You love getting out on the water. Not a day goes by you don't think of it. The smells, the sounds, the breezes. There's nothing more satisfying. Yet, you seem to have precious little time for your passion. So we design Garmin Marine products to be easy to understand, simple to use, and dependable from one season to the next. That way, whenever you finally have time on the water, your Garmin Marine electronics will occupy precious little of it.

IT'S YOUR TIME.

PANOPTIX™
ALL SEEING SONAR

Panoptix all-seeing sonar is unlike anything you've ever seen on the water. Use a Panoptix transducer with a compatible Garmin chartplotter/sonar combo to see fish and structure live and in 3D.

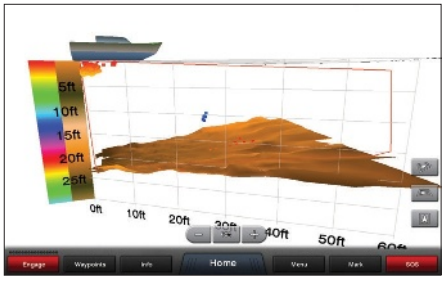

PANOPTIX FORWARD

Provides three impressive views, even if your boat is stationary, LiveVü Forward, RealVü 3D Forward and FrontVü. It shows the bottom plus fish and bait swimming in the water column in front of your boat – in real time. You can even see your lure as you reel it in. You can also get 3D views of fish and structure in front of your boat.

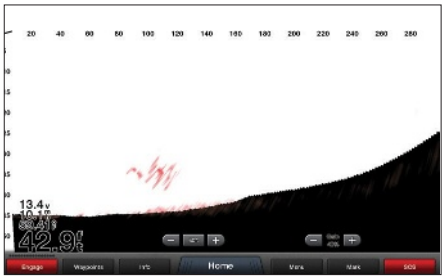

LiveVü Forward:

Updates are provided at video speed with a single frame of real-time moving images. This screen shows fish attacking a lure. Imagine seeing it live, like video sonar!

RealVü 3D Forward:

Digitally scans the area in front of the boat, creating a forward-looking 3D view of the bottom, structure and fish. This screen shows fish targets at 10' deep and 20' in front of the boat.

FrontVü:

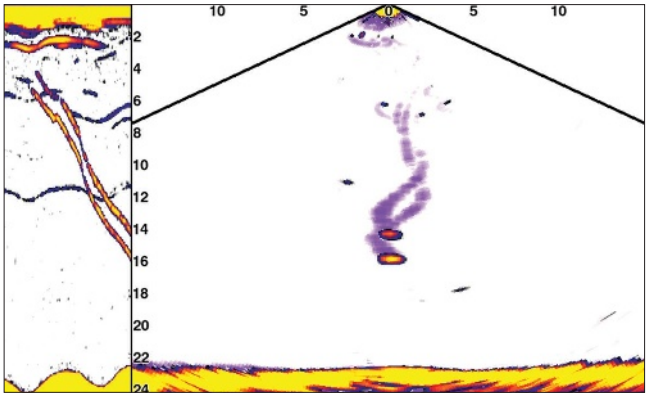

Show real-time data for what is in front of the boat with moving images of the changes to the bottom. This screen shows the bottom sloping up from 45' to 30', 300' in front of the boat.

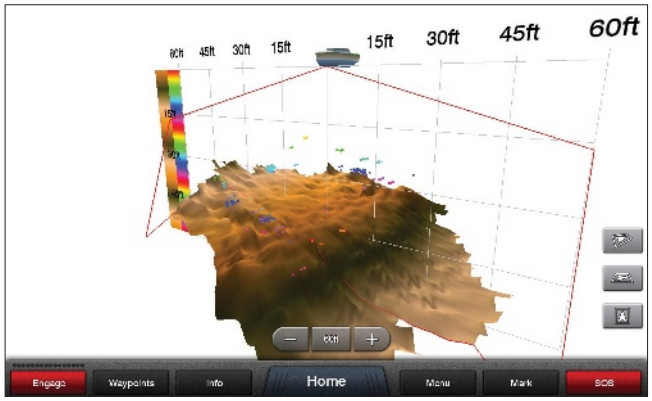

PANOPTIX DOWN

The Panoptix Down transducer delivers three remarkable views: LiveVü Down, RealVü Down and RealVü 3D Historical. Whereas LiveVü Down and RealVü Down can be used while stationary, RealVü 3D Historical is used while your boat is moving to help scout for fish and cover more water faster.

