

Quick and easy installation with Super-Grip® the slip-resistant fastening system using belt and buckle fasteners, zippers (on some models) and Touch fasteners.

Super-Grip® the slip resistant fastening system is engineered to provide original equipment installation in minutes. Its simple – no tools are needed. Multi-directional stretch polyester trim molds the seat cover to the contours of the seat. Touch fasteners and a belt n buckle tightening system are the finishing touches that grip the cover to the seat.
