

CTA #7458 & #7463 **NEW!**

CAMSHAFT SPROCKET HOLDING TOOLS

PORSCHE - 964/993

- Both tools feature a 19mm bushed socket to prevent slippage and rounding off of the cam bolt at the end of the camshafts
- Securely holds an impact socket in the center, ensuring accurate service and required torque setting
- The bushing prevents the socket from being leveraged off the bolt head, keeping it squarely in place for accurate torque during installation and removal
- Use with a 1/2" drive standard breaker bar, extension and/or torque wrench