LiveVü Down:

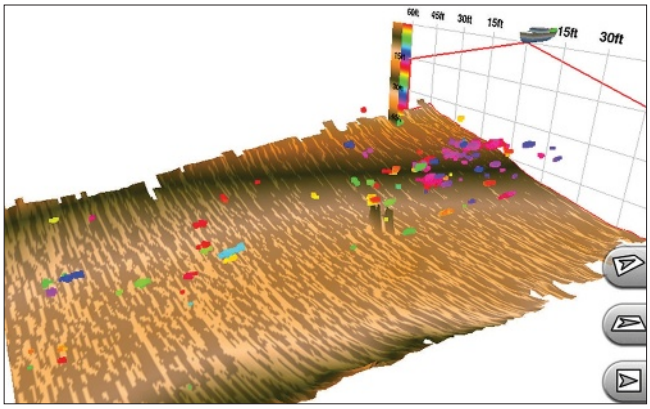

Shows real-time moving sonar images below the boat. This screen shows bait drop with echo trail movement in purple. Sonar data history is at the left.

RealVü 3D Down:

Scans the area below the boat from front to back and side to side. This screen shows a ridge dropping off to port and fish schooling in depressions along the bottom.

RealVü 3D Historical:

Scrolls through the data as the boat moves to show the history of entire water columns – from the bottom to the surface and all of the fish in between. This screen shows the boat passing over a stream channel with a school of fish between 30-40'.

	PS21 Forward	PS30 Down	PS31 Forward	PS60 Down
SKU	010-01588-00	010-01284-00	010-01284-01	010-01406-00
Mounting Style(s)	Trolling Motor / Transom	Transom	Trolling Motor / Transom	Thru-Hull
Features	LiveVü FrontVü	LiveVü RealVü 3D Historical	LiveVü RealVü 3D FrontVü	LiveVü RealVü 3D Historical
Primary Activity	Freshwater Fishing Bass & Crappie	Freshwater Fishing Walleye	Freshwater Fishing Bass & Crappie	Coastal
Boat Recommended	Bass	Aluminum	Bay	Center Console / Sportfishing

The forward-facing transom mount transducer should be mounted in a location that is out of the water at speeds over 20 mph (32 km/h). If located below the water line, cruising speeds over 25 mph (40 km/h) should be avoided.

CHIRP SONAR

CHIRP sonar is one of the most sophisticated sonar technologies available for fishing. The word itself is an acronym for Compressed High-Intensity Radiated Pulse. CHIRP sonar provides amazingly clear target separation and definition because it puts even more energy onto the target than traditional sonar.

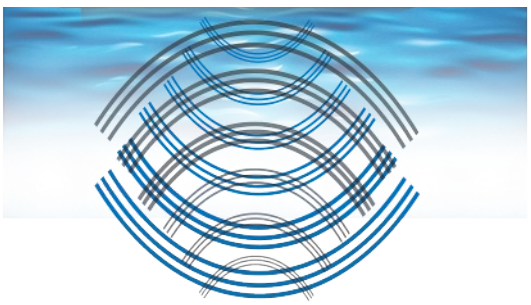

Standard Sonar

Standard sonar sends 1 single frequency at a time. Since the only feedback is from this 1 single frequency, there is little information to work with, limiting the clarity and resolution available with standard sonar.

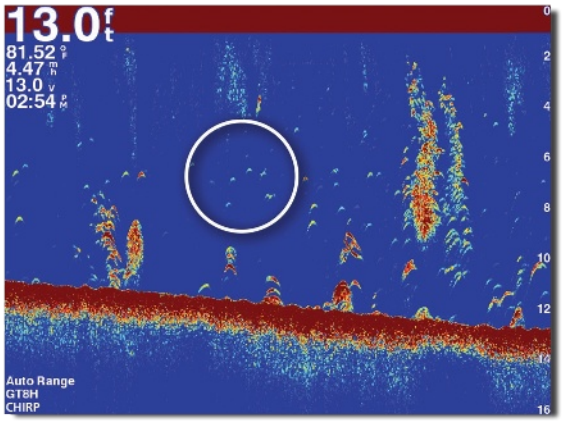

CHIRP Sonar

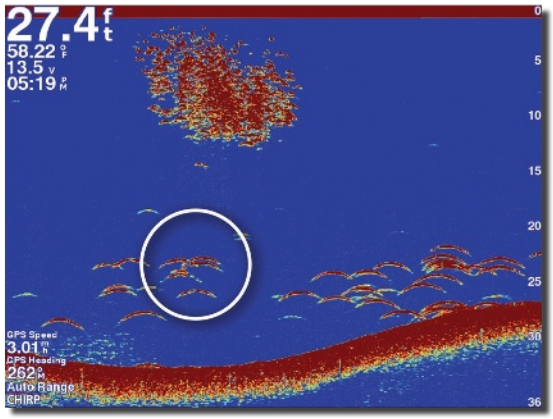

Instead of sending just one single frequency, CHIRP sends a continuous sweep of frequencies within a range from low to high. Garmin CHIRP sonar technology then interprets each frequency individually upon its return. Since this continuous sweep of frequencies provides CHIRP with a much wider range of information, CHIRP sonar is able to create a much clearer, higher resolution image with greater target separation and crisper fish arches. For example, 80-160kHz is sweeping through the frequency range from 80kHz all the way up to 160kHz and hitting every single frequency in between.

