INSTALLED HITCH POSITION

FASCIA TRIM DIAGRAM

INSTALLATION STEPS

1. Mark and trim fascia according to FASCIA TRIM DIAGRAM, **if desired**. Installed hitch will push up on fascia slightly if trimming is not performed.
2. Remove four (4) existing bumper nuts (two per side) from the bottom bumper attachment studs. Save nuts for use in Step 5.
3. If present, remove factory tow hooks and return to owner.
4. Raise hitch into position over existing studs from Step 2.
5. Secure hitch with nuts removed in Step 2.
6. Insert two (2) 1/2-13 carriage bolts through each bolt plate and place bolt plates with carriage bolts over frame rails.
7. Place tube spacers between bolt plates and hitch, as shown.
8. Insert carriage bolts through hitch mounting plates.
9. Secure carriage bolts with 1/2-13 hex flange nuts.
10. Torque 1/2 in. hardware to 75 lb-ft and factory hardware to 35 lb-ft.

*****DO NOT EXCEED VEHICLE MANUFACTURER'S RECOMMENDED TOWING CAPACITY ***.**

FRONT MOUNTED ACCESSORIES

1) Do not exceed front axle Gross Weight Rating (GAWR). Consult owners manual or specification plate located on driver's door frame. Measure gross front axle weight by placing front wheels of loaded vehicle on a scale.

WARNING: Exceeding GAWR may overload the front axle and/or suspension. This could result in **accident, property damage and personal injury.**

- 2) Reposition front mounted license plate if obstructed.
- 3) Do not obstruct vehicle lights.
- 4) Allow free air flow into grille opening.
- 5) Rear wheel traction may be reduced. This could effect handling. Reduce speed and drive with caution.
- 6) Accessories extend front of vehicle. This may reduce approach angle. Use caution when parking and maneuvering.
- 7) Do not obstruct driver view.

VEHICLE RECOVERY AND WINCHING TIPS

1) Use OEM tow hooks, recovery eyes or a clevis mount for attachment of a tow strap or winch cable.

WARNING: NEVER use a ball and/or ball mount as an anchor point for tow strap or winch cable. Severe personal injury or death could result.

- 2) Observe winch manufacturer's recommendations, cautions and warnings.
- 3) Attach return cable to tow hook or recovery eye when using a snatch block (See figure 1).

CAUTION: Do not attach return cable to winch mount. This may overload winch mount and/or front mounted receiver.

RATING

- For **Maximum** line pull rating, winch cable must not exceed:
- 15 degree angle up or down from horizontal (See Figure 2).
 - 45 degree angle left or right from straight ahead (See Figure 3).

CAUTION: Exceeding the maximum line pull rating may over load winch, winch mount, and/or front mounted receiver.
