Vehicle technology continues to evolve at an accelerated pace and DragonFire remains at the forefront of product innovation! From a complete package of utility accessories for the updated Can-Am Defender to accelerating Yamaha's wild new YXZ 1000 R to RacePace, DragonFire's R&D team is on it! We haven't neglected old favorites, either. DragonFire has components for most popular platforms from the Arctic Cat Wildcat and Can-Am Maverick to Kawasaki Teryx T4 and Polaris Ranger. All-new products for 2017 include the 2" SlimLine restraints, DoorBags storage pouches, RT series seats, adjustable cargo/tire racks and more.

- Harness Anchors and Bars are Made in the USA

CAN-AM

Can-Am Side-X-Side vehicles are the embodiment of BRP's ability to redefine any market it takes on. In 2010, they launched the Commander with a powerful 85-hp Rotax® 1000 V-Twin engine and an industry exclusive dual-level cargo box that helped define Can-Am as the brand with no compromise. Fast forward to 2017 and Can-Am is continuing to redefine the UTV market with the workhorse Defender and the radical X3 Maverick leading the way. DragonFire is proud to be part of a select group of aftermarket companies handpicked by Can-Am to help redefine the UTV market.

DRAGONFIRE FOR CAN-AM MAVERICK X3

Safety and comfort are critical to enjoying the UTV experience... and have been a primary focus for DragonFire from the beginning. All harnesses now feature e-dipped black enamel coating to keep corrosion from becoming an issue. Also bolstering DragonFire's harness program is the addition of plush memory foam padding for the shoulder straps. While the closed cell memory foam padding adds a level of comfort, it also increases the longevity of the harness, offering a much longer lifespan than the previous padding. As always, DragonFire offers many options to fit your needs, including our EVO harness, 2" SlimLine or standard 3" wide strap options and 4-Point or 5-Point configurations. Whether it is safety or comfort, DragonFire is your one-stop source for harnesses!

CAN-AM HARNESS KITS SEE PAGE 58-60

- DragonFire is the leader in aftermarket harness mounting
- Innovative designs for proper install and to maximize comfort
- Harnesses available in 2" and 3" with memory foam
- Six colors to choose from
- Don't forget the Override Plug
- Harness Anchors and Bars are Made in the USA

CORRY WELLER PARTNERS WITH DRAGONFIRE

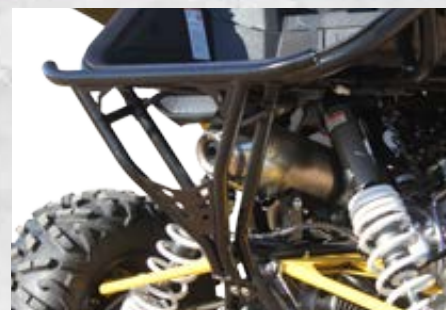

After collaborating to create the DragonFire by Weller Racing performance kits last year, it was time to team up to go racing! Corry Weller is now flying the DragonFire colors on her Factory Yamaha YXZ in the Lucas Oil Regional Off Road short course races in Arizona and California as well as select Best In The Desert events and the TORC series in the midwest. "I am super excited to be working with DragonFire Racing and Yamaha Motor USA in the Production 1000 class," says Weller. While 2016 was her first year with Team DragonFire, Corry is no rookie! She won her fifth and sixth SR1 championships in 2015, clinching both the Arizona and California Lucas Oil Regional Series Championships with a couple rounds to spare! After switching from motocross to UTV racing in 2007, Corry has been on a real roll. She was the first female to podium a UTV in CORR, then became the first woman to win the Lucas Oil Regional Off Road Racing title in 2010. She won her first SR1 Championship in 2011, became the first female to race a PRO 4 truck in 2012 (where she won Rookie Of The Year honors and finished on the podium four times that season), then focused on and dominated the SR1 class. Should be DragonFire's year for making memories... and making champions.

WILDCAT TRAIL

Arctic Cat's goal is to create the ultimate off-road riding experience. At Arctic Cat we are committed to building products and providing services that deliver the experience enthusiasts expect from us. This commitment is engineered into our engines, our chassis and our suspensions... That is how we create the ultimate off-road riding experience for fellow enthusiasts who share our passion. Sounds like a good way to go about #MakingMemories and #MakingChampions to us!

SAFETY

It doesn't matter if you are one of Team DragonFire's top pros like 3X Mint 400 winner Lacrechia Beurrier, short course star like Ken Benson or Corry Weller or just having a little fun in the sand dunes, safety should be your top priority. Wear a helmet, eye protection and above all, strap in with proper restraints! We want everyone to keep #MakingMemories for years to come.

