

PRODUCT QUESTIONS

Can I order the mounting plate without the tilt side mount brackets?

The RotoPax Mounting Plate can be purchased separately under product code: RRAC105. This mounting plate is great for mounting either one (1) 15L/4 gallon or two (2) 7.5L/2 gallon RotoPax fuel or water cans to the top of our Slimline II platform!

I have the stock Fj cruiser roof rack. Do you offer a mount for the rotopax to mount to it?

We only make the Rotopax brackets that function with our own roof racks. We have some amazing roof rack options for your FJ though!
