*See other side for details

PRO THREAD FEATURES:

- Cost-effectively repair and strengthen threads in various materials such as cast iron, steel, aluminum and other metals and plastics
- Applications include automotive repair, spark plug ports, outdoor power equipment, motorcycle repair and farm equipment
- Stainless steel inserts resist the effects of temperature and corrosion
- Wire inserts help to compensate for thread and pitch angle errors
- Inserts provide a permanent wear resistant internal thread
- Repaired threads are generally stronger than the original parent material thread
