

## CHIME VOLUME ADJUSTMENT:

If the vehicle is equipped with an amplified audio system, the SOCGM-18 has a built-in audio adaptor that outputs the proper audio level from the aftermarket radio to the factory amplifier. To use this feature, plug in the male 8-pin connector on the SOCGM-18 harness to the GRAY female 8-pin connector on the SOCGM-18 module. The module is also labeled “Bose” and “Non Bose” to avoid confusion. (see picture below)

If the vehicle is NOT equipped with a factory amplified system, plug in the male 8-pin connector to the BLACK female 8-pin on the SOCGM-18 module.

## SELECTING THE AUDIO SYSTEM:

The SOCGM-18 has a potentiometer to adjust the chime volume. It is set at half way by default. To adjust the volume, simply use a suitable screw driver and turn the potentiometer clockwise to increase the volume and counter-clockwise to decrease the volume.

## VEHICLE APPLICATIONS:

### BUICK

2008-2017 Enclave  
 2006-2011 Lucerne

### CADILLAC

2006-2011 DTS