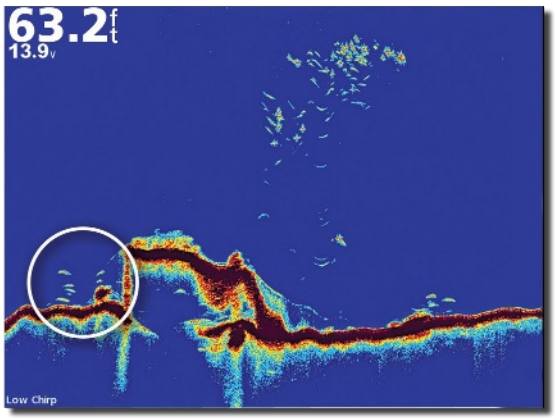

The key to CHIRP sonar is the interpretation of the data retrieved. The better the data interpretation, the better the screen image. Compare un-doctored screen images provided by actual Garmin sonar owners to any other CHIRP sonar images you have seen. We think you'll agree that when it comes to CHIRP sonar technology, Garmin is creating products that interpret CHIRP sonar data the best.

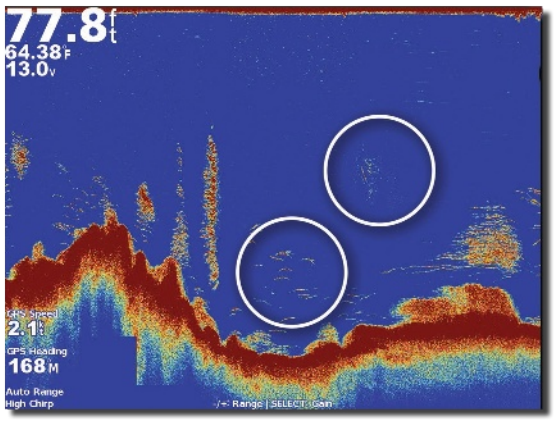

Improved target resolution enables you to actually see individual baitfish separately.

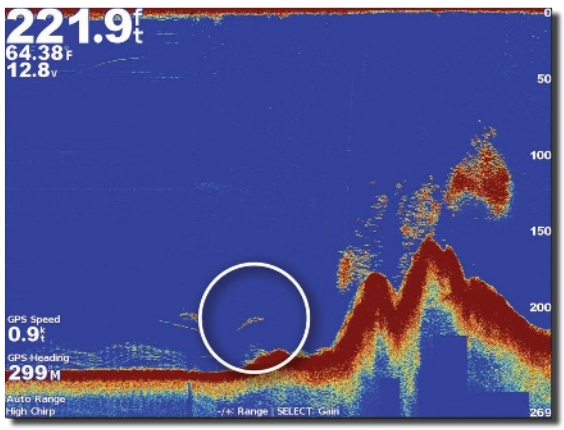

A sweep of tones delivers more data, providing a much higher resolution, clearer depiction of targets on screen.

CHIRP has the sensitivity to differentiate between subtle differences to create a clearer image of what's below.

Improved target resolution enables you to differentiate between big fish and tight clusters of baitfish.

Effective in both shallow and deep water.

CLEARVÜ SCANNING SONAR

Garmin STRIKER™ fishfinders with GPS, echoMAP™ CHIRP and GPSMAP® combo chartplotters are available in versions with built-in advanced CHIRP sonar plus Garmin CHIRP DownVü™ and CHIRP SideVü™ scanning sonar providing the clearest scanning sonar images on the water. The GCV 10 Scanning Sonar Module makes it possible to add Garmin DownVü and SideVü scanning sonar with CHIRP technology to some earlier units equipped only with HD-ID™ sonar. CHIRP sonar technology puts more power, more energy into the water and onto targets. That added sonar power greatly enhances small target detection, target separation, and image resolution. You can actually distinguish between small baitfish and game fish. You can also tell the difference between hard and soft bottom. And, as usual, we made our new products with scanning sonar incredibly easy to install, easy to understand and seriously easy to use, because it's your time.

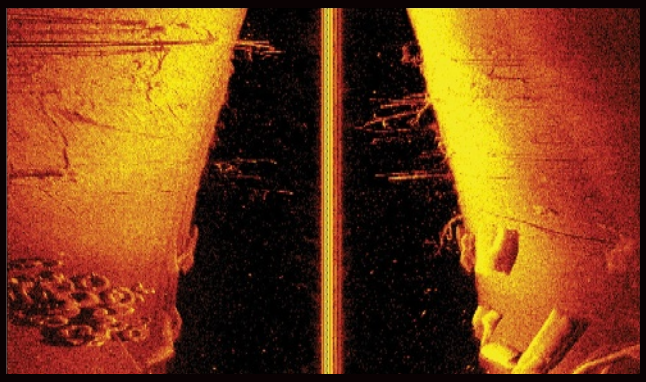

Superior Resolution

Enhanced resolution for greater target separation and stunning details.

