4	2	7/16-14 x 1.63 x 2.50 C-C	SQ. U-BOLT

HITCH WEIGHT: 10 LBS.

INSTALL TIME

PROFESSIONAL: 60 MINUTES

NOVICE (DIY): 120 MINUTES

INSTALL NOTES:

- REMOVE SPARE TIRE
- DRILLING REQUIRED
- TRIM BUMPER COVER
- SILICONE HARDWARE

INSTALLATION STEPS

1. Remove spare tire from tire well. Locate vehicle centerline and mark bumper. Cut away the bottom edge of the flexible bumper cover to allow hitch bumper bracket to fit directly against steel bumper. 10 mm fascia screws may have to be removed.
2. Position the hitch on steel bumper and tire well so hitch is centered and level. Using hitch as template, mark and drill bumper (4) places for 7/16" fasteners.
3. Install (2) U-bolts inside the bumper. Mount hitch to the bumper being careful not to push u-bolts back into the bumper. Install hex flange nuts.
4. Drill tire well for 3/8" bolts through bracket of hitch. Fasten hitch using bolts and fender washers opposite the hitch.
5. Torque all 3/8" fasteners to 30 lb-ft and all 7/16" fasteners to 50 lb-ft.
DO NOT USE IMPACT WRENCH ON U-BOLTS.
6. Apply silicone sealant around fasteners in spare tire well to seal out water and exhaust fumes.
7. Reinstall spare tire removed in step 1.

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.
