

## STARTUP SEQUENCE

These tail lights are packed with modern features, including a unique startup animation. Anytime the parking light turns on, it will illuminate in a chasing, stacking pattern that is sure to turn heads.

## MODERN APPEARANCE

Unlike many other aftermarket options on the market, these tail lights were designed with factory-style optics, to diffuse the light in a smooth, even appearance. The C-shaped bar on the outer perimeter of the lamps illuminates as your running light, brake light, and turn signal. On the interior of the lamp, you'll find a unique 4-tier design, for a unique, high-end appearance.

## TURN SIGNAL

The startup sequence won't be the only thing turning heads. These tail lights also feature a sequential LED turn signal. Any time the turn signal is activated, the red LEDs in the outer C-bar smoothly sequence from the top and bottom, meeting in the middle for a truly premium look.

## SMOKED, NOT SPRAYED

Nightshade? No thanks. The lens on our Tacoma taillamp is designed with tinted optical components, which provides a factory-quality smoked appearance - not a cheap painted look like others on the market.

**DURABLE UV-COATED  
POLYCARBONATE LENSES**

**AUTOMOTIVE-GRADE  
LEDS AND OPTICS**

## OEM-GRADE CONSTRUCTION

Form Lighting tail lights are built with quality in mind and constructed using OEM-grade materials, including a UV-coated polycarbonate lens, automotive-grade LEDs and optics, and direct-fit connectors. While they may not be the cheapest option on the market, the fit and finish of our lamps are superior to other aftermarket units.