Dynamic Range

Wide dynamic range for small target detection, making sure you see more than ever.

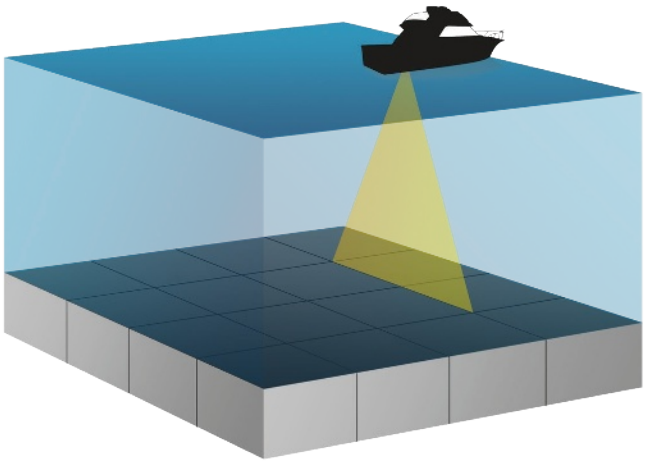

Clearer Picture

Noise suppression allows for a much clearer picture – a real feast for your eyes.

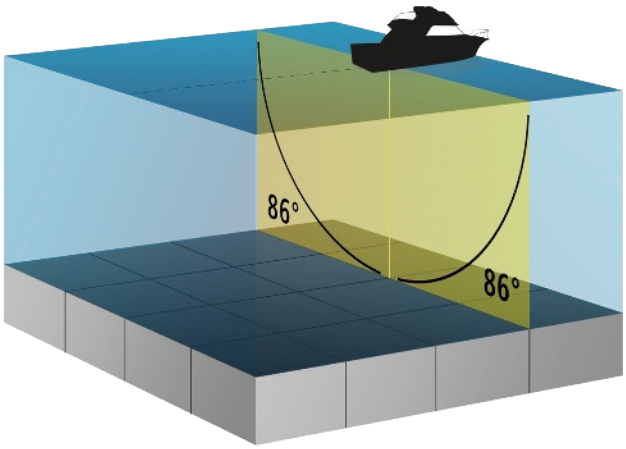

DownVü

This high-frequency sonar gives you a clearer picture of what's below your boat, by producing a more detailed representation of objects, structure and fish. DownVü with CHIRP technology takes it one step further, producing an ultra-clear page with even more detail.

