

YEARS: 2015

MAKE: HYUNDAI

MODEL: SONATA (INCLUDING BLUE DRIVE)

STYLE: SEDAN

WARNING: NEVER EXCEED YOUR VEHICLE MANUFACTURER'S RECOMMENDED TOWING CAPACITY

WEIGHT CARRYING:
 TRAILER WEIGHT: 2,000 LBS.
 TONGUE WEIGHT: 200 LBS.

PRO INSTALL TIME: 30 MIN.
NOVICE INSTALL TIME: 60 MIN.

IF YOU ARE HESITANT TO UNDERTAKE THIS TASK ON YOUR OWN, CONTACT AN AUTHORIZED CURT INSTALLER FOR ADDITIONAL ASSISTANCE.

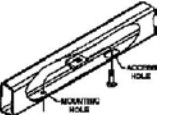

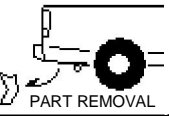

INSTALLATION REQUIRES:

 RATCHET	 10 mm 3/4 in SOCKET	 SPRAY LUBRICANT
 PRY BAR	 TORQUE WRENCH	 SAFETY GLASSES
 DIE GRINDER		

INSTALLATION TIPS:

- BEFORE YOU BEGIN INSTALLATION, READ ALL INSTRUCTIONS THOROUGHLY.
- TO EASE INSTALLATION, 2 PEOPLE MAY BE REQUIRED.
- USING PROPER TOOLS WILL GREATLY IMPROVE THE QUALITY OF THE INSTALL AND REDUCE THE TIME REQUIRED.

LEVEL OF DIFFICULTY: EASY

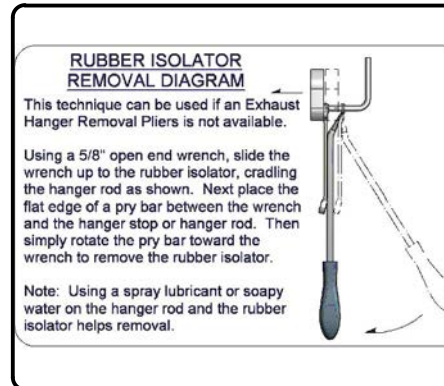

EASY	MODERATE	CHALLENGING
	- REMOVE RUBBER EXHAUST HANGERS	
	- FISHWIRE HARDWARE	
	- REMOVE HEAT SHIELD(S)	
	- MAY REQUIRE HOLE ENLARGEMENT	
	- TRIM UNDERBODY PANEL (IF PRESENT)	

INSTALLATION WALKTHROUGH:

1. Remove rubber exhaust hangers and temporarily lower exhaust.
(See RUBBER ISOLATOR REMOVAL DIAGRAM below)
Note: Be sure to support exhaust to prevent damage.

2. Temporarily remove heat shield(s) by removing (3) fasteners with a 10mm socket and remove plastic underbody panel (if present) by removing (4) plastics fasteners and (2) fasteners with a 10mm socket.

INSTALLATION WALKTHROUGH:

3. Remove (2) pads from each frame rail and discard. These pads cover holes which will be used to mount hitch. You will have to enlarge the forward-most hole to allow 1/2" bolts and spacers to pass through.

4. Fishwire 1/2" bolts and spacers into position through enlarged hole and out rear holes. Reverse fishwire 1/2" bolts and spacers into enlarged holes. (Both sides)

5. Raise hitch into position and attach to frame using 1/2" flange nuts.

NOTE: Be careful not to push hardware into frame when raising hitch into position.

6. Torque all 1/2" hardware to 110 ft-lbs. Reinstall heat shield(s) and leave rear most fastener off. Raise exhaust back into position. If underbody panel was present, trim and reinstall. (See TRIM DIAGRAM)

Installation complete.

TOWING SAFETY INFORMATION

Gross Trailer Weight / GTW

The Gross Trailer Weight is the weight of the trailer & cargo. Measure this by putting the fully loaded trailer on a vehicle scale.

Tongue Weight / TW

The downward force that is exerted on the hitch ball by the coupler. The tongue weight will vary depending on where the load is positioned in relationship to the trailer axle(s). To measure the tongue weight, use either a commercial scale or a bathroom scale with the coupler at towing height. When using a bathroom scale with heavier tongue weights, use the method shown and multiply the scale reading by 3.

Weight Carrying / WC

The total weight of both the trailer and the cargo inside. Never exceed the weight capacity of your trailer hitch.

Weight Distribution / WD

Used to balance the weight of the cargo between the front and rear wheels throughout the trailer, allowing for better steering, braking, and level riding.

Sway Control

A device used to reduce the lateral movements of the trailer that are caused by the wind. This works in conjunction with a weight distribution hitch. Do not use this on a class 1 or 2 hitch, or with surge brakes.

How Much Can You Safely Tow?

TONGUE WEIGHT (lb.)	1000	2000	3000	4000	5000	6000	7000	8000	10,000	12,000

5th Wheel											

Refer to owner's manual for towing capabilities and limitations.

