

FAQ

Q Hey I have a 2005 hummer h2 and one of my brake lines that go from the master cylinder back to the brake control module has broken and was wanting to make sure this kit includes that line.

A Yes, any "CBK" will have every hard line for that vehicles braking system. The only time it wont is if there were hoses used or if the line was already made in Stainless Steel from the factory.

Check out an excellent selection of replacement brake parts we offer on our website.
