APPLICATION GUIDES

CURT Group is a leading sales, marketing, engineering and distribution company of towing products and truck accessories for all types of vehicles, from passenger cars to commercial trucks. Our family of brands includes CURT, ARIES, LUVERNE Truck Equipment, UWS and RETRAC.

We are a team of more than 1,000 associates world-wide, with manufacturing plants in Wisconsin, South Dakota, Florida and the Philippines, and 12 regional warehouses across the United States and Canada. We stand for EXCELLENCE in our products and our associates. We aspire to be the industry LEADER by recognizing that the customer is KING and our associates are our greatest ASSET.

CURT is the leading manufacturer of USA-made trailer hitches and a complete line of towing and electrical products. For everything from passenger cars to full-size trucks, our products are tested, proven and safe.

ARIES is a fast-paced marketer and innovator of truck, Jeep, SUV and CUV accessories. From automotive enthusiasts to professional builders, our products are built for the champions of individualism, innovation and attitude.

UWS is a leading manufacturer and designer of USA-made truck tool boxes. Our products are built to the highest quality standards, offering tough and reliable storage solutions for professional tradesmen and truck enthusiasts alike.

LUVERNE is a leading manufacturer of functional aftermarket accessories for pickup trucks, commercial vans and SUVs. We have been manufacturing in the USA since 1963. Our brand is nationally known and respected for quality craftsmanship and hardworking products that get the job done.

RETRAC is a leading manufacturer of OEM and aftermarket mirrors and front-end protection for heavy-duty and medium-duty trucks. Since 1957, our ongoing commitment to innovation and excellence has led RETRAC to mean "Best in Sight" to the trucking industry.

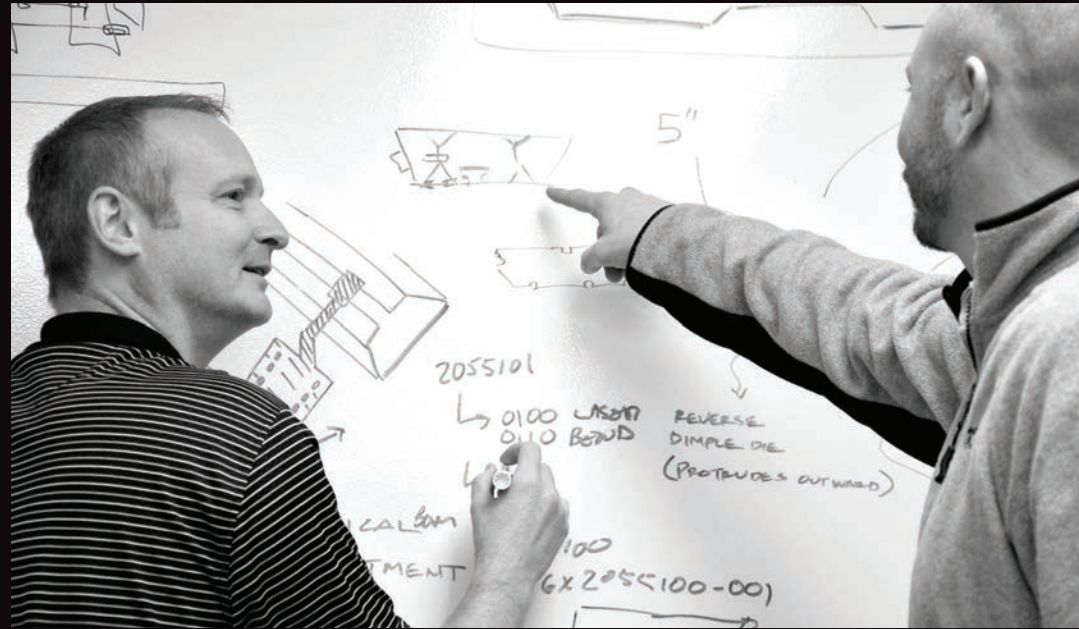

FIRST-TO-MARKET FOCUS

CURT strives for continuous improvement. This not only applies to our products but also to our internal processes as a company. We have always approached our work with a first-to-market focus, and as a result, we are able to deliver top quality products, for more vehicle applications, at an industry-leading rate.

This year, we are excited to introduce several new products, including brake controls, 3" receiver accessories, 5th wheel products and a full line of RV harnesses for dinghy towing.

Each year, we not only develop new, innovative products, but we also put a great deal of effort into our carryover process, expanding the application range of our existing products to cover more and more vehicles. The CURT application guides are constantly expanding.

NEW PRODUCTS

Chevrolet / GMC 5th Wheel Roller Adapter

This adapter uses simple quarter-turn anchors to easily drop into the GM puck system and provide a mounting platform for any CURT 5th wheel roller. **Page 300**

5th Wheel Hitch Lock

Compatible with all industry-standard base rails, this lock secures a 5th wheel into the rails without obstruction and operates with a 1/8-turn. **Page 225**

OEM-Style Gooseneck Hitches

Our new OEM-style goose for Ford Super Duty offers a one-person install and is made in the USA. We've also added a new OEM-style goose for Ram. **Page 280**

Light-Duty TruTrack™ & Brackets

We've added a new TruTrack™ WD with integrated sway control rated for 5,000 lbs., as well as new support brackets for wide-frame trailers. **Page 319**

Custom-Fit Trailer Hitches

Custom hitches are at the heart of our new product efforts. We offer many first-to-market designs, in-house testing and an industry-leading finish. **Page 32**

3" Ball Mounts

Fully tested and rated to 21,000 lbs., we have added three new ball mounts to fit 3" x 3" receiver tubes – 4", 6" and 8" drop options. **Page 203**

3" Receiver Tube Accessories

For 3" x 3" receiver tubes, we've added a 21K-rated 5/8" hitch pin and a reducer sleeve set that accepts 2" or 2 1/2" shanks. **Pages 227 and 213**

Tow Hook Mounts

We have added two new tow hook mounts – one for 2" receivers and one for 2 1/2". Both have powder-coated, solid steel construction. **Page 210**

Ratcheting Tray-Style Bike Racks

These new bike racks feature highly secure, key-operated, ratcheting arms that lock down onto the bike frames for safe travel and theft protection. **Page 350**

Spectrum™ Brake Control

This proportional brake control offers an integrated OE look, featuring a control knob that mounts in the dash and has ten tri-color LEDs. **Page 238**

Assure™ Brake Control

This proportional brake control features a high-quality 128 x 64 dot matrix OLED display screen and a pressure-sensitive manual override button. **Page 239**

Potted Enclosures

We've added a new potted converter for water and vibration resistance, and we've introduced more custom wiring harnesses with potted enclosures. **Page 254**

RV Harnesses

We've added a line of towed-vehicle RV harnesses for dinghy towing. They connect the vehicle's taillights to the RV and offer a vehicle-specific fit. **Page 252**

24-Volt Converter

This new taillight converter is designed for use with 24V systems primarily found in busses, trucks and cab-and-chassis systems. **Page 255**

Heavy-Duty Connectors

We have introduced three new heavy-duty 7-way RV blades, including a USCAR socket. The sockets feature a weather-resistant cover. **Page 265**

Coiled Adapters

These adapters feature a coiled extension harness for a farther reach without dragging on the ground. They are available in 7-to-4-way and 7-to-5-way. **Page 259**

Custom Wiring

We continue to advance our plug-and-play, custom wiring line with new technology, like potted housings and many first-to-market applications. **Page 32**

Electrical Connector Wiring Guide

THE BASICS OF TOWING A TRAILER

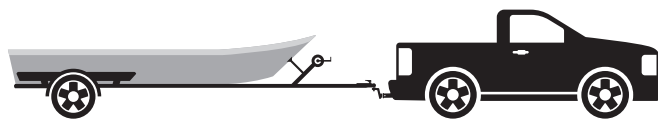

Gross trailer weight (GTW)

The gross trailer weight is the total weight of a trailer and its cargo. For example, GTW = boat + trailer + cooler + fishing gear. It is vitally important to know the GTW to ensure safe towing. It can be measured by putting the fully loaded trailer on a vehicle scale.

