

FAQ

Q the line that goes to the right side of the radiator, what is the overall length of it?

A I'm sorry I do not have that information available. With that being said, this transmission line set is for factory 70-74 Mopar B & E Body cars with a Big Block and factory radiator. We have original lines in stock that we have to compare our manufactured lines with everytime we put them in production.

Check out an excellent selection of replacement brake parts we offer on our website.