Introducing Clean Circuit wiring kits for Polaris RZR's. ALL KITS FEATURE:

- Sealed connectors & certified crimps on all terminals/seals
- Premium XLP cross-link wire meets or exceeds OEM specs & out performs most provided wire harness
- Tail Light Power Kits plug directly into factory tail light harness to provide power to accessories (i.e. lighted whip or license plate frame)
- Plug-n-Play for easy installation – no cutting, splicing or t-tapping circuits
- Made in the USA

SAFETY SWITCH:

- Sealed On-Off Safety Switch with wiring harness that plugs directly into factory wiring and limits the max speed of the UTV to 15 MPH
- Can be used in place of Override Plug

ACCESSORY POWER KIT AND FAN OVERRIDE:

- Fused circuit
- Relay for switched circuit
- Fan Override requires Accessory Power at Bus Bar (P/N 11-0015 or 11-0016)

PERFORMANCE

DragonFire knows there are many secrets to coaxing more horsepower out of your UTV. From our big bore kits and PyroPak fuel management systems to fire breathing exhaust systems, we can dial your Side-X-Side in.

- Complete kit includes: Bored/Plated Cylinder, CP Piston/Rings/Pins/Clips and Cometic gasket kit
- Cylinder bores are precision honed to achieve exact sizing for optimum ring seal
- Forged CP racing pistons are manufactured to our specs to promote flame propagation, increased power and service life
- Gaskets designed for optimum cooling
- Designed to run on pump gas
- 800 Big Bore features billet cylinders

- 1** Adjustable Shift Weight Kit
- 2** High Flow Performance Air Filter
- 3** New Helix For Improved Back Shifting
- 4** Beefier Primary & Secondary Clutch Springs
- 5** Pre-Filter For Protection Against Fine Particles & Sand
- 6** PyroPak Fuel Controller To Dial In Performance

Corry Weller

DragonFire is proud to team up with Corry and Jason Weller this season. In addition to sponsoring Corry's Yamaha YXZ 1000 and SR1 in the Lucas Oil Regional series in SoCal and Arizona and the new TORC events in the midwest, Corry is also flying the DragonFire colors in select desert races... like Vegas To Reno, the longest off-road race in America! Off the track, the partnership between Weller Racing and DragonFire has been expanded to create a complete performance package. The heart of the DragonFire

Performance by Weller Racing combo is DragonFire's proven PyroPak fuel management system combined with a high-flow air filter working in conjunction with a pre-filter to keep out sand and other particulates without restricting air flow. Weller's secrets for converting horsepower into traction start with adjustable shift weights, which make fine tuning power pulses possible. Beefier primary and secondary clutch springs result in improved shift points, while a new helix makes for better back-shifting.

PERFORMANCE KIT BY WELLER RACING

DF PART #	TR PART #	DESCRIPTION
12-1100		Performance Kit for Polaris RZR XP 1000 2014-15

DRAGONFIRE EXHAUST FEATURES:

- Increased performance throughout RPM range
- Lightweight brushed stainless steel
- Easy install
- USFS approved
- Integrated O₂ sensor
- Made in the USA

XP 900 FEATURES:

- Stepped design for peak performance
- Slash-cut exits

DRAGONFIRE EXHAUST

DF PART #	TR PART #	DESCRIPTION
09-1900	520927	RZR XP 900 Full Dual Exhaust System

Wildcat Exhaust

EXHAUST FEATURES:

- Increased performance throughout the RPM range
- Lighter than OEM Exhaust System
- Meets USFS Sound and Spark Arrestor Regulations
- Stainless steel construction
- Carbon fiber end caps
- Made in the USA

DRAGONFIRE EXHAUST

DF PART #	TR PART #	DESCRIPTION
09-3100	520897	Wildcat Full Dual Exhaust System (fits 2 & 4 seat models)
09-2100	520865	Mavrick 1000 Dual Slip-On Exhaust System

Don't Break It - Break It In

Gates Drive Belt Features:

- Minimal stretch under load results in consistent shifting
- Wears evenly to reduce belt failure due to edge cord pullout
- Carbon tensile cording provides extraordinary strength
- High Performance neoprene with a trapezoidal top-notch and rounded bottom cog design maximizing heat control and flexibility

CARBON SERIES DRIVE BELTS

DF PART #	TR PART #	DESCRIPTION