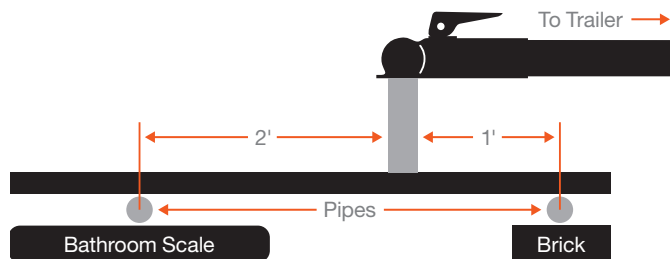

Weight carrying capacity (WC)

The weight carrying capacity is the total weight a trailer hitch is safely rated to tow without the assistance of a weight distribution system. When towing, always use the lowest weight capacity rating of the towing system.

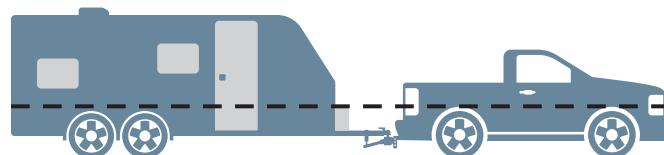

Tongue weight (TW)

Tongue weight is the downward force of the trailer at the coupling point. Proper TW should be about 10% to 15% of the GTW. To measure TW, use a commercial scale or a bathroom scale. In the method shown below, multiply the scale reading by three.

Weight distribution capacity (WD)

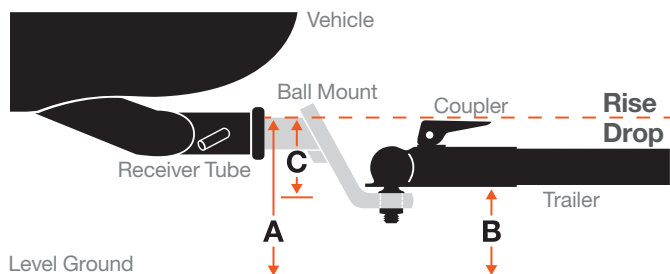

The weight distribution capacity is the maximum amount of weight a trailer hitch can safely tow with a weight distribution hitch installed. A weight distribution hitch distributes a portion of the TW across the vehicle and trailer. See page 317 for WD products.

With weight distribution

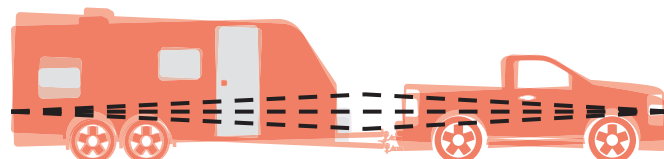

Measuring ball mount drop & rise

When selecting a ball mount, it is important to determine drop / rise for leveling the trailer. Use the diagram below to find this value. B minus A equals C. If C is negative, this indicates the amount of drop needed. If positive, it indicates rise.

Level towing

Using a ball mount with the proper amount of drop or rise will allow for level towing across both trailer and vehicle. Without a level vehicle-trailer combination, the trailer can tend to wander and can even impair the driver's control over the vehicle.

With too much rise or drop

TOWING ELECTRICAL SUBCATEGORY COLOR GUIDE

Towing Electrical

Page 235

CURT has identified seven subcategories within the towing electrical category to make it easier for retail customers to find the correct products. Each sub-category is given a unique color that we apply in our literature and retail packaging for easy visibility.

Brake controls

Page 237

Many trailers are equipped with electric trailer brakes, and to properly use them, a brake control is needed. A brake control regulates the trailer brakes from the dash of the vehicle and serves as an interface for the driver. There are two basic types: inertia-based and time-based. For more information, see page 237.

Custom wiring

Page 246

If your customer's vehicle is not equipped with a factory-installed connector, custom wiring is the ideal solution. Custom wiring (or a 'T-connector') plugs into the vehicle's electrical system, using the taillights or an OEM socket, and provides a trailer wiring connector. See the application guide, starting on page 32.

RV harnesses

Page 252

When dinghy towing a vehicle behind an RV, syncing the taillights is essential. This requires an electrical connection from the vehicle to the RV. CURT RV harnesses plug into the vehicle, using vehicle-specific plugs, and provide a standard 4-way flat to plug into the RV socket. See page 252 for a complete listing.

Electrical converters

Page 254

If a custom wiring harness is not available for a certain vehicle, an electrical converter may be required. A converter is designed to splice into a vehicle's wiring and convert the signals to be compatible with the trailer wiring, providing a standard 4-way flat socket. See page 254 for a complete listing of CURT converters.

Plugs & sockets

Page 261

A plug and socket are the basic components that allow a vehicle wiring system to connect to a trailer. Plugs and sockets can use anywhere from two to seven wires. When preparing to tow, the plug is inserted into the socket and supplies power to the trailer lights and other electronics. See page 261 for our plugs & sockets.

Electrical adapters

Page 256

An adapter allows a connection to be made between a mismatched trailer plug and vehicle socket. For example, a vehicle may be equipped with a 7-way, while the trailer may have a 4-way. An adapter can easily be installed to bridge the connection. For our full selection of adapters, see page 256.

Accessories & testers

Page 268

When installing CURT electrical products, certain electrical components may be required. For splicing, snap locks, wire nuts, terminals and butt connectors provide a reliable connection. When installing a trailer wiring connector or experiencing electrical problems, be sure to test the connection with an electrical tester.

ELECTRICAL WIRING SYSTEMS

Vehicles today use different wiring systems to carry out electrical functions, specifically for taillights, stop or brake lights and turn signals. As vehicles have advanced, these wiring systems have changed. To provide a proper wiring connection for towing a trailer, often times an electrical converter is needed. Below are the common wiring systems used in vehicles today, as well as the types of converters used.

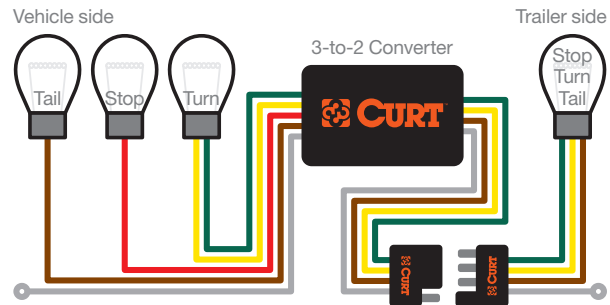

Two-Wire System

The two-wire system is the simplest form of vehicle and trailer wiring and is still used by some vehicles today. This system sends the stop and turn signals along one wire, and the taillight signal along a second wire.

Three-Wire System

The three-wire system is the most common in the automotive industry. It sends the stop, taillight and turn signals along three separate wires. Vehicles with a this system usually require a converter.

