

DORMAN KEYLESS REMOTES

NEED A KEY FOB? DORMAN MAKES REPLACEMENT EASY AND AFFORDABLE.

Dorman key fobs work and look just like your original keyless remote, without the high cost and inconvenience of visiting a dealership for programming.

Dorman is your source for premium, do-it-yourself replacement key fobs for popular applications, and most of them can be easily programmed using simple instructions. You can skip the expensive hassle of visiting a dealership and paying for an overpriced factory remote, and then waiting for it to be paired with your vehicle. With Dorman, you can get your new key fob working in minutes instead of hours - and rely on it for years to come.

Save time – Dorman's DIY remotes can be programmed to your vehicle in minutes, following supplied simple instructions

Save money – Fobs can be programmed using Dorman's included programming module or via an on-vehicle pairing sequence. No expensive, time-consuming dealership appointment required.

Keep functionality – Every Dorman replacement key fob, once properly programmed, will duplicate the functions of the original remote – and closely resemble it in appearance, too.

USER-FRIENDLY SIMPLICITY FOR MILLIONS OF VEHICLES

PATENTED PROGRAMMING TOOL

ON-BOARD PROGRAMMING

FIRST-TO-AFTERMARKET WITH OEM KEYLESS REMOTE TECHNOLOGY

Dorman invests millions of dollars to ensure your fob works seamlessly just like the original - at a fraction of the cost. Our patented keyless entry remote programming tool is just one of the many user-friendly innovations introduced by our team of dedicated electronics engineers and expert locksmiths.

BUILT BETTER, BACKED BETTER.

Our fobs are built using premium materials and components, backed by a limited lifetime warranty – longer than the warranties from dealerships and competitors.