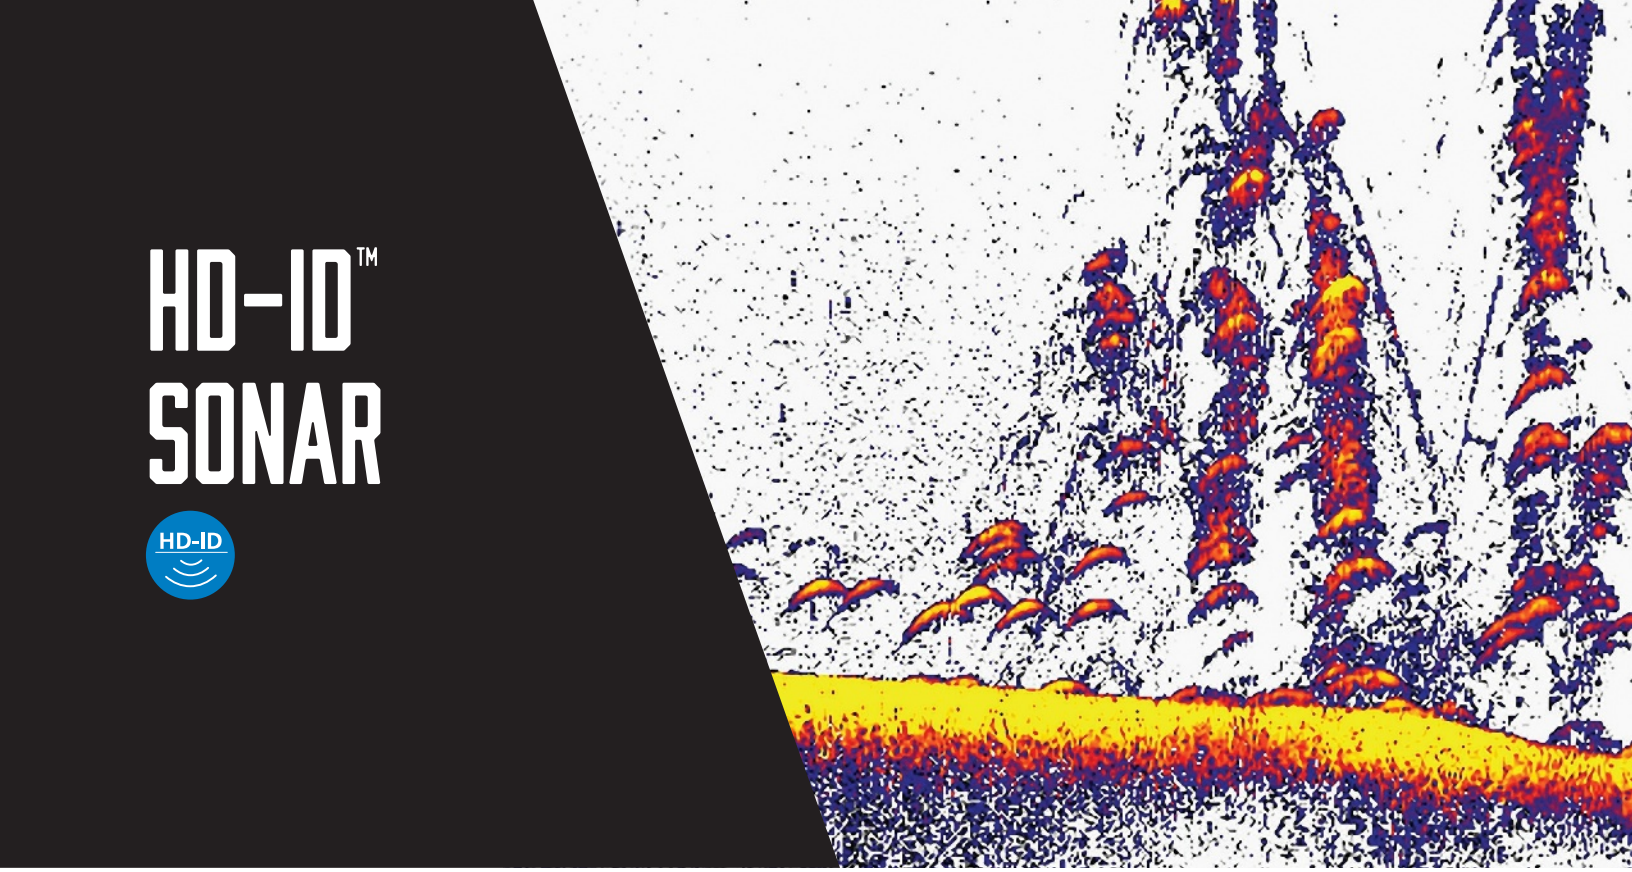

SideVü

SideVü shows you what is happening to the sides of your boat. An excellent way of finding structures and fish. SideVü with CHIRP technology provides an even more detailed and higher resolution image of what is beneath the surface.

HD-ID™ SONAR

We have improved our proprietary software used to interpret sonar data returns with Garmin exclusive HD-ID target tracking technology to provide even crisper fish arches, improved structure detail, and better separation of images.

FUSION-LINK™

FUSION-Link™ is regarded as the industry standard for entertainment integration. It allows your compatible Garmin chartplotter or combo the ability to integrate with, and utilize specialized FUSION entertainment functionality, creating a centralized control station for the entire vessel and a more user-friendly experience.

AUTO GUIDANCE 3.0

Patented Garmin Auto Guidance was the first automatic guidance navigation aid of its kind and Auto Guidance 3.0 is even more unique to boating. Available when you upgrade your maps to Garmin LakeVü HD Ultra or BlueChart® g2 Vision™ HD, Auto Guidance 3.0 creates a visible path you can follow, designed for your boat's specification helping you avoid charted hazards and obstructions right to your destination. Auto Guidance 3.0 even provides point-to-point guidance and navigational solutions, such as entering and exiting marinas — regardless of the depth of the water — with a path indicating where guidance is not conforming to user settings.

GARMIN MARINE NETWORK & NMEA 2000®

Garmin makes it easy to connect multiple devices and instruments in your boat. Simply combine the Garmin Marine Network with the NMEA 2000 to view multiple functions, such as multiple combos, sonar, and Garmin VIRB™ action cameras, on one or more displays. All Garmin Marine Network and NMEA 2000 devices come with an easy plug-and-play setup. The system automatically detects the devices in the network and makes them ready to use.

MOUNTING OPTIONS

Quick-Release Mount

Some models feature the added security of a quick-release bail mount. Cords plug directly into the mount allowing you to quickly install and remove your device from power and mount.

Bail Mount

Expand your options for mounting your chartplotter. Bail mount allows you to install your chartplotter on any flat surface of your boat.

Flush Mount

A low-profile flush mount is easy to position and suits most flat surfaces in your boat.