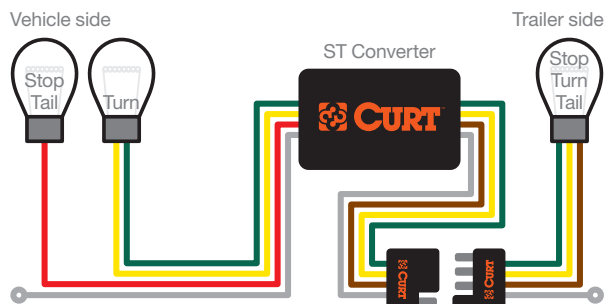

PWM Systems

More and more vehicles today use a PWM (pulse width modulation) system. Sometimes called a 'multiplex', this type of wiring is able to control multiple lighting functions through a single wire by varying the signal intensity. PWM systems can use incandescent or LED lights. There are generally two types: ST systems and STT systems. See the application guide on page 32 for a detailed listing of vehicles with ST and STT systems

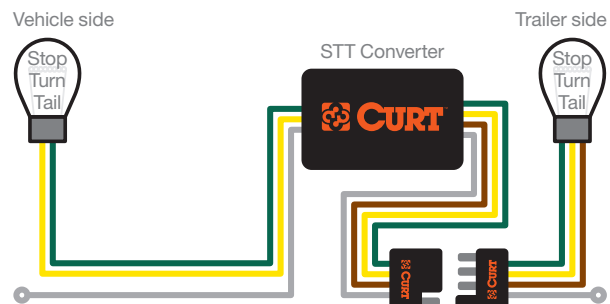

ST system

The ST system (stop / tail) uses a single wire to control the stop and taillight signals. Separate wires are used to control the left and right turn signals.

STT system

The STT system (stop / turn / tail) uses a single wire to control all three lighting functions: the stop or brake lights, turn signals and taillights.

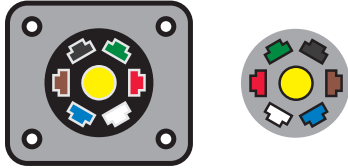

ELECTRICAL CONNECTOR WIRING GUIDE

There are several formats used for connecting trailer wiring, and each offers slightly different electrical functions. 'Socket' refers to the vehicle-side connection, and 'plug' is used to refer to the trailer side. While most plugs and sockets come with standard color-coded wires, the colors illustrated below may not reflect all vehicles and trailers.

TRAILER HITCHES

TESTED. PROVEN. SAFE.

CURT manufactures over 1,000 unique hitch models to provide a custom fit for nearly every vehicle on the road today. We engineer and rigorously test each one to SAE J684 protocols for safety. We protect each hitch, inside and out, with an industry-leading, rust-resistant finish, and we do all of this in the USA. CURT hitches are available in five classes with a range of weight capacities and receiver tube sizes. We also offer front mount, RV and multi-fit hitches for a complete range of towing options.

FEATURED PRODUCTS

Rear mount hitches

CURT is the industry leader in first-to-market hitch designs, and each one is engineered and tested to the highest safety standards.

Multi-fit hitches

Perfect for the retail setting, multi-fit hitches fit a wide range of applications and are available in several different weight capacities.

Front mount hitches

CURT front mount hitches are vehicle-specific and provide a useful receiver for a cargo carrier, snow plow or even for parking a trailer.

APPLICATION GUIDE

TRAILER HITCHES & CUSTOM WIRING

With over 1,000 different custom-fit hitch designs and over 400 custom wiring products, CURT offers applications for almost every vehicle available. The Application Guide makes it easy to locate the correct part for your customer's vehicle, simply using the make, model, style and year. It is ordered alphabetically by make and model. It provides all applicable part numbers for any given vehicle, including the custom hitch and wiring options. It also offers pertinent information about each product and its installation requirements.

With CURT's first-to-market focus, our product line is ever-expanding. To keep you up-to-date on the latest hitch and wiring applications, we offer an online version of our Application Guide that is updated on a regular basis. You and your customers can also use our vehicle lookup tool found at the top of each page of our website.

HOW TO CONFIRM VEHICLE MODEL YEAR

Each VIN (vehicle identification number) is unique and has become standard in all vehicles manufactured since 1981. Of this 17-digit number, the 10th digit represents the model year. Use the table below to find the year that corresponds with each letter or number. **Note:** A VIN will never contain the letters I (i), O (o), Q (q), U (u) or Z (z).

Example VIN tag

ACCESSORIES OVERVIEW

Ball Mounts

The majority of our ball mounts are made in the USA. We use CNC-forming and robotic welding for the utmost accuracy, and each is protected with a durable powder coat finish.

- 1 1/4", 2", 2 1/2" and 3" shank options
- GTW capacities ranging from 2,000 up to 20,000 lbs.
- [See page 197 for ball mounts](#)

Pintles & Lunette Eyes

Pintle hitches are widely used in agriculture, construction and the military. We offer standard pintle hooks and mounts, ball and pintle combinations and receiver-mount pintles.

- GTW capacities up to 60,000 lbs.
- 2" and 2 1/2" shank options available
- [See page 214 for pintle products](#)

Towing Security

CURT carries several styles of hitch locks and coupler locks to fit any receiver tube or coupler latch. We also offer a number of specialty locks, including 5th wheel hitch locks.

- Pins available to fit 1 1/4", 2", 2 1/2" and 3" receivers
- Convenient 1/4-turn lock activation on most models
- [See page 222 for towing security products](#)

Hitch Accessories

Some of the other trailer hitch accessories we offer include front mount accessories, hitch tube covers, fish wire and a finishing pack for trailer hitch and electrical installations.

- Front accessories include winch and skid plates
- Hitch tube covers for 1 1/4", 2", 2 1/2" and 3"
- [See page 230 for hitch accessories](#)

Trailer Balls

We offer trailer balls for any and every job. They are available in three different finish options, including stainless steel, and all are tested to meet U.S. VESC specifications for safety.

- Standard diameters of 1 7/8", 2" 2 5/16" and 3"
- GTW capacities ranging from 2,000 up to 30,000 lbs.
- [See page 218 for trailer balls](#)

Fab Components

CURT fabrication components are the perfect building blocks for a variety of DIY welding project. Most components are made in the USA and come with a raw finish for ready welding.

- Hitch bars ranging from 8" to 24" long
- Receiver tubing available in 1 1/4", 2" and 2 1/2"
- [See page 229 for fabrication components](#)

TOWING ELECTRICAL

EMPOWERING THEIR PASSION

Get your customers plugged in with CURT electrical. New for 2018, we are introducing a complete line of vehicle-specific RV harnesses for dinghy towing. We have also added several new custom wiring harnesses with watertight potted enclosures, two new brake controls and three new heavy-duty 7-way connectors. CURT electrical products are fully supported by our online and in-print product guides, detailed installation instructions and our knowledgeable Product Support team ready to take your call.

FEATURED PRODUCTS

Spectrum™ brake control

The interface of this innovative control is a simple rotary knob, while the main module installs behind the dash, completely out of view.

Assure™ brake control

This new inertia-based control features a high-quality 128 x 64 dot matrix OLED display and a tri-axis accelerometer for smooth stops.

RV towing harnesses

Designed for vehicle-specific application, CURT RV harnesses make towing a vehicle behind an RV simple and safe.

TOWING ELECTRICAL SUBCATEGORY COLOR GUIDE

CURT has identified seven subcategories within the towing electrical category to make it easier for retail customers to find the correct products. Each sub-category is given a unique color that we apply in our literature and retail packaging for easy visibility.

WIRING SYSTEMS

Two-wire system

The two-wire system is the simplest form of vehicle and trailer wiring and is still used by some vehicles today. This system sends the stop and turn signals along one wire, and the taillight signal along a second wire.

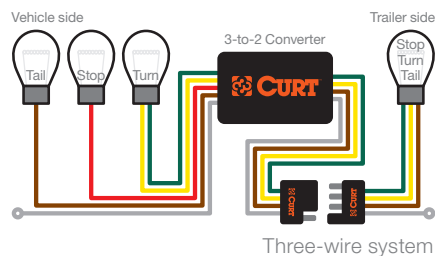

Three-wire system

The three-wire system is the most common in the automotive industry. It sends the stop, taillight and turn signals along three separate wires. Vehicles with a this system usually require a converter.

PWM system

More and more vehicles today use a PWM (pulse width modulation) system. Sometimes called a 'multiplex', this type of wiring is able to control multiple lighting functions through a single wire by varying the signal intensity. PWM systems can use incandescent or LED lights. There are generally two types: ST systems and STT systems.

