

About This Towel

The Chemical Guys Green Workhorse XL Microfiber Towel is the perfect tool for buffing and drying large vehicles. The extra large towel is made with super soft 70/30 blend microfiber for scratch-free wiping on paint, carbon fiber, and fiberglass body panels. The premium 70/30 blend stays soft through dozens of wash and dry cycles, and resists scratches on sensitive surfaces. The large 24" x 16" towel easily folds into fours for efficient use of every inch of the cloth. Green Workhorse Towels pick up and trap dirt and debris, and easily remove any premium Chemical Guys wax, detail spray, or sealant. Choose the Workhorse XL towel to clean and dry large trucks, minivans, and SUVs after a weekly wash or for quick detail spray wipe downs. Remove contamination from paint and carbon fiber body panels to reveal a lustrous shiny surface. The ultra-absorbent towels trap liquids and solids like dirt and dust deep inside the fibers and away from sensitive paint on vehicle exteriors. This insulating action helps prevent dreaded swirls and scratches caused by improper washing and drying. For smaller more nimble jobs, try the versatile 16" x 16" size Workhorse Microfiber Towels to detail around any vehicle. Choose Green Workhorse XL Microfiber Towels to dry the car after a wash, use a waterless wash, pick up light dust and dirt with a detail spray, or buff away cured paste waxes and cream glazes.

Premium Scratch-Free Microfiber Towel

The Chemical Guys Green Workhorse XL Towel is made with premium ultra-soft 70/30 microfiber for a scratch-free touch on any vehicle. Cheap microfiber and old terry cloth towels scratch paint. Bargain bin auto shop towels are made with low grade 80/20 microfiber, which does not retain its softness after many uses. Cotton towels and applicators may feel soft on skin, but the fabric strands are visibly very sharp under a microscope. These jagged strands cut into and scratch paint with every wipe. Premium microfiber towels pick up and trap abrasive debris without scratching paint. Use the soft Workhorse XL towel to pick up water, dirt, detail sprays, wax, or sealant without installing any swirls or scratches in the finish. Using the Green Workhorse XL Microfiber Towel saves time and money in the long run by preventing unsightly swirls and scratches that require hours of polishing. Buff away water, dirt, and dried glaze, sealant, and wax from paint and exterior body panels with the Green Workhorse XL Microfiber Towel.

Part Of The Workhorse Lineup

Green Workhorse XL Microfiber Towels are perfect for general washing and detailing jobs on paintwork and exterior body panels on large vehicles. The expanded 24" x 16" size gives extra room to wipe up large amounts of water, dirt, and detail sprays. The bright green finish highlights dirt and debris to cue when to flip to a clean side to avoid installing swirls and scratches. Cross-contamination between paintwork, wheels, leather, and glass can ruin a detail job in one swipe: grease from a tire can stain leather seats; wax from paintwork can streak glass; brake dust from wheels and tires can forever scratch and swirl paint. The Chemical Guys Workhorse Microfiber Line covers towels and applicator pads for every area of the automobile. Use the premium microfiber towels to clean exterior and interior vehicle areas, engine bays, wheels and tires, undercarriages, leather upholstery, metal parts, and more. Use the right towel for the right area, and avoid cross-contamination between sensitive leather and fabric interiors and greasy exterior surfaces.

Color Coded For Professional Detailing Results

Chemical Guys Workhorse Microfiber Towels are color coded for different areas across your car. Cross-contamination is an amateur mistake: using an engine bay towel on interiors could stain and ruin leather surfaces; dressing residue can streak on glass; brake dust stuck in wheel towels can scratch and swirl paint. Use the Chemical Guys/Smart Detailing University Color Coding Scheme for perfect results!

Color Coding System

The Workhorse Line

					
Workhorse Blue Glass & Mirrors	Workhorse Green Paint	Workhorse Yellow Interior Carpets, Fabric & Upholstery	Workhorse Tan Leather & Vinyl	Workhorse Gray Wheels, Polished Metals & Chrome Trim & Bumpers	Workhorse Black Engine Bays, Tires & Rubber, Plastic & Vinyl Trim

These simple colors increase efficiency and will deliver better results easily. This color coordinating system works as a constant reminder so everyone knows which towel to use for what.

Keep Your Towels Clean And Soft

Clean and soft microfiber is crucial to preventing scratches on paint. Use Chemical Guys [Microfiber Wash](#) to keep your microfiber towels clean, soft, and absorbent! To wash and dry microfiber goods:

- Separate grimy towels by type into designated wash & dry loads.
 - Keep grimy towels separate from cleaner paint towels!
 - Start by washing "cleaner" towels first, then finish with "grimier" towels.
- Machine wash microfiber goods with Chemical Guys Microfiber Wash and HOT water.
 - Hot water opens the fibers: better release dirt and grease.
 - Do not use fabric softener: fabric softener clogs microfiber and render them unabsorbent and useless.
- Machine dry microfiber goods on LOW heat.
 - High heat cooks fibers, makes them hard, and then they can scratch paint.
 - Do not use fabric dryer sheets: fabric dryer sheets clog microfiber and render them unabsorbent and useless.
