

#### 13418 **INSTALLATION INSTRUCTIONS**

YEARS: 2019-PRESENT

**MAKE: CHEVROLET** 

**MODEL: BLAZER** 

**STYLE: SUV** 

WARNING: NEVER EXCEED YOUR VEHICLE MANUFACTURER'S RECOMMENDED TOWING CAPACITY

**WEIGHT CARRYING:** 

TRAILER WEIGHT: 5,000 LBS. 750 LBS. **TONGUE WEIGHT:** 

**WEIGHT DISTRIBUTION:** 

TRAILER WEIGHT: 6,000 LBS.

**TONGUE WEIGHT:** 750 LBS.

PRO INSTALL TIME: 20 MIN. **NOVICE INSTALL TIME:** 40 MIN.

IF YOU ARE HESITANT TO UNDERTAKE THIS TASK ON YOUR OWN, CONTACT AN AUTHORIZED CURT INSTALLER FOR ADDITIONAL ASSISTANCE.

#### **INSTALLATION TIPS:**

- 1. BEFORE YOU BEGIN INSTALLATION, READ ALL INSTRUCTIONS THOROUGHLY.
- 2. TO EASE INSTALLATION, 2 PEOPLE MAY BE REOUIRED.
- THE QUALITY OF THE INSTALL AND REDUCE THE TIME REQUIRED.

# 3.. USING PROPER TOOLS WILL GREATLY IMPROVE

### **VEHICLE PHOTO:**

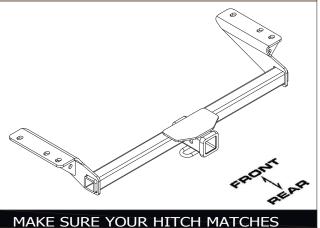

#### LEVEL OF DIFFICULTY: **EASY**

CHALLENGING EASY **MODERATE** -NO DRILLING -FISHWIRE HARDWARE

-LOWER EXHAUST

### HITCH ILLUSTRATION:

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE ALL FASTENERS ARE TIGHT AND ALL STRUCTURAL COMPONENTS ARE SOUND

#### INSTALLATION WALKTHROUGH:

			Parts List
TEM	QTY	PART NUMBER	DESCRIPTION
1	6	1/2-13 x 1 1/2, GR8	CARRIAGE BOLT
2	6	1_2 FISHWIRE	1/2" FISHWIRE
3	6	CM-SP10	.250 x 1.00 x 2.50" SQUARE HOLE SPACER
4	6	HFN 1213, GR8	HEX FLANGE NUT
		DRIVER FRAME	PASSENGER FRAME RAIL ACCESS HOLE (BOTH SIDES)  RUBBER ISOLATOR REMOVAL DIAGRAM This technique can be used if an Exhaust
			Hanger Removal Pliers is not available.  Using a 5/8" open end wrench, slide the wrench up to the rubber isolator, cradling
			the hanger rod as shown. Next place the flat edge of a pry bar between the wrench and the hanger stop or hanger rod. Then simply rotate the pry bar toward the wrench to remove the rubber isolator.
AND	H MOUNT OUT THE	FISHWIRE TECHNIQU D END OF FISHWIRE TOOL THRO ING HOLE IN VEHICLE FRAME RA ACCESS HOLE. PASS COILED	Note: Using a spray lubricant or soapy water on the hanger rod and the rubber
THRE TO KI BOLT FISH BOLT AND USE I	OF FISHV EAD BOLT EEP SPAC AS SHO WIRE, SP. THROUG OUT MOU FISHWIRE H DURING	VIRE THROUGH SPACER AND TINTO COIL. KINK WIRE CER SEPERATE FROM WN. PULL ACER, AND SHERRING ACER, AND SHERRING ACER, AND SHERRING ACER AND	ACCESS NO.E

1. To unfasten rear vehicle brackets from fascia, use T-15 socket to remove (2) screws. Set screws aside for reinstallation. Lower exhaust by removing (3) hangers.

NOTE: Support exhaust when lowering to avoid damage.

2. Fishwire (3) CM-SP10 spacers and (3) 1/2" carriage bolts through access hole and out mounting holes on each side of vehicle. (As shown in the Fishwire Technique Diagram) Remove access panel by removing (2) wing nuts. Pull access panel down and away from vehicle. Set aside panel for reinstallation.

### **INSTALLATION WALKTHROUGH:**

3. Raise hitch into position and secure with (3) 1/2" flange nuts on each side. Use 3/4" socket and torque all 1/2" hardware to 110 ft-lbs.

