

## About Leather Conditioner

Chemical Guys Leather Conditioner nourishes and restores leather pieces with a like-new look and feel. Unlike cheaper leather care products, Chemical Guys Leather Conditioner is free of any petroleum bases and caustic chemicals that dry leather out, cause fading and discoloring, and leave a shiny finish with greasy feel. The refined water-based formula is blended with Vitamin E and Aloe extracts to moisturize leather pieces to restore a soft, supple feel. Leather is skin, and if neglected, it can crack, burn, fade, and discolor. Normal wear and tear from getting in and out of the car can cause cracking and breaking of leather pieces on bolsters and seats, and dried out leather speeds up this process. Work Leather Conditioner into the leather hide just like lotion into skin to moisturize and nourish leather upholstery inside any automobile. Treat leather seats, dashboards, door panels, center consoles, armrests, and even headliners found in any automobile. Leather Conditioner contains no caustic ingredients, and is safe to use on any natural leather, durable sealed leather, and synthetic vinyl leather upholstery. Experienced detailers even take Leather Conditioner into the home or office to restore furniture, apparel, and accessories with the soft silky touch of fresh new leather. Regular treatments with Leather Conditioner help prevent a dried out look and feel that leads to cracking on older leather pieces. Restore and protect leather car parts before they require expensive refurbishment with Chemical Guys Leather Conditioner.

## Versatile Formula

Conditioning your leather is the key to maintaining the original appearance and natural feel. Chemical Guys Leather Conditioner is specifically formulated to restore and maintain all types of leather goods and surfaces. Nourish and protect leather seats, dashboards, and door panels with Leather Conditioner to help prevent cracking and fading caused by normal wear and tear. The refined water-based formula works across all types of natural leather, sealed leather, and synthetic leather upholstery for ultimate versatility in, and around any automobile. Chemical Guys Leather Conditioner helps nourish and protect leather in your car to prevent the need for expensive refurbishments down the line. The gentle formula conditions any color leather without damaging the dyes or texture. Works great on black, tan, cream, blue, brown, and white leather surfaces for perfect results in minutes. The versatile formula works on virtually any leather surface, including upholstery, hand bags, shoes, purses, accessories, sofas, and furniture. Whether you're working inside the car, home, or office, choose Chemical Guys Leather Conditioner for your next leather detail.

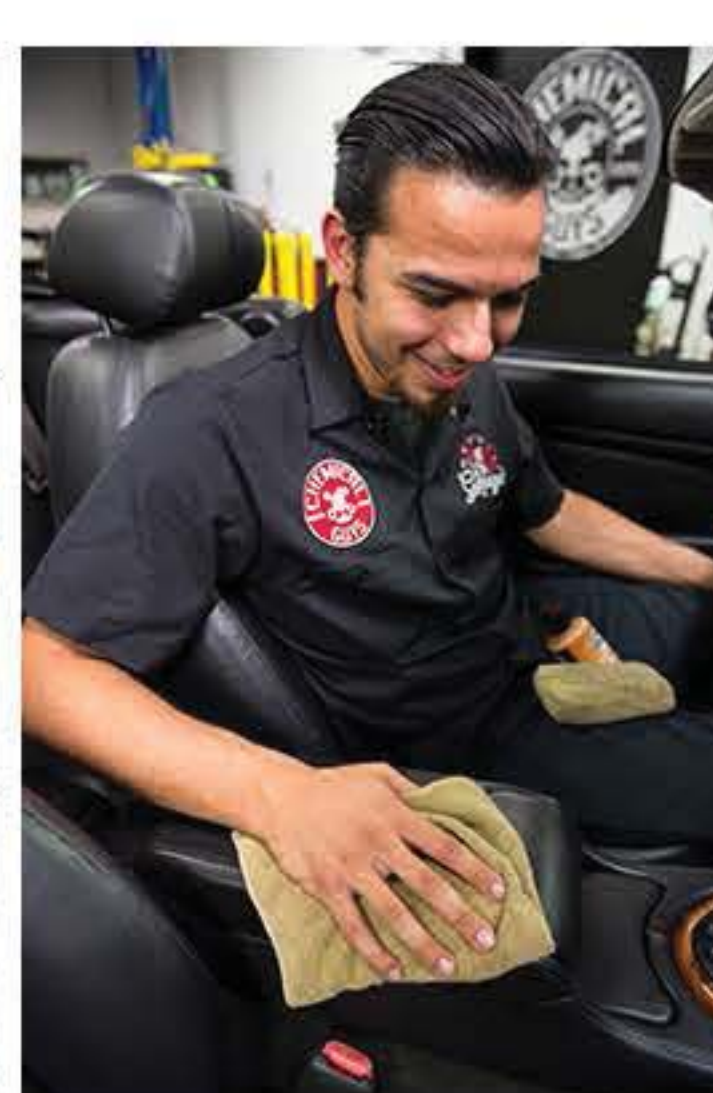

## Protection Against The Elements And More

Every bottle of Chemical Guys Leather Conditioner comes blended with specialty additives to protect leather surfaces against excess wear and tear. Unique stain guard technology helps repel dirt and stains so leather surfaces stay cleaner for longer. Use Leather Conditioner when detailing steering wheels, shift knobs, and handbrake levers to help maintain a rich leather appearance all year round. Chemical Guys Leather Conditioner nourishes and moisturizes leather to keep the fibers of the hide supple, flexible, and strong. Harmful UV rays can promote cracking, fading, and discoloration of leather parts. Leather Conditioner nourishes leather with natural Vitamin E and Aloe extracts that help prolong the life of leather parts in and around any vehicle. Chemical Guys Leather Conditioner is the perfect choice to condition and maintain your leather's soft, fresh, and satiny factory-fresh look, feel, and smell.

