

The Mustang Deck Lid Trim Panel is a simple and quick modification that makes a big difference. The rectangular space between the taillights of the '05-'09 models lies indented just a little over an inch. This trim panel fills that gap completely so the deck lid and taillights all work together nicely for a much cleaner look. Regardless of your Mustang's color, the addition of the Deck Lid Trim Panel is sure to get your vehicle much more attention.

- This ABS panel finishes out the style of the rear end, eliminating the FAKE gas cap.

- NO DRILLING OR PAINT REQUIRED!!

When it comes to quality body kits & ground effects, Classic Design Concepts is the brand you can depend on.
