**FUEL INJECTORS**

---

**Durable. Fuel Efficiencies. Performance.**  
**Delphi Fuel Injectors.**  
**Innovation for the Real World.**

---

**PRODUCT HIGHLIGHTS**

- Comprehensive coverage includes throttle body, central port and multi-port fuel injectors. Injectors are also sold individually – not in sets – to allow for greater variety of selling options.
- Improved fuel economy and minimal fuel leakage during vehicle idle due to extremely low drip tip.
- Accurate metering even during extreme temperature and condition (-40°F to 230°F). Tailored to deliver pressurized, atomized fuel to each cylinder in precise proportions required.
- Optimal performance due to extra fuel filtering protection to eliminate contaminants.
- Reduced noise when engine is running.
- Wide range of domestic applications due to compatibility with different ethanol and alcohol fuel blends.

---

**FEATURES**

<table>
<thead>
<tr>
<th>FEATURES</th>
<th>BENEFITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multec Two injectors inject fuel with smaller droplet size</td>
<td>Improved engine output and fuel economy due to vaporizing fuel more efficiently and optimizing combustion</td>
</tr>
<tr>
<td>Six-hold orifice on multi-port fuel injector and throttle body injector</td>
<td>Fast engine starts with controlled metering</td>
</tr>
<tr>
<td>Reduced spray variation, accurate fuel spray pattern</td>
<td>Better emissions and cold start capabilities</td>
</tr>
<tr>
<td>No internal seal rings</td>
<td>Minimized leakage</td>
</tr>
<tr>
<td>Recessed fuel exit</td>
<td>Minimized possible plugging</td>
</tr>
<tr>
<td>Thermally isolates fuel from engine</td>
<td>Eliminates engine hesitation due to vapor lock by drawing manifold heat away from the fuel rail</td>
</tr>
</tbody>
</table>

**WHY DELPHI**

- Delphi injectors are original equipment tested and calibrated in real world applications for exact fit and finish.
- Delphi injectors are durability tested to 150,000 miles.
- Delphi provides mounting clips with almost every injector.
- Delphi has built its fuel injectors to stringent OE requirements to meet federal emissions and fuel economy standards.
- Delphi was the first to use stamped director plates for spray and flow control, and the first to develop durable injectors for ethanol.
- Delphi stamped director plates resist deposit build up longer.
- Delphi’s Multec 3.5 E85 flex fuel injector can run on fuel mixture of 100 percent gasoline or fuel blends of up to 85% ethanol.
- Delphi also provides fuel injectors for motorcycles, scooters, all terrain vehicles, lawn equipment and gasoline powered generators.

---

**DID YOU KNOW?**

- Marine fuel injectors provide a higher flow and output than passenger vehicles to accommodate the larger engine displacement.
- Using performance injectors at higher than recommended supply pressures can result in reduced performance.