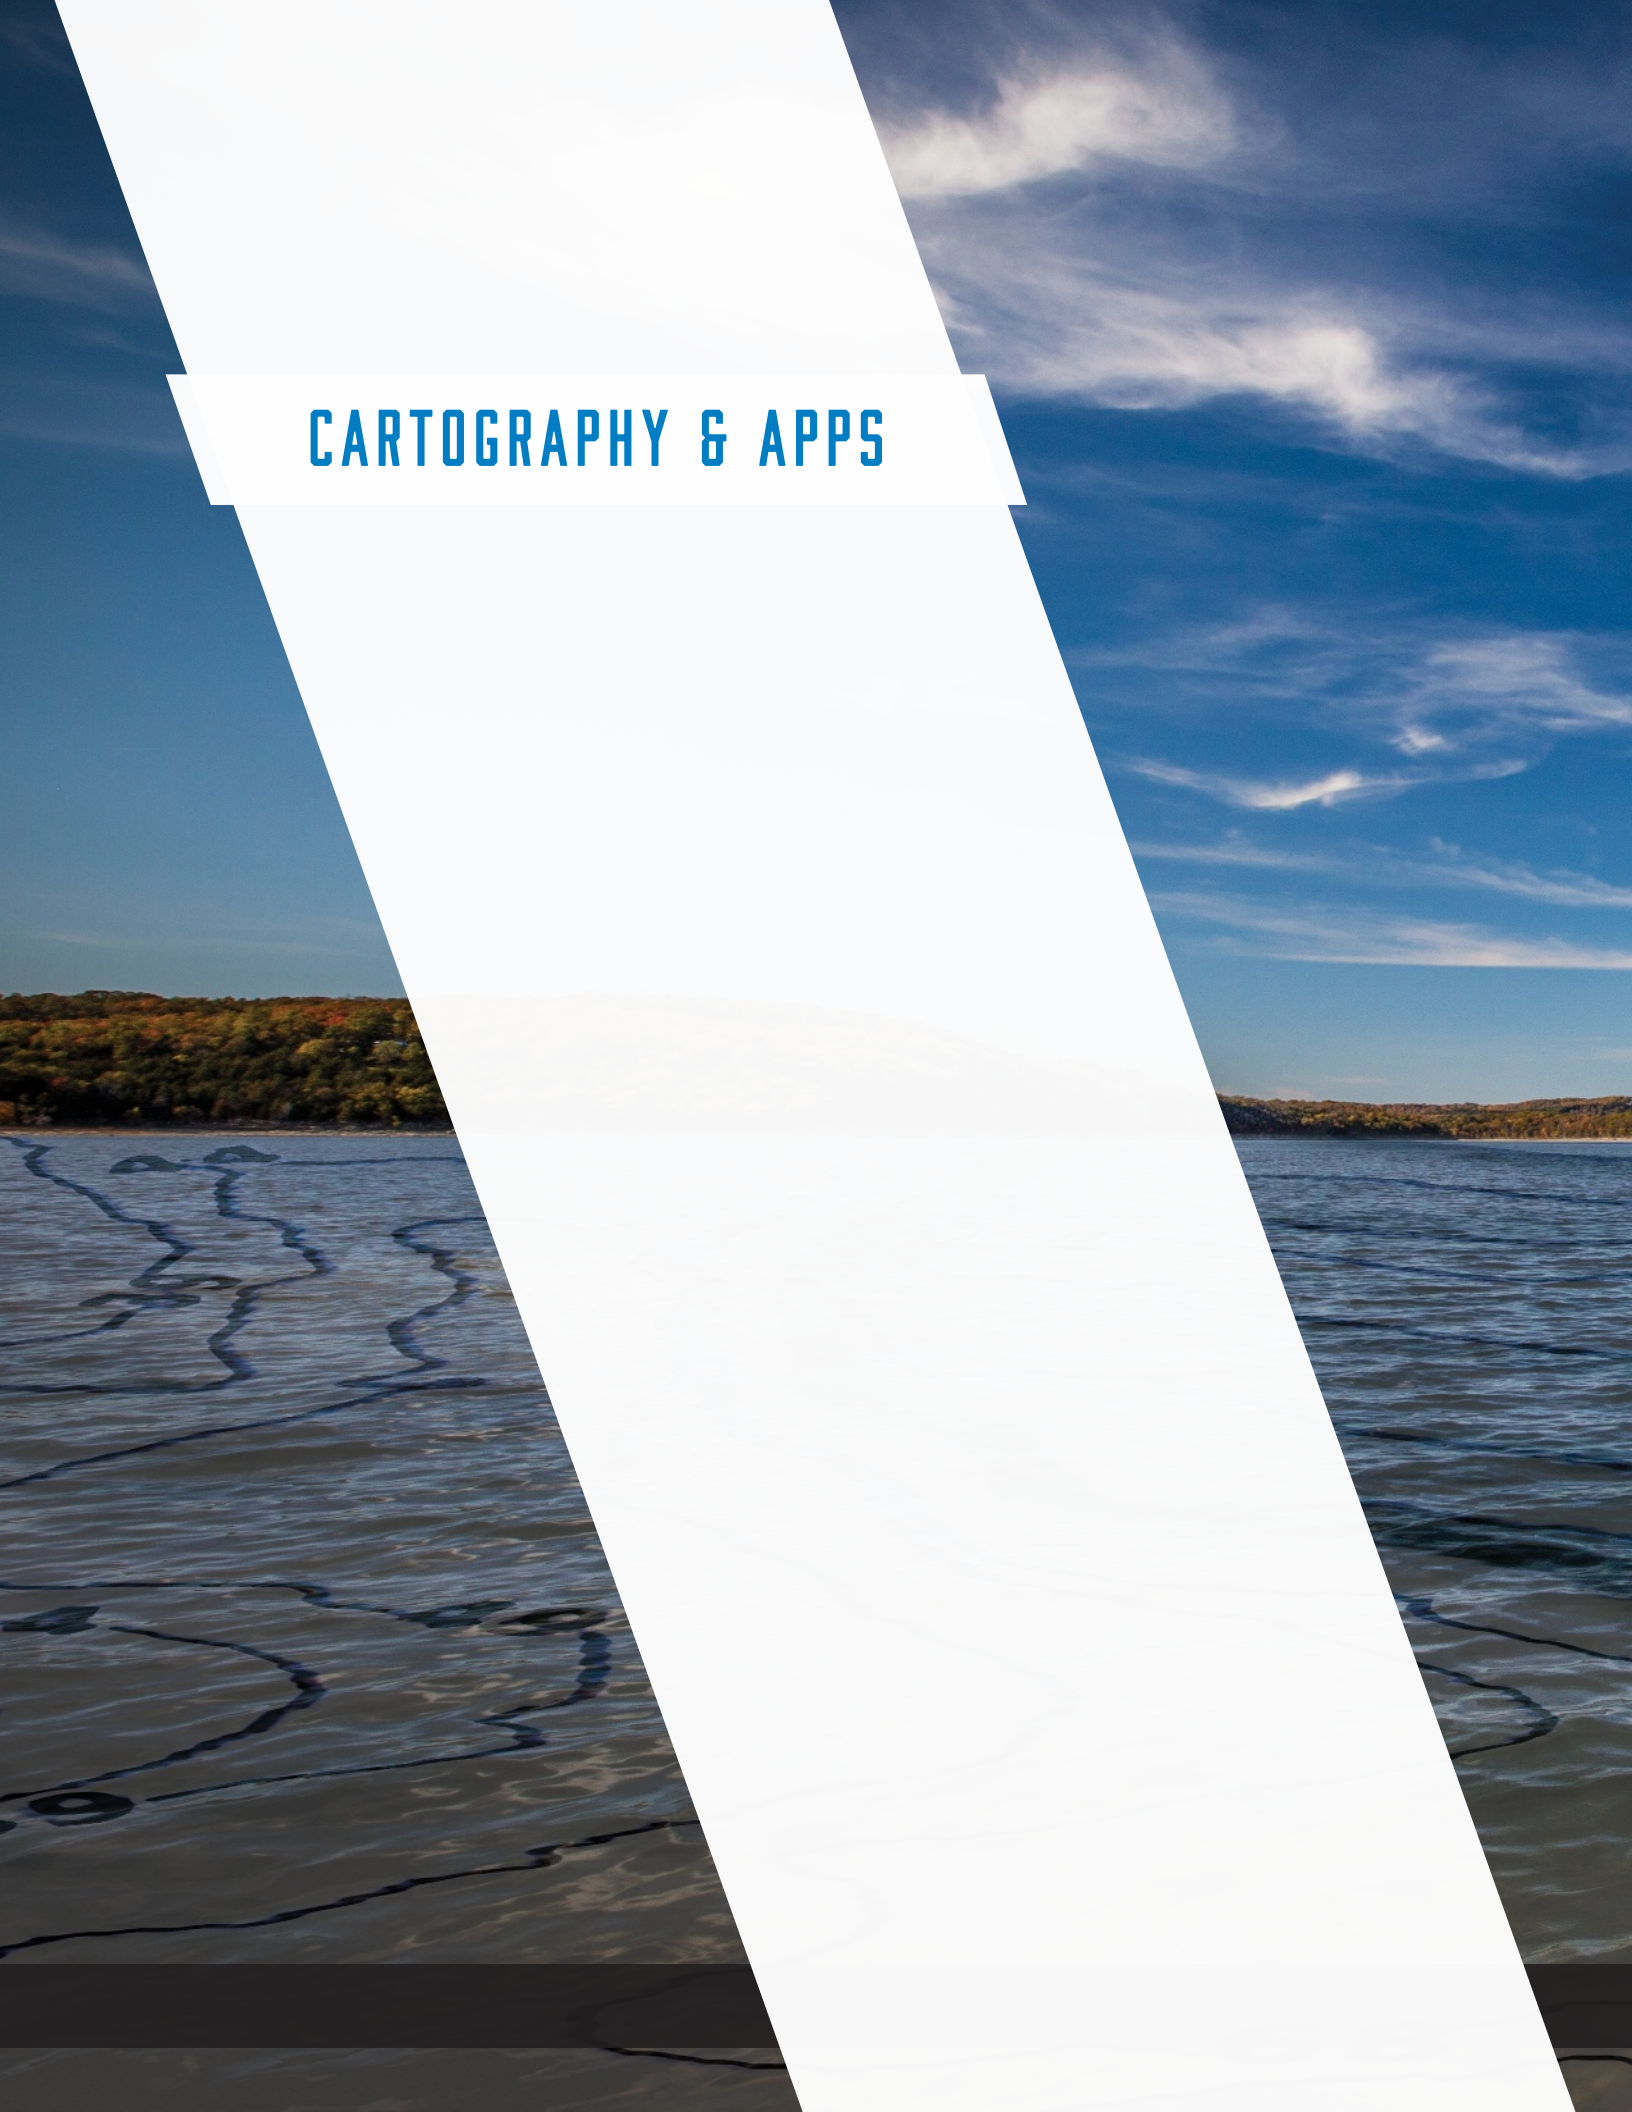

Kayak Mount

Designed to work with all current echo, echoMAP™ DV chartplotter/sonar combos plus new STRIKER fishfinders and echoMAP CHIRP DV chartplotter/sonar combos. Provides a versatile, easy-to-install mounting solution. Compatible with Garmin HD-ID™ traditional sonar and CHIRP DownVü scanning sonar transducers.

Portable

Take your fishfinder anywhere with our portable kit that protects and carries any sized STRIKER fishfinder with GPS. It's perfect for kayak, canoe or ice fishing. It includes a sealed, rechargeable battery with charger, built-in transducer cable management and storage, and suction cup transducer mount and float.

CARTOGRAPHY & APPS