See page 10 for more details

HOW TO SELECT A BRAKE CONTROL

Spectrum™

Assure™

TriFlex™

Reflex™

Discovery™

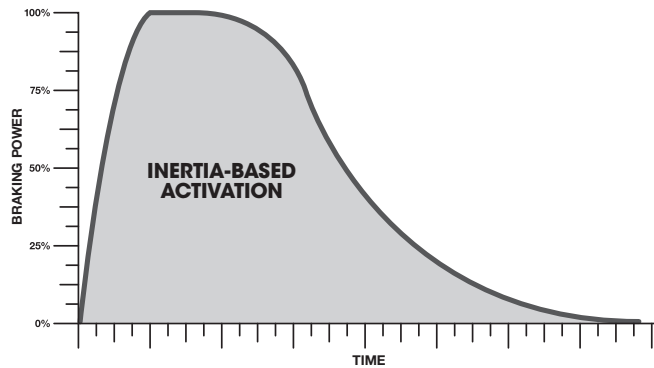

Venturer™

A brake control is a small electronic device that regulates the electric brakes of a trailer from the cab of the tow vehicle and allows the driver to activate and monitor trailer brake activity. There are two basic types of brake controls: inertia-based and time-based. Each type is classified by the method of activation the brake control uses.

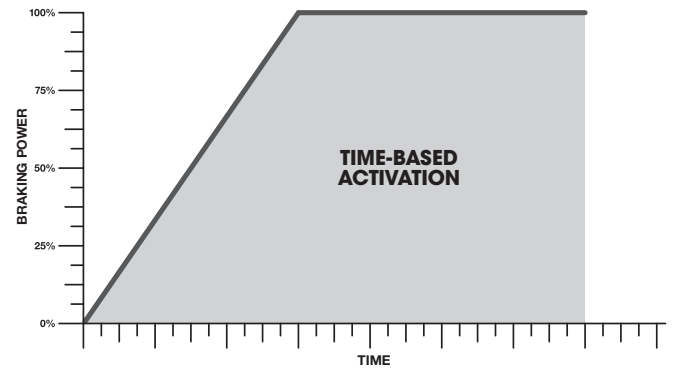

Inertia-based activation

Inertia-based brake controls use accelerometers to measure the change in velocity or inertia of the tow vehicle when braking. The advantage of inertia-based activation is that once calibrated, the control can output the perfect amount of power needed to come to a smooth stop in any towing situation.

Time-based activation

Time-based brake controls apply a steadily increasing amount of brake power, based on the gain setting and sensitivity adjustment specified by the driver. Although they are effective and simple to use, time-based brake controls are generally not as precise as inertia-based brake controls.

There are several factors to consider when selecting a brake control.

Answer the following questions to help determine which brake control is the best fit for your customer.

What are they towing?

Heavy-duty

If your customer is planning to tow heavy or fragile cargo, an inertia-based brake control is ideal. Inertia-based controls perform much smoother stops, resulting in less stress on the cargo and on the vehicle.

Light-duty

If your customer is planning to tow a relatively lightweight trailer, a time-based brake control may be sufficient. CURT's time-based controls are more budget-friendly and perform well with lighter loads.

How often do they tow?

Frequently

If your customer is planning to tow frequently or commercially, an inertia-based brake control is recommended. The precision of this type of control will help protect the life of the vehicle and trailer.

Occasionally

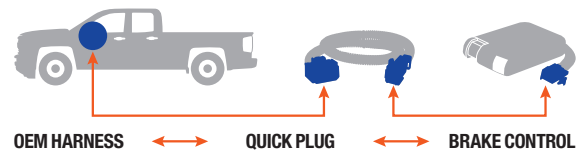

If your customer will only tow a few times a year, they may prefer the simplicity and relatively lower cost of a time-based control. Time-based controls also require very little effort to set up.

Check to ensure battery is charged before towing

- Activates electric trailer brakes in the event of a breakaway
- Meets DOT requirements for holding / breakaway situations
- Compatible with trailers with up to three axles
- LED lights indicate a good charge, battery charging or low battery (#52042, #52044)
- Bolt-on mounting system for secure installation on the trailer
- Required in most states

To find custom wiring for a specific vehicle, turn to the CURT Application Guide on page 32.

Two Types of Custom Wiring Products

Harnesses

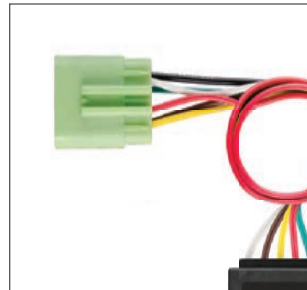

A custom wiring harness (also called a T-connector) is a plug-and-play electrical device that provides a vehicle with a standard trailer wiring output, usually in the form of a 4-way flat. It uses vehicle-specific plugs to 'T' into the vehicle's taillight assembly, eliminating the need for cutting, splicing and soldering when installing vehicle-to-trailer wiring.

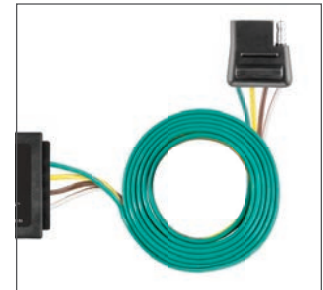

Custom wiring harnesses use multiple plugs to 'T' into the taillight assembly

Connectors

In some cases, while a vehicle may not be equipped with a standard wiring output for towing, it will have an original equipment socket that is specifically intended for hooking up trailer wiring. A CURT custom wiring connector is designed to use this OE socket. Like a custom wiring harness, no cutting, splicing or soldering is required.

Custom wiring connectors use a single plug to plug into a specific OEM socket

Harnesses and connectors both provide a standard trailer wiring connector, typically a 4-way flat

DODGE FACTORY HARNESS ADAPTER

- Adapts Dodge harness applications to fit USCAR replacement plugs (pictured right)
- Simple plug-and-play design eliminates the need for cutting or splicing
- Slit loom keeps wires contained and well protected
- See application guide below for a custom fit

On vehicles with two-wire electrical systems that require a powered converter, the converter's red wire is not used as a stoplight connection and needs to be grounded.

ELECTRICAL CONVERTERS

TAILLIGHT CONVERTERS

For vehicles that are not compatible with CURT custom wiring options, a taillight converter provides a reliable alternative. CURT taillight converters splice into the vehicle's wiring system and convert the signals to be compatible with a trailer's wiring system. Most converters provide a standard output connector, usually in the form of a 4-way flat.

Use the CURT Application Guide, starting on page 32 to find the right wiring solution for your customer.

Advantages of CURT potted enclosures

For increased quality and reliability, select CURT taillight converters feature a potted enclosure. The converter is filled with an epoxy resin that completely seals off the circuit board and gives the converter several advantages.

- Greatly increased protection against impacts and vibrations for longer life
- Impervious to weather and completely sealed off from moisture
- Allows converter to be mounted on the exterior of the vehicle

Application of surface mount technology

Surface mount technology is the most advanced technology for circuit designs, offering a number of benefits over the older through-hole-mount circuit boards. We apply SMT to most of our taillight converters and custom wiring.

