

Cabin Air Filter

Removal & Installation Instructions

To maintain air conditioning efficiency, replace the air filter according to the manufacturer's maintenance schedule.

Always use an air filter. Removing the filter may decrease system performance by allowing dust to lower the efficiency of A/C and heating system components.

Prior to the installation of this DENSO First Time Fit® Cabin Air Filter, you must read these instructions completely.

Definition of Terms

- △WARNING:** Describes precautions that should be observed in order to prevent injury or death to the user during installation.
- △CAUTION:** Describes precautions that should be observed in order to prevent damage to the vehicle or its components, which may occur during installation if sufficient care is not taken.
- NOTE:** Provides additional information that facilitates installation work.

General Service Information and Requirements

△WARNING: To prevent the Supplemental Restraint System (SRS, Air Bag System) from operating, remove the ground (negative) cable from the battery, then wait at least 90 seconds before starting this procedure. This allows the backup power system to discharge.

NOTE: For more detailed instructions please refer to the vehicle manufacturer's service manual.

REQUIRED TOOLS:

- Safety Goggles
- Assorted Hand Tools

SAFETY PRECAUTIONS:

- Always wear safety goggles

Cabin Air Filter Removal

The information below explains necessary procedures and tools to remove and install the Cabin Air Filter (CAF).

1. Open the hood.
2. The CAF access cover is located on the passenger side of the vehicle, behind the battery.
3. Remove the two screws from the top of the cowl cover.

NOTE: The screws are not always present.

Fig. 1

4. Remove the passenger side cowl cover by carefully lifting straight up to release the four spring clips.

NOTE: In some cases, the cowl is secured with screws.

5. Remove and discard the CAF.

NOTE: The filter should lift straight up and out.

Cabin Air Filter Installation

6. Insert the new CAF.
7. Reinstall the passenger side cowl cover to the original position.
8. Reconnect the two screws from the top of the cowl cover.

NOTE: If applicable.

Fig. 3

Noise Test

9. Reconnect the battery ground cable.
10. Engine ON, A/C ON, blower speed on high.
11. Listen for any abnormal air noises from the air filter area.
