

The New Side Rocker Splitters fit all Mustang model years from 2005 to 2014, including Mustang Shelby GT 500 and Shelby Supersnake models. The new Side Rocker Splitters are manufactured in the USA from OEM quality Thermal Plastic Olefin (TPO). TPO is known for its long-lasting durability and UV protection. It features a grained texture for that OEM look. The Side Rocker Splitters look great in black or can be painted to match the color of the vehicle.

Manufacturing process - Thermoformed TPO (grained and UV protected)

When it comes to quality body kits & ground effects, Classic Design Concepts is the brand you can depend on.