- Creates little resistance, reducing heat, limiting voltage drop and extending life
- SMT circuitry efficiency ensures maximum trailer light intensity and life
- Improved mechanical performance under shake and vibration conditions

TAILLIGHT CONVERTERS

Standard converters

- Most constructed with surface mount technology
- No heavy-duty flasher required
- Includes converter, 4-way flat loop, four snap locks and four wire connectors (#55179)

Multi-function converter

- Microcontroller senses current to rapidly react to overload
- Provides improved overload, short-circuit and thermal protection
- Low-voltage operation allows function down to seven volts

NEW

56496

Potted converters

- Potted enclosure significantly increases water and vibration resistance
- Constructed with SMT circuitry for better performance and durability
- Provides improved overvolt, ESD and short-circuit protection

24-VOLT TAILLIGHT CONVERTER

- Primarily used for 24V automotive systems, busses, trucks and cab and chassis wiring
- Equipped with a 24-volt, 3-wire to 2-wire taillight converter
- Designed to operate with both incandescent and LED trailer lighting systems
- 26" color-coded, 16-gauge wires for easy installation and reliable operation
- No heavy-duty flasher or direct battery connection required
- Trailer-side connector not included
- Does not reduce output to 12 volts

GOOSENECK HITCHES

TESTING THE LIMITS

CURT gooseneck hitches are engineered and tested to keep up with your hardworking customers. New for 2018, we have added an OEM-style hitch made specifically for Ford Super Duty trucks. This hitch features a one-person install, a limited lifetime warranty and is made in the USA. We also continue to offer OEM puck system kits for Ford, GM, Nissan and Ram, and our easy-to-install, easy-to-operate Double Lock EZr™. See page 274 for a helpful hitch selection guide.

FEATURED PRODUCTS

OEM puck system kits

Equip your customers to tow gooseneck trailers instantly with an OEM puck system kit, available for Ford, GM, Nissan and Ram.

OEM-style hitches

With a custom-fit design, OEM-style hitches are fast and easy to install on your customer's truck. They are available for Ford and Ram.

Double Lock EZr™

Boasting a one-person, no-measure install and easy operation, the EZr™ is the gooseneck hitch of choice for both you and your customers.

SELECTING A GOOSENECK HITCH

There are three basic methods for installing a gooseneck hitch in your customer's pickup truck:

A Using an OEM puck system, if equipped

B Using brackets and a gooseneck head

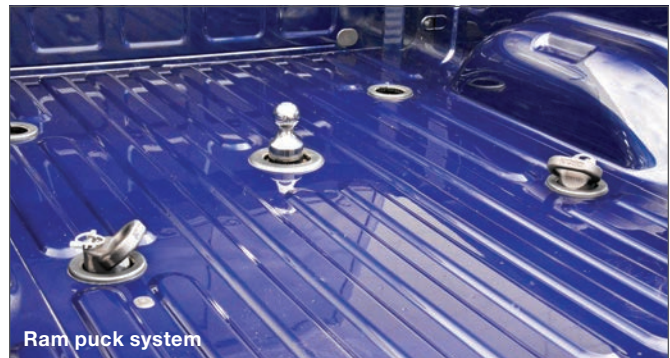

C Using pre-existing 5th wheel base rails

A | INSTALLING WITH AN OEM PUCK SYSTEM

Many pickups today, specifically models from Ford, GM, Nissan and Ram, are factory equipped with a truck bed puck system. A puck system provides attachment points for both gooseneck and 5th wheel towing.

For trucks with a puck system, an OEM puck system gooseneck kit is the easiest way to tow a gooseneck trailer. The components can be installed or removed quickly when necessary.

See page 276 to select one of these kits.

Ram puck system

Quarter-turn anchoring system

Step 1 - Lift and twist latch to release the retention balls

Step 2 - Drop the ball into OEM puck system hole

Step 3 - Return latch to lock the ball in place for towing

Large safety chain openings accept heavy-duty hooks

B | INSTALLING WITH CUSTOM BRACKETS

For trucks without a puck system, the traditional method for installing a gooseneck hitch is vehicle-specific brackets. The brackets bolt onto the frame of the truck to permanently mount the gooseneck hitch.

For the easiest installation available, we recommend our Double Lock EZr™. This hitch is uniquely designed for one-person installation, with no measuring required. It also has a flip-and-store trailer ball to not obstruct the truck bed.

To learn more about the Double Lock EZr™ and its one-person installation, see page 278.

The Double Lock EZr™ is not available for certain Ram and Ford trucks.

Refer to the table on page 280 for our available OEM-style gooseneck hitches.

CURT also offers a variety of other gooseneck hitches, such as our original Double Lock and Quick Goose II, providing coverage for a wide range of vehicles, including many older trucks.

See the rest of our gooseneck line, starting on page 282.

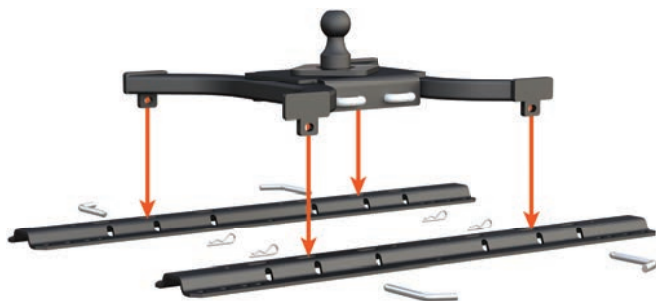

C | INSTALLING WITH EXISTING 5TH WHEEL BASE RAILS

For trucks with 5th wheel rails already installed, CURT offers 5th wheel rail gooseneck hitches. These 5th-wheel-to-gooseneck adapters feature a four-point mounting system to easily drop into any set of industry-standard 5th wheel base rails.

A 5th wheel rail gooseneck hitch provides a ball ready for towing a gooseneck trailer, and the hitch can easily be removed from the base rails whenever necessary to allow for 5th wheel towing.

See page 290 to select a 5th wheel rail gooseneck hitch.

OEM PUCK SYSTEM GOOSENECK KITS

These kits utilize the truck bed puck system built into certain models of Ford, GM, Nissan and Ram pickups. The ball and anchors easily drop into the pucks, lock into place and are immediately ready to couple to a gooseneck trailer.

See page 274 for a helpful gooseneck hitch selection guide.

Each kit includes:

- Gooseneck ball
- Two safety chain anchors
- Rubber hole cover
- Durable storage case

DOUBLE LOCK EZr™ GOOSENECK HITCH SYSTEM

60611

What makes the EZr™ different?

One-person installation

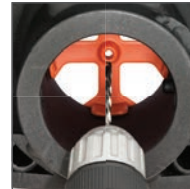

Easy-to-install clips eliminate the need for a second person to hold up the center section

- Retainer clips secure the bolts supporting the center section while attaching the installation kit
- Uses carriage bolts when possible for one-wrench tightening
- No need to lower exhaust on Ford, GM and most Dodge / Ram models
- No need to relocate cable hanger and ground wire on Dodge / Ram models

No measuring required

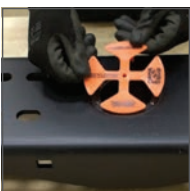

Exclusive Center Locator saves time

Simply drill up from under the bed

- Exclusive Center Locator eliminates the need to measure where the ball hole should be
- Safety chain loop holes are drilled from the underside of the truck bed
- No welding or truck bed removal required
- Center Locator covered by patent# D685,299 S

How is the EZr™ installed without measuring?

Step 1 - Place the Center Locator into the gooseneck hitch ball hole

Step 2 - Bolt the installation brackets and hitch to the vehicle frame

Step 3 - Drill a pilot hole up from under the bed, using the Center Locator

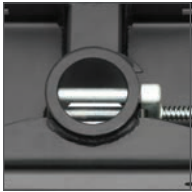

Step 4 - Use the pilot hole to drill down with no measuring required

X5 GOOSENECK TO 5TH WHEEL ADAPTER PLATES

The X5 adapter plate allows a gooseneck hitch to become a mounting platform for a 5th wheel hitch. The X5 shank simply drops into the gooseneck ball hole and instantly provides a set of industry-standard 5th wheel base rails. See the table below for gooseneck hitch compatibility.

For more information about selecting a 5th wheel hitch, see page 294.

