

Scirocco Radiator Dual Electric Fan:

Flex-a-lite has developed the new Scirocco Radiator dual electric fan to custom fit the 19" or 21" Scirocco radiators (O.E., most aftermarket, or aluminum construction). The Scirocco Radiator dual electric fan is fully reversible by reversing fan blades and motor wires. Optional manual switch provides the ability to turn off the fan while racing.

The Scirocco Radiator dual electric fan consists of two 8 ½" diameter 10-bladed fans surrounded in a one piece lightweight nylon shroud with a full contact rubber seal to maximize the cooling surface area and protect your radiator core. The entire assembly weighs only 6 lbs., draws 18 amps and pulls 1800 cubic feet per minute at 0" of static pressure.