Ball Mount

The ball mount is placed inside the opening of the receiver hitch which is mounted to the vehicle. Make sure a hitch pin and clip is properly securing the ball mount to the receiver hitch before you begin towing.

- A: Rise. B: Drop. C: Hole Size. D: Length.

Trailer Ball

The connection from the hitch to the trailer. There are many factors that determine the correct hitch ball:

- Number one is the hitch ball's gross trailer weight rating.
- The mounting platform must be at least 3/8" thick.
- The hole diameter must not be more than 1/16" larger than the threaded shank.
- Every time you tow, check the nut and lock washer to make sure they are fastened securely.
- A: Ball Dia. B: Shank Length. C: Shank Dia. D: Shank Rise.

Coupler

The component that is placed over the trailer ball to connect the vehicle to the trailer. Be sure that the coupler size matches the size of the hitch ball and that the coupler handle is securely fastened. To determine what size hitch ball you need for your application you will need to know the size of coupler that is on the trailer. Be sure your coupler is properly adjusted to the ball you are using.

NOTE: For added security the use of safety devices such as Coupler Safety Pins and Locks is strongly recommended.

Safety Chains

Safety chains are a requirement and should be crossed under the tongue of the trailer so that the tongue will not drop to the road if it becomes separated from the hitch. Always leave enough slack so you can turn. Never allow the safety chains to drag on the ground and never attach the chains to the bumper.

Trailer Classification: Safety Chain Breaking Force - Minimum

Class 1: 2,000 lbs. (8.9 kN)

Class 2: 3,500 lbs. (15.6 kN)

Class 3: 5,000 lbs. (22.2 kN)

The strength rating of each length of safety chain or its equivalent and its attachments shall be equal to or exceed in minimum breaking force the GVWR (Gross Vehicle Weight Rating) of the trailer.

Electrical

Trailer lights, Electric Brakes, Break-away systems - Every time you tow, be sure to check that all components are working properly.

Wiring identification by color:

CURT DISCLAIMER: WIRING COLOR SHOWN WORK IN CONJUNCTION WITH CURT MANUFACTURING PRODUCTS.

HYUNDAI SONATA (INCLUDING BLUE DRIVE)

GROSS LOAD CAPACITY WHEN USED AS A WEIGHT CARRYING HITCH: 2,000 LBS. TRAILER WEIGHT & 200 LBS. TONGUE WEIGHT.

DO NOT EXCEED VEHICLE MANUFACTURER'S RECOMMENDED TOWING CAPACITY.

WARNING: ALL NON-TRAILER LOADS APPLIED TO THIS PRODUCT MUST BE SUPPORTED BY 18050 STABILIZING STRAPS.

** FAILURE TO PROPERLY SUPPORT NON-TRAILER LOADS WILL VOID PRODUCT WARRANTY**

Parts List			
ITEM	QTY	PART NUMBER	DESCRIPTION
1	4	1/2-13 x 1 1/4	CARRIAGE BOLT
2	4	CM-SP6	.250 x 1.00 x 3.00" SQUARE HOLE SPACER
3	4	HFN 1213	HEX FLANGE NUT
4	2	1_2 x 30 FISHWIRE	1/2" x 30" FISHWIRE

TOOLS REQUIRED
RATCHET
10 mm SOCKET
3/4 in SOCKET
PRY BAR
TORQUE WRENCH

EURO MOUNT OPTION AVAILABLE
#45571 (1-7/8" BALL) #45572 (2" BALL)

DESIGNED FOR USE WITH BALLMOUNT 45521

HITCH WEIGHT: 34 LBS.

INSTALL TIME

PROFESSIONAL: 30 MINUTES

NOVICE (DIY): 60 MINUTES

INSTALL NOTES:

- MAY REQUIRE HOLE ENLARGEMENT
- FISHWIRE HARDWARE
- LOWER EXHAUST
- REMOVE HEAT SHIELD

INSTALLATION STEPS

1. Remove rubber exhaust hangers and temporarily lower exhaust. (See RUBBER ISOLATOR REMOVAL DIAGRAM)
Note: Be sure to support exhaust to prevent damage.
2. Temporarily remove heat shield(s) by removing (4) fasteners with a 10mm socket and remove plastic underbody panel (if present) by removing (4) plastic fasteners and (2) hex nuts with a 10mm socket.
3. Remove (2) pads from each frame rail and discard. These pads cover holes which will be used to mount hitch. You will have to enlarge the forward-most hole to allow 1/2" bolts and spacers to pass through.
4. Fishwire 1/2" bolts and spacers into position through enlarges hole and out rear holes. Reverse fishwire 1/2" bolts and spacers into enlarged holes. (Both sides) (See FISHWIRE TECHNIQUE DIAGRAMS)
5. Raise hitch into position and attach to frame using 1/2" flange nuts.
6. Torque all 1/2" hardware to 110 ft-lbs. Reinstall heat shield(s) and leave rear most fastener off, may have to slot front hole in heat shield. Raise exhaust back into position. If underbody panel was present, trim and reinstall. (See TRIM DIAGRAM)

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.
