

The Mustang convertible has been a very popular vehicle for many decades and the 2015-18 model continues that tradition. In most cases, however, the front of the Mustang tends to make more of an impression than the side profile because a convertible lacks definition when the top is down. Enhance the flat side profile of your Mustang convertible with the Classic Light Bar and give your car a sportier look that is sure to catch a whole lot of attention!

The CDC *Classic LightBar* fits the **ALL** 2015-18 Mustang Convertibles.

- The factory top effortlessly fits over our *Classic LightBar* and does not interfere with any factory functions.
- Our *Classic LightBar* attaches to B-pillars creating a sturdy mount, designed to stiffen your convertibles chassis.

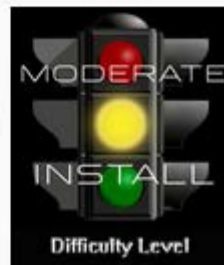

The LightBar is constructed of a sturdy 1 ¼" round steel tube, with a 1/8" wall thickness. Polyurethane is then molded around the tube and hand-wrapped in vinyl, grained to match your car's interior trim.

- Our *Classic LightBar* bar now requires NO DRILLING to install the mounting brackets and mounting hardware making installation a breeze.

NOTE: If you are unsure of color matches, please give us a call and we can send you color swatches to match up to your interior.

*****Not intended for rollover protection*****
