

FAQ

Q I have a 68 charger and was wondering if the 3/8" fuel line is the largest that you carry. I was thinking the car could use a 1/2" and I would like it in Stainless. Its a 493 CI engine just for once in a while driving.

A Yes we can make this line in 1/2" but you would have to call in and ask for that as a custom. We do not list any 1/2" custom lines for sale.