Product Details

- Converts a gooseneck hitch into a set of standard 5th wheel base rails
- Simple, secure design allows for fast installation and removal as needed
- For use with CURT and competitive 5th wheels up to 20,000 lbs.
- Capacity limited to lowest-rated towing component
- Accepts any standard CURT 5th wheel legs or roller (excludes OEM puck system)
- Protected by a durable carbide powder coat finish
- Co-cured in a rust-resistant liquid Bonderite® coating
- **Not compatible with OEM-style gooseneck hitches**
- **Not compatible with Sidewinder™ pin boxes**

CUSTOM 5TH WHEEL BRACKETS

See page 302 to select custom brackets

CURT custom brackets are designed to bolt onto the vehicle's frame and provide a set of permanent base rails in the truck bed to mount a 5th wheel hitch. Each set of brackets is designed to fit a specific vehicle application.

- Provides a solid mounting point for 5th wheel base rails and a 5th wheel hitch
- Brackets designed to be used in combination with CURT base rails #16104 or #16204
- Vehicle-specific application reduces or eliminates drilling to cut installation time in half
- Protected by a rust-resistant liquid Bonderite® coating
- Includes mounting hardware

GOOSENECK ELECTRICAL

CUSTOM WIRING HARNESS EXTENSIONS

- Routes a 7-way RV blade socket into truck bed while retaining use of rear socket
- Simple plug-and-play design eliminates the need for cutting or splicing
- Neoprene well nuts isolate steel bolts from aluminum surfaces (#57007)
- See page 250 for more information

Right-angle plug for easy installation

7-WAY RV BLADE EXTENSION

- Routes existing 7-way RV blade socket into full-size pickup truck bed (7' length)
- Universal size fits any 7-way RV blade socket
- Allows for easy connection of 5th wheel or gooseneck wiring
- See page 251 for more information

REPLACEMENT 7-WAY RV BLADE HARNESSES

- Replaces the trailer-end plug of any 7-way harness
- Wires protected by heavy-duty, weather-resistant cable
- Cold-weather harnesses feature soft thermoplastic elastomer casing to remain flexible in cold temperatures (temperature rating from -40°F up to 221°F)
- See page 251 for more information

BRAKE CONTROLS

- Equipped with quick plugs for fast, easy installation
- Easily calibrated for all towing needs

5TH WHEEL HITCHES

TESTED FOR ADVENTURE

CURT 5th wheel towing products offer the superior towing power and stable ride your customers need to Bring It®. New for 2018, we have added a GM puck system roller adapter and several new kitted options for our existing 5th wheel hitches. We have also introduced a new 5th wheel hitch base rail lock. CURT hitches are available in capacities of 16K to 25K and with a range of mounting options. See page 296 for a helpful hitch selection guide.

FEATURED PRODUCTS

A25 5th wheel hitch

The A25 is our best 5th wheel yet, featuring a 25K rating, a patented head design, a self-resetting handle and an easier-than-ever setup.

5th wheel hitch lock

This industry-first lock is specially designed to deter 5th wheel hitch theft, featuring a unique, flush-mount body and extra-long pin.

OEM puck system products

OEM puck system legs and roller products streamline 5th wheel towing and are available for Chevy, Ford, GMC, Nissan and Ram.

5TH WHEEL HITCHES

CURT 5th wheel hitches are designed for versatile application, and each one is compatible with a variety of mounting options. **For a helpful guide in selecting a 5th wheel hitch, see page 296.**

A-SERIES

The A-series is named for its articulating head design. The head is built on a patented cast yoke that offers a stable, quiet ride, even with large 5th wheel trailers. This cast yoke also features torsion springs and poly-torsion inserts to support the head and add even more stability to the connection.

- Lockable, self-resetting handle for fewer steps while coupling
- One-pin head attachment for easy removal and relocation
- High-strength interlocking jaws to add security and reduce noise
- Compatible with Sidewinder™ pin boxes (see page 311)

See page 306 for all A-series features and benefits

Q-SERIES

The Q-series is designed to offer the quietest towing possible. It features a spherical axial bearing that allows the head to tilt in any direction needed to ensure a smooth ride. The head is also equipped with three grease fittings for continuous lubrication and thick rubber stoppers to cushion the head.

- Lockable, short-throw, single-handle operation
- Self-aligning head offers a wide opening for easy coupling
- Dual jaws provide 360° kingpin contact to resist chucking noises

See page 308 for all Q-series features and benefits

E-SERIES

The E-series is designed to be a more economical option for our budget-conscious customers. The E-series operates on a dual-pivoting head that provides 10° of lateral movement for smooth towing. The head also features an anti-rattle skid plate with rubber stoppers to help promote a quiet ride.

- Easy, single-handle operation
- Automatic locking mechanism for simple, secure coupling
- Four height adjustment positions to adapt to each unique truck bed
- Compatible with Sidewinder™ pin boxes (see page 311)

See page 310 for all E-series features and benefits

5TH WHEEL MOUNTING OPTIONS

OEM Puck System Products

Puck system legs and roller products use a simple quarter-turn anchor system to easily and securely drop into the truck bed pucks built into many pickups today.

- Options available for Ford, GM, Nissan and Ram
- Compatible with most CURT 5th wheel hitches
- **See page 298 for long-bed options and 300 for short-bed options**

5th Wheel Rollers

CURT 5th wheel rollers are true rolling units, operating on solid rods and wheels to resist binding. They add 12" of clearance when making tight turns.

- Adds turning clearance for short-bed trucks
- Available in 16K, 20K and 24K capacities
- **See page 301 for full features and benefits**

Custom Under-Bed Brackets

Each designed to fit a specific vehicle application, our custom brackets install in less time and provide a solid mount for our industry-standard base rails.

- Vehicle-specific fit reduces or eliminates drilling
- Protected by a rust-resistant liquid Bonderite® coating
- **See page 302 for application information**

Industry-Standard Base Rails

CURT industry-standard base rails accept any CURT 5th wheel legs or roller, as well as any competitor 5th wheel with industry-standard mounting points.

- Gloss black or carbide black powder coat finish
- Co-cured in a rust-resistant liquid Bonderite® coating
- **See page 302 for application information**

X5 Adapter Plates

X5 adapter plates allow a gooseneck hitch to become a 5th wheel mount. They drop into the gooseneck hole and provide a set of industry-standard base rails.

- Available for EZr™, Double Lock and competitor models
- Compatible with CURT 5th wheels up to 20,000 lbs.
- **See page 305 for full features and benefits**

5th Wheel Accessories

We offer a number of accessories to help improve 5th wheel operation and safety while towing, including 5th wheel wedges and more.

- Lube plates and sound pads for smooth operation
- Safety chain loops and electrical for improved safety
- **See page 311 for all 5th wheel accessories**

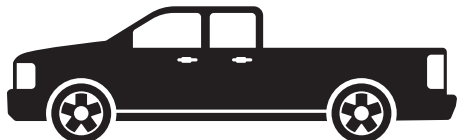

MOUNTING A 5TH WHEEL HITCH

There are several components that make up a 5th wheel hitch, and these components are determined by truck type and customer preferences. Answer the following questions to help choose the right hitch for your customer.

What size is the truck bed?

The length of the truck bed will determine which type of mounting platform the 5th wheel hitch requires: legs or a roller. **Note: A roller may be required for long-bed trucks. Review each configuration before purchase.**

LONG-BED

5th wheel legs are the standard 5th wheel mounting method. A long-bed truck will provide the necessary room for this option.

For long-bed trucks, follow the orange path.

SHORT-BED

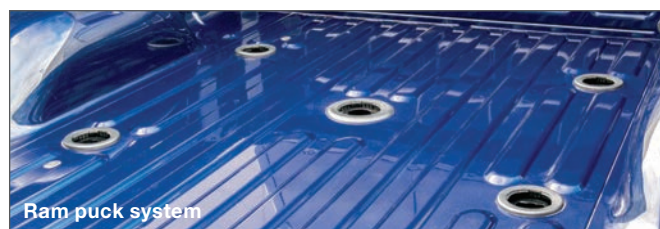

A 5th wheel roller is recommended on short-bed trucks. A roller adds clearance between the cab and the trailer when turning.

