⚠ WARNING**To avoid crushing and related injuries and or property damage:**

- Read, understand and follow all printed materials provided with on this product.
- DO NOT exceed rate capacity.
- Use ONLY on hard, level surfaces capable of sustaining the load.
- Always use both hands to control tire and TIRE WHEEL DOLLY.
- Move slowly and maintain tire in as close to vertical positon as possible.
- No alterations shall be made to this product.
- Failure to heed these markings may result in personal injury and/or property damage.

Before using the product, carefully read the instructions manual and all stickers and warnings noted on the product. This is necessary to avoid injury to the operator and damage to the product.

Product Description

The HD Adjustable Wheel Dolly [Model #70134] is designed to assist service technicians as they move through the tire/wheel service process. Its light-weight, portable, and adjustable design makes it an ideal tire dolly for any service shop. This tire dolly completely eliminates the need to lift and move any large and heavy wheels by easily rolling the unit up to the wheel and rolling it away and onto the vehicle. In addition to saving on labor and time, using the wheel dolly will also allow for saving an accidental damage to expensive rim while servicing.

Product Specifications

- Lifting Capacity:** 330 lbs. | 150 kg
- Tire Diameter:** 23.5" - 43.5" | 597 mm - 1105 mm

BEFORE USE:

- Before use of this tool please verify that the application of this tool is compatible.
- Assemble product according to parts breakdown and assembly provided.
- Read the entire operation manual including warnings before any use of this tool.
- Always inspect the tool before use to ensure it is working properly. If rollers do not roll smoothly, **DO NOT** put into service. Contact the manufacturer or an authorized distributor of ESCO product and parts for replacement parts or consultation.

OPERATION:

- Follow the vehicle manufacturer's recommended removal and installation procedures for tire, wheel or hub.
- After the tire/wheel assembly has been loosened from the hub or axle and is ready to be removed, position the TIRE WHEEL DOLLY under the tire to be removed. Adjust cart position such that the tire/wheel assembly will balance between rollers without falling.

PLACING TIRE ON WHEEL DOLLY:

REMINDER: DO NOT EXCEED WEIGHT CAPACITY OF TIRE WHEEL DOLLY

- **NEVER** use the TIRE WHEEL DOLLY as a wheel pulling device. Before transporting wheel assembly, ensure that it is free from the hub or drum assembly and balanced between the rollers.
- When the weight of the loosened tire and wheel assembly is supported by the TIRE WHEEL DOLLY, cautiously roll the TIRE WHEEL DOLLY away from the drum or axle.

When using the TIRE WHEEL DOLLY ALWAYS use two-hands.
(See Figure 1 for example)

Figure 1 - Always Use Both Hands

MOVING TIRE ON TIRE WHEEL DOLLY:

1. Make sure the tire is properly centered on the rollers of the TIRE WHEEL DOLLY.
2. When wheel assembly has cleared the hub or the axle, push or pull to desired location. Walk slowly, exercise caution and look ahead to avoid obstacles while using both hands to control the tire and the TIRE WHEEL DOLLY.

"Providing Quality Hydraulic Repair and Technical Support for All Your Hydraulic Product Needs"

GUARANTEED 1 Day Turnaround Service.