Customers who purchase a new preprogrammed Garmin LakeVü™ HD, LakeVü HD Ultra, BlueChart® g2, or g2 Vision® microSD™ card are entitled to 1 free update1 of the newest version of charts. If eligible, customers can update cards using our website. Updated charts will be for the same (or equivalent2) region as the original purchase.

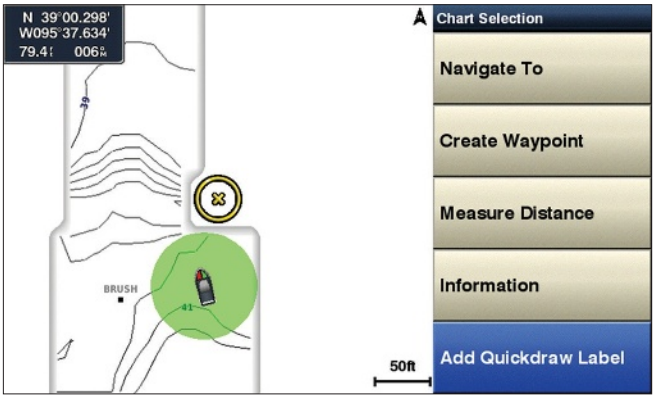

QUICKDRAW
CONTOURS
NEW
Quickdraw Contours
YAMAHA
90
FOUR STROKE
FOUR STROKE

Now you can instantly create HD fishing maps with 1′ contours of nearly any body of water on the screen of your compatible Garmin chartplotter. More importantly, these are your maps. You don't have to send anything in and wait— results appear instantly on your chartplotter screen. Share them if you wish or keep to yourself. You own them. The free, easy-to-use Quickdraw Contours software requires no special surveying expertise. All you do is