4. Reinstall vehicle bracket hardware and exhaust system as removed in Step 1. When hitch is not in use reinstall access panel removed in Step 2.

#### **INSTALLATION COMPLETE**

#### TOWING SAFETY INFORMATION

#### Gross Trailer Weight / GTW

The Gross Trailer Weight is the weight of the trailer & cargo. Measure this by putting the fully loaded trailer on a vehicle scale.

#### Tonque Weight / TW

The downward force that is exerted on the hitch ball by the coupler. The tongue weight will vary depending on where the load is positioned in relationship to the trailer axie(s). To measure the tongue weight, use either a commercial scale or a bathroom scale with the coupler at towing height. When using a bathroom scale with heavier tongue weights, use the method shown and multiply the scale reading by 3.

#### Weight Carrying / WC

The total weight of both the trailer and the cargo inside. Never exceed the weight capacity of your trailer hitch.

#### Weight Distribution / WD

Used to balance the weight of the cargo between the front and rear wheels throughout the trailer, allowing for better steering, braking, and level riding.

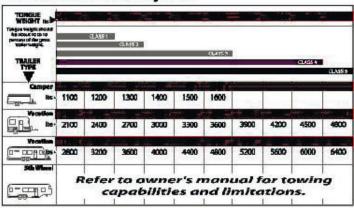

#### Sway Control

A device used to reduce the lateral movements of the trailer that are caused by the wind. This works in conjunction with a weight distribution hitch. Do not use this on a class 1 or 2 hitch, or with surge brakes.

#### How Much Can You Safely Tow?

#### **Ball Mount**

The ball mount is placed inside the opening of the receiver hitch which is mounted to the vehicle. Make sure a hitch pin and clip is properly securing the ball mount to the receiver hitch before you begin towing.

· A: Rise, B: Drop. C: Hole Size, D: Length.

#### Trailer Ball

The connection from the hitch to the trailer. There are many factors that determine the correct hitch ball:

- Number one is the hitch ball's cross trailer weight rating.
- The mounting platform must be at least 3/8" thick. The hole diameter must not be more than 1/16" larger. than the threaded shank.
- Every time you tow, check the nut and lock washer to make sure they are fastened securely.

  • A: Ball Dia. B: Shank Length, C: Shank Dia. D: Shank Rise.

#### Coupler

The component that is placed over the trailer ball to connect the vehicle to the trailer. Be sure that the coupler size matches the size of the hitch ball and that the coupler handle is securely fastened. To determine what size hitch ball you need for your application you will need to know the size of coupler that is on the trailer. Be sure your coupler is properly adjusted to the ball you are using.

NOTE: For added security the use of safety devices such as Coupler Safety Pins and Locks is strongly recommended.

#### Safety Chains

Safety chains are a requirement and should be crossed under the tongue of the trailer so that the tongue will not drop to the road if it becomes separated from the hitch. Always leave enough slack so you can turn. Never allow the safety chains to drag on the ground and never attach the chains to the bumper.

Trailer Classification: Safety Chain Breaking Force - Minimum Class 1: 2,000 lbs. (8.9 kN)

Class 2: 3,500 lbs. (15.6 kN)

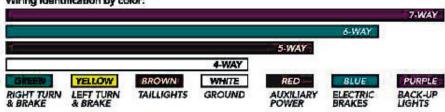

Class 3: 5,000 lbs. (22.2 kN)

The strength rating of each length of safety chain or its equivalent and its attachments shall be equal to or exceed in minimum breaking force the GVWR (Gross Vehicle Weight Rating) of the trailer.

#### Electrical

Trailer lights, Electric Brakes, Break-away systems - Every time you tow, be sure to check that all components are working properly.

Wiring identification by color:

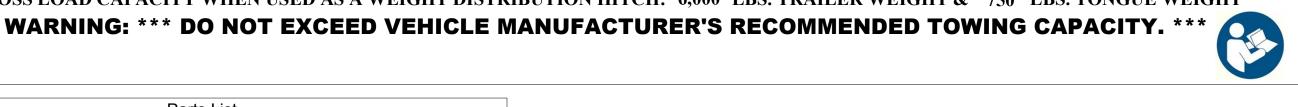

CURT DISCLAIMER: WIRING COLOR SHOWN WORK IN CONJUNCTION WITH CURT MANUFACTURING PRODUCTS.