For short-bed trucks, follow the blue path.

A | OEM PUCK SYSTEM OPTIONS

Many trucks today, specifically from Ford, GM, Nissan and Ram, come with a built-in mounting platform in the bed called a puck system. A puck system makes installing a CURT 5th wheel hitch very easy.

If the truck does not have a puck system, continue to page 302 for rail system options.

LONG-BED WITH OEM PUCK SYSTEM

If the long bed has a puck system, select a 5th wheel hitch with OEM puck system legs.

See page 298 for our complete kits.

SHORT-BED WITH OEM PUCK SYSTEM

If the short bed has a puck system, select an OEM puck system roller to mount the 5th wheel hitch.

See page 300 for our available roller options.

B | PERMANENT RAIL SYSTEMS

If your customer prefers fixed rails in the truck bed, select a vehicle-specific, under-bed bracket kit and corresponding base rails to mount the 5th wheel hitch.

LONG-BED

1. See page 303 for available bracket applications.
2. See page 302 for corresponding base rails.
3. Select a 5th wheel hitch from the 'Long-Bed Options' starting on page 307.

3. 5th wheel with legs

2. Above-bed base rails

1. Custom under-bed brackets

SHORT-BED

1. See page 303 for available bracket applications.
2. See page 302 for corresponding base rails.
3. Select a 5th wheel hitch from the 'Short-Bed Options' starting on page 307.

3. 5th wheel with roller

2. Above-bed base rails

1. Custom under-bed brackets

C | REMOVABLE RAIL SYSTEMS

If your customer prefers the option of easily removing the base rails for an unobstructed truck bed, select a gooseneck hitch kit and an X5 adapter plate to mount the 5th wheel hitch.

LONG-BED

1. See page 273 for available gooseneck hitches.
2. See page 305 for a corresponding X5 adapter.
3. Select a 5th wheel hitch from the 'Long-Bed Options' starting on page 307.

3. 5th wheel with legs

2. Above-bed X5 adapter

1. Under-bed gooseneck hitch kit

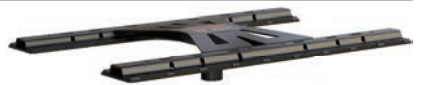

SHORT-BED

1. See page 273 for available gooseneck hitches.
2. See page 305 for a corresponding X5 adapter.
3. Select a 5th wheel hitch from the 'Short-Bed Options' starting on page 307.

PUCK SYSTEMS FOR **LONG-BED**

OEM PUCK SYSTEM 5TH WHEEL HITCH KITS

5th wheel kits are available for Ford, GM, Nissan Titan XD and Ram trucks with the OEM puck system. These kits come with puck system legs and are designed to fit long-bed trucks. For short-bed trucks with the puck system, a 5th wheel roller will be needed.

See page 300 for our OEM puck system 5th wheel roller products.

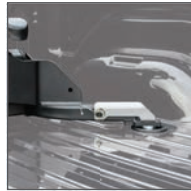

How OEM puck system legs work

Step 1 - Drop legs into the truck bed puck system

Step 2 - Close the anchor levers to lock legs into place

Step 3 - Secure levers with attached safety pins

- Quarter-turn anchors allow for quick installation and removal
- Anchors can be adjusted to eliminate chocking between the roller and under-bed platform
- Tested for safety in accordance with SAE J2638
- Protected by a durable carbide powder coat finish
- Capacity limited to lowest-rated towing component

5TH WHEEL ROLLERS ONLY

For short-bed trucks, a 5th wheel roller is used in place of 5th wheel legs to provide the extra clearance needed to make tight turns. A roller allows the hitch to slide backward several inches, allowing the truck and trailer to turn safely.

See our complete roller kits under the 'Short-Bed Options' table, starting on page 307.

Product Details

- Constructed with solid, non-binding rods that lock the hitch into position
- Designed to be a true rolling unit, not just a slider
- Provides 12" of travel
- Uses wheels to bear the weight
- Protected by a highly durable carbide powder coat finish

PERMANENT RAIL SYSTEMS

CUSTOM UNDER-BED BRACKETS & INDUSTRY-STANDARD BASE RAILS

Custom brackets provide a set of permanent 5th wheel base rails in the truck bed. If your customer prefers removable rails for no obstructions in the truck bed, [see page 305 for our gooseneck adapter options.](#)

Custom brackets

- Designed to be used in combination with CURT base rails #16104 or #16204
- Vehicle-specific application reduces or eliminates drilling to cut installation time in half
- Protected by a rust-resistant liquid Bonderite® coating
- Includes mounting hardware

16400 brackets shown with 16204 base rails

Semi-custom brackets

- Designed to be used in combination with CURT universal brackets and base rails #16100 or #16200
- All semi-custom brackets require drilling to be installed

Step 1 - Pick vehicle-specific brackets starting on page 303

Step 2 - Select the base rails by finish preference

Step 3 - Start on page 294 to select a 5th wheel hitch

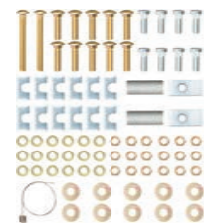

UNIVERSAL UNDER-BED BRACKETS & INDUSTRY-STANDARD BASE RAILS

- Intended for vehicle applications not covered by CURT custom brackets
- Compatible with CURT and most competitive 5th wheel hitches, rollers and gooseneck adapters
- All universal brackets require drilling to be installed

X5 GOOSENECK TO 5TH WHEEL ADAPTER PLATES

The X5 adapter plate allows a gooseneck hitch to become a mounting platform for a 5th wheel hitch. The X5 shank simply drops into the gooseneck ball hole and instantly provides a set of industry-standard 5th wheel base rails.

See the table below for gooseneck hitch compatibility.

Product Details

- Converts a gooseneck hitch into a set of standard 5th wheel base rails
- Simple, secure design allows for fast installation and removal as needed
- For use with CURT and competitive 5th wheels up to 20,000 lbs.
- Capacity limited to lowest-rated towing component
- Accepts any standard CURT 5th wheel legs or roller (excludes OEM puck system)
- Protected by a durable carbide powder coat finish
- Co-cured in a rust-resistant liquid Bonderite® coating
- **Not compatible with OEM-style gooseneck hitches**
- **Not compatible with Sidewinder™ pin boxes**
(Trademark of Cequent Consumer Products™)

Step 1 - Pick a gooseneck hitch. If your customer has a gooseneck hitch, see step 2

Step 2 - Select the corresponding X5 adapter plate to match the gooseneck

Step 3 - See page 294 for our 5th wheel hitch selection guide

5TH WHEEL WEDGES

A rotating 5th wheel pin box creates an alternative pivot point for the 5th wheel connection, providing the 5th wheel trailer with a wider turn radius. However, because of this secondary pivot point, the original pivot point must be fixed to keep the trailer from wandering. A 5th wheel wedge bolts onto the pin box, locks up the kingpin and keeps it from swiveling.

- Allows CURT A25, A20, A16 or E16 to be used with Sidewinder™ pin boxes (Trademark of Cequent Consumer Products™)
- Prevents unsafe lateral movement between 5th wheel hitch and rotating pin box
- Securely bolts onto the pin box, behind the kingpin
- Protected by a durable carbide powder coat finish

WEIGHT DISTRIBUTION

A PROVEN LINK TO THEIR LIFESTYLE

Towing equipment should never be the limiting factor for your customers. That is why CURT has developed a robust line of weight distribution hitches, offering the perfect fit for any application. Our WD line is spearheaded by our TruTrack™ system with integrated sway control. New for 2018, we have added a new 8K TruTrack™. We also offer our standard trunnion bar and round bar WD hitches in a variety of capacities, and replacement shanks to fit any towing setup or budget.

