Sway Bar and Track Bar grease instructions

Due to the many different styles of stabilizer bars(anti-swaybars), your vehicle could have any combination of endlinks and frame (pivot) mountings. Grease your style as pictured below.

Note: Track bars are similar to double eye drop links. Grease your track bar kit as explained for the double eye drop link.

Remember: Remove the old scale and rust build up on the stabilizer bar. Remove the old scale and rust in the drop links and track bar eyes.

(Energy Suspension's "Hyperflex"tm bushings for drop links could be one piece or two piece depending on application)
