

PRODUCT QUESTIONS

Can I mount any light bar up to a size 40” or is this only for a 40” light bar?

The LED Light Bar Rack Mounted Brackets (RRAC124) can be used with any length light bar, as long as the light bar and brackets can be mounted within the dimensions of your rack tray. Most light brands will work with these brackets as will our 40" LED Light Bar.

Can I use this to mount a 40" single row LED bar on my Front Runner rack that is mounted on a 2014 Tacoma?

Yes, these will allow you to mount most LED bars to the rack on your Tacoma. You may want to measure the clearance of the bar between the foot rails. Clearance when mounted on the front or underneath will depend on the dimensions of the housing of the light bar.

When it comes to quality off-road lights, Front Runner Outfitters is the brand you can depend on.