FEATURED PRODUCTS

TruTrack™

With integrated sway control and weight distribution, TruTrack™ offers smooth, safe towing and is now available in 8K, 10K and 15K options.

TruTrack™ 8" & 10" brackets

Replacement support brackets for the TruTrack™ weight distribution hitch are now available to fit 8" and 10" trailer frames.

MV round bar

This round bar WD hitch features grease zerk fittings built into the head to provide continuous lubrication and a quiet ride.

WEIGHT DISTRIBUTION HITCH FEATURES

CURT weight distribution hitches are designed to distribute the tongue weight of a trailer across all axles of the vehicle-trailer combination, allowing for more control and safer towing. Our TruTrack™ weight distribution system is one of the most advanced weight distribution hitches in the industry. It combines precise weight distribution with integrated sway control to deliver the smoothest, safest ride possible.

- Heavy-duty head and forged steel spring bars
- 2" adjustable shank with 2 1/2" replacement option
- Protected by a durable black powder coat finish
- Kits include a pre-torqued 2 5/16" trailer ball and sway control unit

TRUTRACK™ WEIGHT DISTRIBUTION SYSTEMS

The CURT TruTrack™ weight distribution system is one of the most advanced weight distribution hitches in the industry. It combines precise weight distribution with integrated sway control to deliver the smoothest, safest ride possible. By integrating both features, the TruTrack™ eliminates the need to purchase a separate sway control unit.

Features & Benefits

- Actively controls trailer sway and levels both the vehicle and trailer
- Uses spring & cam system with hardened components, instead of metal friction
- Adjustable brackets provide fixed support unlike spring bar chain models
- Weight capacities available up to 15,000 lbs.
- 12" adjustable shank fits 2" receiver tube openings
- 2 1/2" replacement shank available (see page 324)
- Highly durable carbide powder coat finish
- Informative, full-color retail packaging
- Ten-year limited warranty

True integrated sway control

The spring & cam system and fixed support brackets offer true four-point sway control and weight distribution.

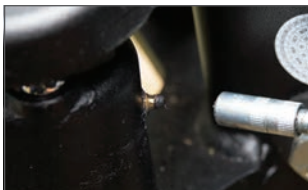

Long-lasting construction

The hardened spring & cam components and cast head are less subject to wear than competitor models.

Quiet operation

Each TruTrack™ hitch is equipped with grease zerk fittings for continuous lubrication and a quiet ride.

Easy, versatile setup

The TruTrack™ has two neutral bar settings and adjustable castle nuts to accommodate different trailer sizes.

TRAILER PARTS & ACCESSORIES

WHERE SAFETY MEETS FREEDOM

From tongue to back, CURT has everything your customers need to keep their trailer towing in optimal condition. We offer jacks, safety chains and couplers in a variety of styles and capacities to accommodate virtually any type of trailer – everything from utility haulers and popup campers to horse trailers and 5th wheel RVs. We also offer a number of accessories to fully equip your customers for the road ahead, including hand winches, wheel bearings, snap hooks and wheel chocks.

FEATURED PRODUCTS

Channel-mount couplers

Mounted on a CURT channel, channel-mount couplers make it easy to adjust the tongue height of a trailer and level the load.

Marine jacks

Ideal for boat trailers and other watercraft haulers, marine jacks are water-resistant and have a wheel for convenient mobility.

Safety cables

Safety cables feature the strength of our safety chains with the added convenience of a coiled design to avoid dragging on the ground.

CUSTOM SAFETY CHAIN

Safety chains are required by law and should be crossed under the tongue of the trailer so that the tongue will not drop to the road if it becomes separated from the hitch. Always leave enough slack so the vehicle can safely turn. Never allow the safety chains to drag on the ground and never attach the chains to the bumper.

Proper safety chain routing crosses under the coupler

How to order custom safety chain:

- Step 1 - Determine the gross weight of the trailer
Example: 7,000 lbs. GTW
- Step 2 - Select chain required
Example: #82120 zinc-plated (7,800 lbs.)
Note: By law each individual chain must meet or exceed the GTW
- Step 3 - Determine the required length of chain
Note: The chains must be long enough to cross one over the other under the coupling point (see illustration to the left)
- Step 4 - Select hook(s) according to capacity and design
Example: #81900 clevis hook (7,800 lbs.)
- Step 5 - Contact your CURT sales rep for a quote

Federal law requires safety chains to be secured while towing.
Each individual chain or cable must meet or exceed the trailer weight.

SAFETY CHAIN WITH S-HOOKS

WHEEL CHOCK SET

- Perfect for chocking wheels on a parked trailer or adding safety during vehicle maintenance
- Raised tread offers a better grip on the wheel
- Saw-tooth edges on the base provide solid traction on the ground
- Always to be used with vehicle brake
- Not for commercial use

Part#	Description
22800	For use with wheels up to 17" wide

CARGO STRAPS

- Perfect for securing cargo in trailers, truck beds and more
- Offers a superior tie-down method compared to bungee cords and rope
- Cambuckle mechanism allows for direct tension on lighter loads
- Ratchet mechanism allows for greater tension on heavy loads
- Straps constructed from high-strength, woven nylon
- Cinching components protected by a durable yellow zinc-plated finish

Secures cargo better than bungee cords or rope

FULLY SUPPORTING YOUR BUSINESS

We believe in providing our customers with the highest quality products and fully supporting the sale of those products in-store and online. For in-store sales, we offer signage, display stands and literature to draw in more traffic and help your customers make an informed buying decision. We also have a large selection of planogram options. For online sales, we offer extensive image, video and content libraries available for your use. To use these resources on your website, please talk to your sales rep.

FEATURED PRODUCTS

Literature

Like our catalog, CURT literature is attractive and informative, giving your customers key information about each product line.

Banners

Promotional banners target your customers' lifestyle and draw traffic to your store with bold graphics and clear messaging.

Display stands

Displays are available for several products, including hitches, bike racks and accessories. Many are also free with certain purchases.

PLANOGRAMS

Custom planograms

CURT offers custom planogram services tailored to your needs. Contact your CURT sales representative to discuss the questions listed below. Together we will create a unique planogram to perfectly complement the layout of your store. We will help you answer the following questions:

- Which categories or products should I display?
- Which display fixtures should I use?
- How many shelves are included?
- How much area will the planogram cover?
(Example: 48" wide by 72" tall)

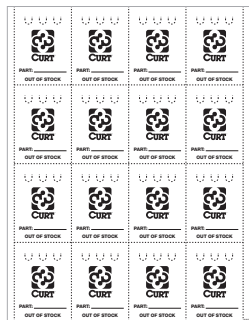

Pre-designed planograms

CURT also offers pre-designed planograms to fit various retail needs. Layouts and pricing are available upon request. Please contact your sales representative.

TESTED. PROVEN. SAFE.

CURT products are thoroughly tested and proven safe to give your customers confidence for the road ahead. That is why we continue to manufacture all of our custom hitches in the USA and why we maintain dedicated engineering teams in Eau Claire, WI, Brandon, SD and Perry, FL, as well as a testing and engineering facility in Detroit, MI.

Our goal isn't just to produce a stronger hitch or a more dependable wiring harness. We want to give our consumers the means to enjoy their lifestyle. We want to give hardworking contractors a solid foundation to grow their business, dedicated sportsmen a shot at that next big adventure and ordinary families an unforgettable vacation.

Whether they're towing 30,000 pounds of industrial equipment or packing up their cargo carrier for a weekend getaway, CURT offers your customers the freedom to pursue their passion and the peace of mind to enjoy every mile of it.
