NOTICE

Visit www.curtmfg.com for a full-color copy of this instruction manual, as well as helpful videos, guides and much more!

Before you begin installation, read all instructions thoroughly.

Proper tools will improve the quality of installation and reduce the time required.

This installation requires:

- Temporarily lower exhaust
- No drilling required
- No trimming required

Periodic inspection of the trailer hitch should be performed to ensure all mounting hardware remains tight and structural components are secure.

To help prevent damage to the product or vehicle, refer to the specified torque specifications when securing hardware during the installation process.

SAFETY INSTRUCTIONS

Safety glasses should be worn at all times while installing this product.

ASSEMBLY

Parts List

Item	Qty	Description
1	4	Hex bolt, M12 x 1.25
2	4	Conical-toothed washer, 1/2"

CONICAL TOOTHED WASHER ORIENTATION

Step 1

Remove the four plastic plugs from the side of the frame rails, two on each side.

Step 2

Note: Some models may require temporarily lowering of the exhaust.

To lower the exhaust, unhook the three rearmost exhaust hangers. Support the exhaust prior to prevent damage or injury.

Step 3

Raise the hitch into position and install the four hex bolts (#1) and four conical-toothed washers (#2).

Step 4

Torque all M12 fasteners to 86 ft-lbs.

Step 5

Raise the exhaust back into position and reinstall the isolators if lowered in step 2.
