**UTV - SAND CAR
RESTRAINTS**

Issue #2

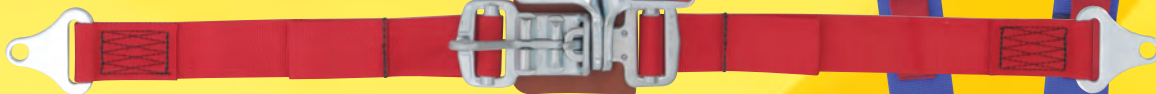

The
NEXT GENERATION
UTV Restraint System

Features a
Quick Adjust latch.
Available in 2x3,
2x2 or 3x3 models.

Colors Available:

Red • Blue • Black • Gray • Purple

PART 32032

Proven Fact:

A narrower lap belt works better than the traditional 3" lap belt. The new narrower 2" lap belt rides within the crest of the pelvis vs the 3" that rides on the crest of the pelvis. A tighter belt will respond quicker in a sudden stop and is more comfortable.

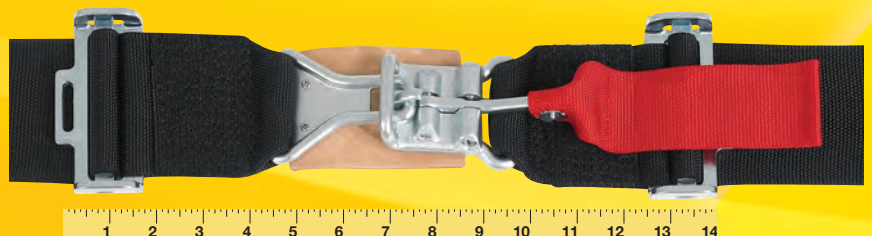

PART 32053

Available in QA and Standard Latch & Link

Trouble tightening your restraints with the standard style 14" latch & link system?

The **NEXT GENERATION** Restraint System with the 6" latch & link solves that problem. The adjuster is built into the latch.

INSTALLATION TIPS

- Driver Restraint Systems: Sub Belt

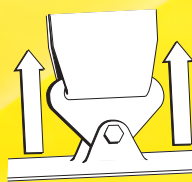

1. Lap belt must be anchored to the frame rail or roll cage as close to the hip as possible at an angle of 45 degrees, but no greater than 60 degrees to the ground.

2. 5-Point Anti-Submarine Belt should be anchored on or slightly behind the Chest Line.

MOUNTING BRACKETS

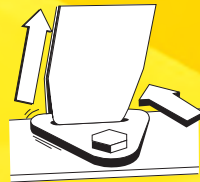

Mounting brackets should be installed at an angle that is compatible with the direction of pull on the webbing under full load. Preferred mount is in a double shear with allowance for the bolt-in bracket to pivot and align toward the direction of the load as shown in Figure 1.

FIGURE 1

CORRECT

FIGURE 2

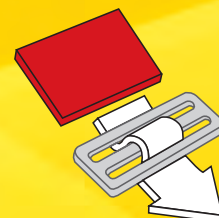

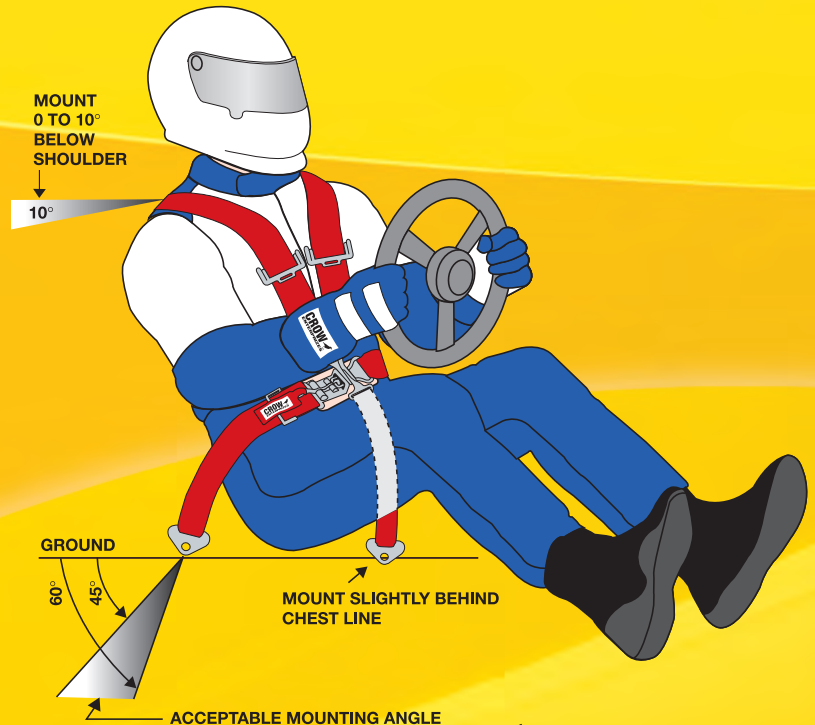

INCORRECT

FIGURE 1 AND FIGURE 2

All mounting brackets should be attached directly to the frame or chassis of the car and installed to limit the driver's body travel both upward and forward. Do not weld around or near belts or belt hardware.

Minimum specification for bolts and washers to attach the seat belts, harnesses and anti-submarine belt hardware are Grade 8.

"LOCKING" the 3-bar Slide Adjuster shown in Steps 1 through 4 is **VERY IMPORTANT**. The 3-Bar Slide Adjuster must be located as close as possible to the Bolt-in bracket or Roll Bar (In Wrap Around design).

STEP 1: Insert strap through tightening buckle.

STEP 2: Pull strap to 8"-10" beyond buckle, fold edges and insert into mounting bracket.

STEP 3: Fold back strap and reinsert through buckle as shown.

STEP 4: Fold back strap again and insert through bottom portion of buckle.
