

## How It Works

Chemical Guys Convertible Top Protectant and Repellent is the ultimate solution to protect any convertible fabric soft top. The revolutionary protectant creates a shield that repels liquids, dirt, stains, and UV solar rays. Convertible Top Protectant and Repellent micro-bonds to the fabric fibers for durable protection. The non-toxic formula is safe for any fabric convertible soft top and tonneau cover, and works great on all color tops. Innovative UV blockers protect against fading and discoloration of your convertible soft top. Advanced stain repellent technology keeps any fabric soft top in like-new condition. The sprayable formula uses hydrophobic technology to repel water and other liquids, protecting the original condition of any fabric convertible top. Convertible Top Protectant and Repellent works on any fabric soft top and tonneau cover for ultimate versatility. Convertible Top Protectant and Repellent extends the life of fabric convertible tops on cars new and old. Simply clean the fabric soft top using Chemical Guys Convertible Top Cleaner. Once the top is dry, apply a coat of Convertible Top Protectant and Repellent to create a durable layer of protection that lasts for months. Protective coating protects against tree sap, road tar, water spots, and other environmental elements. Protect your fabric soft top with Chemical Guys Convertible Top Protectant and Repellent.

## Protection For Soft Tops Everywhere!

Chemical Guys Convertible Top Protectant and Repellent uses advanced technology to protect and preserve the condition of any fabric convertible top and tonneau cover. The unique protectant and repellent protects against liquids, dirt, stains, water spots, tree sap, and much more. Simply spray Convertible Top Protectant and Repellent on any fabric soft top to protect it for months. Convertible Top Protectant and Repellent is designed with advanced UV protection that helps prevent fading and discoloration of the fabric top. Hydrophobic technology increases the surface tension of the fabric top allowing water to simply slide off before it can stain.

## Help Soft Tops Last Longer And Look Good

Convertible tops have a short lifespan, and must be replaced every few years. Protecting your fabric soft top or tonneau cover is critical to your vehicle's image. Chemical Guys Convertible Top Protectant and Repellent protects fabric soft tops to keep them looking new, and help them last longer. The advanced formula provides months of durable protection against liquids, stains, UV solar rays, tree sap, road tar, water spots and much more. Rain water and dirt will not stick to the surface. UV solar rays can fade, discolor, and degrade fabric soft tops. Convertible Top Protectant and Repellent contains UV blockers that protect against solar rays to keep any convertible top looking great for years to come. Works on all colors for the ultimate versatility. Protect any convertible top and tonneau cover with Chemical Guys Convertible Top Protectant and Repellent.

## Easy To Use

The versatile formula protects all fabric convertible tops. The sprayable formula micro-bonds to convertible fabric soft tops to repel water and protect against dirt and stains. Chemical Guys Convertible Top Protectant and Repellent preserves the original condition of any fabric soft top for years. To use, first clean the fabric soft top using Chemical Guys Convertible Top Cleaner to remove dirt and stains. Once the fabric soft top is clean, spray a thin, even coat of Convertible Top Protectant and Repellent across the surface. Allow 20 minutes for drying time. Once dry, apply a second coat for improved protection. Treat soft tops with Protectant and Repellent once a year or as needed for desired water beading and sun blocking effects.

## Other Sizes Available

Convertible Top Protectant and Repellent is available in [4 ounce](#) and [16 ounce](#) sizes.
