The above displacement chart is for reference only; displacement limitations may vary from model to model.

Displacement guidelines are **NOT** applicable for converted (modified) motorcycles, chain conversions from Original Equipment Manufacturer's specifications, or racing motorcycles.

If your stock motorcycle cam with an "endless" chain, a replacement chain must be installed with a rivet type master link.

Please check the application chart on the D.I.D website.

\*Master links are NOT interchangeable between old and new chain models.

The **D.I.D KM500R tool** is a unique 3-in-1 tool with the ability to cut your chain, press-fit connecting link side plates, as well as rivet the pin head.

The design of the KM500R tool does not allow over-riveting and should only be used for D.I.D's ZJ rivet style master links, as well as the FJ press-fit clip style master links.

This tool may be used to cut any 520, 525, 530, or 532 sized chains.
