

DuPont® Multi-Use Performance Lubricant with Teflon® fluoropolymer

PRODUCT INFORMATION SHEET

High-performance general purpose lubricant with extreme corrosion and wear protection.

DuPont® Multi-Use Performance Lubricant is a water repelling, rust-resisting lubricant. Enhanced with Teflon® fluoropolymer for optimum performance.

Product Description

- Features Teflon® fluoropolymer for enhanced wear protection and lubricity.
- Contains calcium sulfonate for improved corrosion protection.
- Designed for general purpose use.
- Water-repelling silicone-free formula protects against rust.
- Formulated with Teflon® fluoropolymer to deliver longer lubricant life, higher temperature stability, and better resistance to water and chemical contaminants.
- Provides extreme pressure wear protection.
- Resists extreme cold temperatures (to -30°F).

Ideal for use in applications where:

- Parts are exposed to extreme cold, hot or outdoor conditions.
- High moisture applications where other lubricants are quickly washed off.
- Parts need to be coated to prevent rust & corrosion.

Outstanding Features

- Exceptional anti-corrosion characteristics.
- Temperature Range: -30°F to +300°F.
- Provides superior anti-stick and EP properties.
- Outstanding adhesion and long lubricant life.
- Water repelling, protects against rust and corrosion.
- Contains no silicones.

Typical Applications

- **Use on any moving part including:** Hinges, Mechanical Chains, Springs, Cables, Rollup Doors, Sliding Tracks, Pivots, Cams and Pulleys. Threaded Parts, Conveyor Rollers, Wheels, Windows, Locks and Latches. Hitches, Winches, Ramps, Gates, Tools & Table Saws.

Directions For Use

1. Provide adequate ventilation. Do not use near open flames.
2. Shake or stir well before use to mix solids.
3. Spray or brush the product on uniformly.
4. For precision application use extension straw.

Properties of Material

Base Lubricant	Performance Grade Lubricating Wax PTFE (Polytetrafluoroethylene) Synthesized Calcium Stearate Anti-wear Additives Rust & Corrosion Inhibitors	Appearance	Nearly clear
		Flash Point	Aerosol: not available Bulk Liquid: not available
		NFPA Flammability Rating	3 (Highly Flammable)

Part Number	Container Size	Part Number	Container Size
DM1204101	4 oz. Net Wt. Bottle	DM0024101	1.5 lb (24 oz) Jug
D00110101	11 oz. Net Wt. Aerosol	DM0096101	6 lb (96 oz) Jug
DM0614101	14 oz. Net Wt. Aerosol	DM0480101	30 lb (480 oz) Pail

Storage - Keep away from heat, sparks and flame. Store in a well ventilated place.

Handling - For safe handling information, consult the SDS.
