into designated wash & dry loads.
 - Keep grimy towels separate from cleaner paint towels!
 - Start by washing "cleaner" towels first, then finish with "grimier" towels.
- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
 - Hot water opens the fibers to better release dirt and grease.
 - Do not use fabric softener: fabric softeners clog microfiber and render them unabsorbent and useless.
- Machine dry microfiber goods on LOW heat.
 - High heat cooks fibers, makes them hard, and then they can scratch paint.
 - Do not use fabric softener dryer sheets: fabric softeners clog microfiber and render them unabsorbent and useless.
