

SEQUENTIAL TURN SIGNAL

Looking to upgrade the styling of your Mustang? Look no further. Introducing Sequential LED Tail Lights from Form Lighting. If you are looking to update the rear end of your Mustang, swapping the tail lights is one of the easiest things you can do to make a big impact.

STAND OUT FROM THE CROWD

The S550 is known for its signature triple sequential turn signal. These lamps not only retain that functionality, but make your Mustang stand out with modern 2018+ styling, and three different lens colors available: smoked, clear, or OEM red.

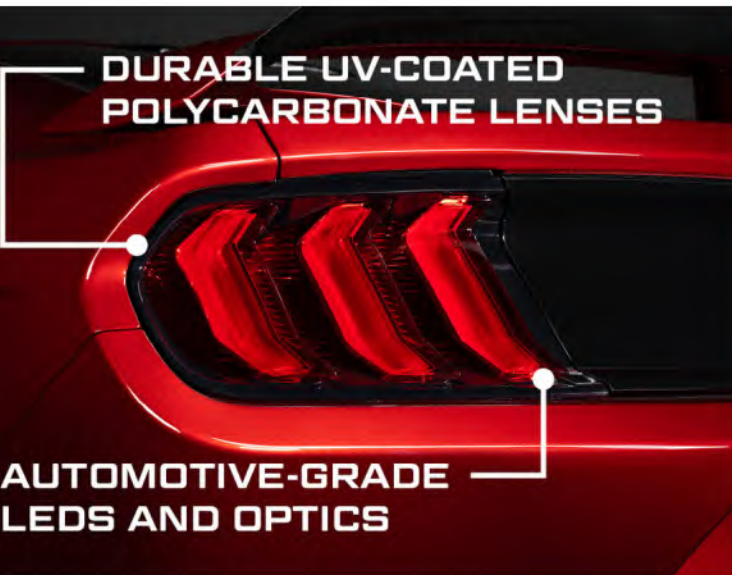

PLUG-AND-PLAY INSTALLATION

Our tail lights for the Mustang are completely plug-and-play and will fit perfectly, without any body gaps. Installation is a breeze and can be done in minutes. They were designed to plug into your factory tail light connector, with no additional wiring needed. There are no errors, flickering, or hyperflashing.

THREE LENS COLORS

All three lens color options illuminate with red LEDs for running lights, turn signal, and brake. They are SAE and DOT-compliant for on-road use.

**DURABLE UV-COATED
POLYCARBONATE LENSES**

**AUTOMOTIVE-GRADE
LEDS AND OPTICS**

OEM-GRADE CONSTRUCTION

Form Lighting tail lights are built with quality in mind and constructed using OEM-grade materials, including a UV-coated polycarbonate lens, automotive-grade LEDs and optics, and direct-fit connectors. While they may not be the cheapest option on the market, the fit and finish of our lamps are superior to other aftermarket units.
