

# Set # 4-10104

## Offset Mustang Rack Bushings

The offset design of these bushings will raise the rack. This will partially correct bump steer.

down

Bushings must be installed with offset hole down and centered in the 6 o'clock position.

Must re-use factory inner metal sleeve.

It is recommended that a factory service manual be purchased prior to performing any work on your car or truck.

Before tightening the rack bolts, loosen the pinch bolts at couplers to eliminate any binding in the steering column. **INSTALLATION NOTE:** Re-tighten pinch bolts after rack mounting bolts. Check for sufficient clearance between rack and engine mount brackets.
