

FAQ

Q This kit is for my 04 2500hd ext cab, 4x4, hydro boost system. I called and Rick verified. My orig lines to master cylinder have loops like a spring by the master cyl and this set doesn't! Is this ok?

A Yes this is fine. We designed our lines without the loops and have been selling them this way for many years. This is not a problem at all.

Rely only on high-grade replacement brake parts offered on our virtual shelves.
