

FAQ

Q I need To replace all the lines on my 03 h2 this will include every line i need?

A Yes this includes every hard brake line for your Hummer H2. Thanks!

Q Are these 37*or 45* flares on these lines?

A Hummer H2s use 45 degree flares and that is what we use as well for this model. All flares and fittings are just like the original. Thanks!

Q How hard would be to do at home .with basic tools . No lift.

A Yes we believe you would be able to install this set with the vehicle on the ground. The hardest lines will be the intermediate front to rear lines but you should be able to get them in. Thanks!

Q Hi in the kit for my 2006 hummer h2 , dose it come with the brake lines from the abs pump to the master cycler, just want to make sure I know it's say complete kit .

A Yes, a "CBK" will always come with every hard line you'll need to completely replace all the brake lines. The only exceptions are if hoses were used instead of a line or if a line is already Stainless Steel from the factory (it shouldn't rust after all).
