

- 1. Cut out the appropriate templates, position them on the inside of the housing buckets aligning the **RED** line centered with the socket hole.
- 2. Drill 5/32 holes and test fit the <u>LED panel</u> assembly before final mounting. Use the same template for all housing buckets.
- Drill the **BLUE** markings when mounting LED panels with Reverse LED's PN 1100170R.
- Drill the **ORANGE** markings when mounting LED panels PN 1100171.
