

**HIGH BRIGHTNESS &
ULTRA-HIGH BRIGHTNESS**

LED Bulbs Available for Most Lighting Applications

**ADD A UNIQUE TOUCH TO YOUR
VEHICLE'S LIGHTING WITH DORMAN
EXCLUSIVE SWITCHBACK LEDS**

- Dual circuit bulb with white as the running light and amber for the turn signal
- Available in Ultra-High Brightness 3157 and 1157 bulb applications

The Superior Choice Over Standard Halogen

- **Less Energy** - Converts more energy to light saving current draw on vehicles battery
- **Long Life** - Lasts more than 10 times longer
- **Increased Brightness** - Up to 4 times brighter
- **Safety** - Achieves full brightness in less than one micro-second leading to improved driver reaction

Note: Replacement LEDs are for off-road and show use only.

† INTERIOR ONLY, NOT SHOWN

DORMAN LED Advantages

- Covers a wide variety of bulb types and vehicle applications
- Uses the most LEDs in the smallest footprint possible
- Built in "Bulb Out" elimination on most 5050SMD LED bulbs*
- Uses more advanced surface mounted diodes (SMD) versus older through-hole technology

*Some vehicles require the addition of a load equalizer (p/n 50W60-AL) to completely eliminate bulb out warning
