

FAQ

Q Will this kit do the entire truck?

A This kit is for the front brake system (Master Cylinder Line, Left Front, and Right Front). If you want to do the rest you'd need the "TIN" that fits your cab and bed and the "TRA" that fits your rear axle. Most likely they'd be "TIN03##SS" and "TRA03##SS" assuming you wanted Stainless; Steel would have "OM" at the end of the SKU. Potentially, the CBK0076SS would also work and that is every hard line of the Brake System. Or if you find you need/want to replace the brake hoses, then you'd want the "BLH" that goes for your truck.

Rely only on high-grade replacement brake parts offered on our virtual shelves.