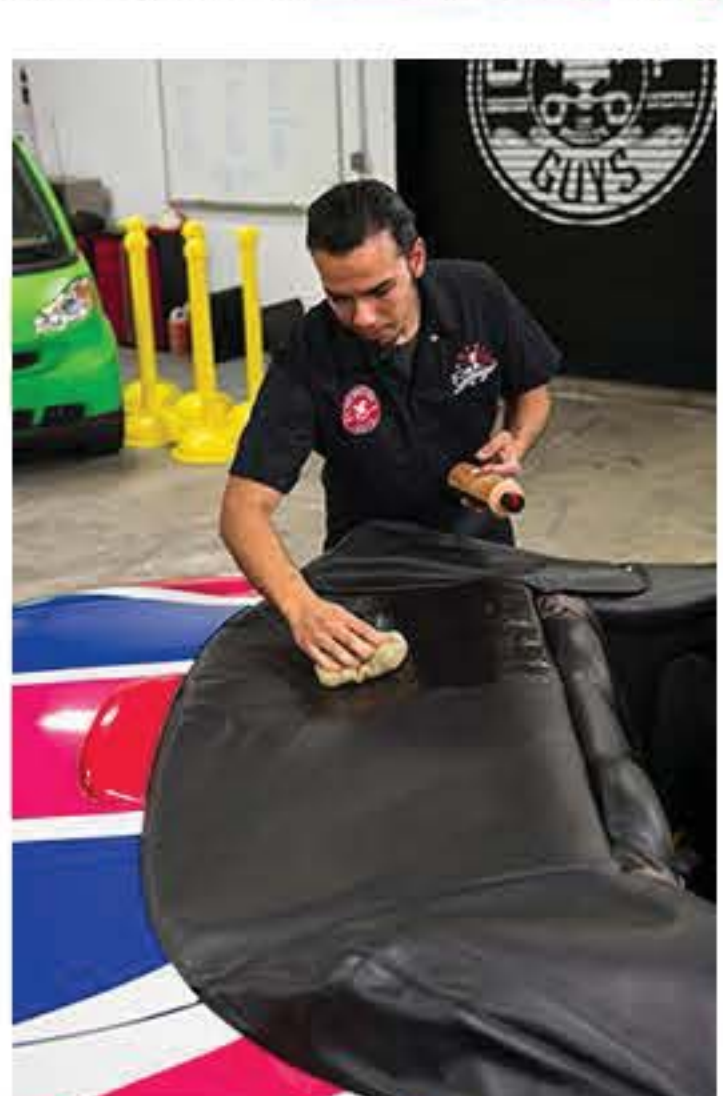

## Prevent Pain With Good Maintenance Along The Way

Chemical Guys Leather Conditioner is perfect for conditioning leather of any age, old or new. Achieve the natural look and feel of soft, fantastic leather with Leather Conditioner. Start by cleaning leather surfaces with Chemical Guys Leather Cleaner to remove excess dirt and grease. Once the surface is clean, spread Leather Conditioner with a premium microfiber applicator pad and work it into the surface like lotion into your skin. Buff off any excess with a microfiber towel, then enjoy the newly-restored soft feel and natural look of fresh leather. Maintain the like-new appearance of leather upholstery with a coat of Leather Conditioner at every detail to keep your car looking and feeling like new for years to come.

## Other Sizes Available

Leather Conditioner is available in **4 ounce**, **16 ounce**, and **1 gallon** sizes.

How To Use:  
Start by cleaning dirt, grease, and body oils from leather surfaces with Chemical Guys Leather Cleaner.

- Always test new leather care products on an inconspicuous spot to check for colorfastness and desired results.
- Pair Chemical Guys Leather Cleaner with the Horsehair Leather Cleaning Brush.
- Spray Leather Cleaner directly into brush bristles and scrub dirt and filth from the affected area.
- Wipe up excess cleaner and loosened filth with a premium microfiber towel.

Follow by conditioning leather parts to keep them looking and feeling supple and new.

- Spread 1 - 3 lines of Chemical Guys Leather Conditioner on a premium microfiber applicator pad.
- Spread the Leather Conditioner cream evenly over the workpiece, then massage deep into the hide like rubbing lotion into the skin.
- Buff off any excess product to restore a soft, smooth, and silky feel.

Feel the difference with Chemical Guys.