fish while it creates maps. Use with any Garmin Panoptix™, any HD-ID™, any CHIRP-enabled, Garmin DownVü™ transducer or NMEA 2000® compatible depth transducer. If more than 1 sonar device is connected onboard, the most capable sonar device will automatically be chosen. The better the transducer used, the more detailed the map content can be. It's absolutely amazing what you can achieve with a Panoptix transducer! Map data can be captured on any SD™ card, including Garmin LakeVü HD Ultra, BlueChart® g2 or BlueChart g2 Vision®.

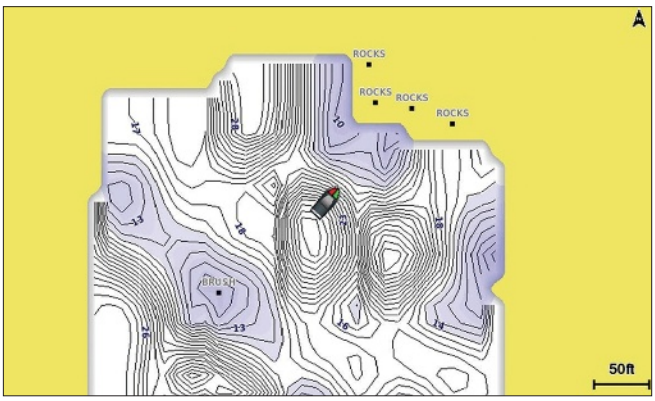

Quickly see where you have been:

Quickdraw Contours shows where you have been on the water. You can easily see where you have mapped usable depth information and where you have gaps to fill.

Add labels to points of interest:

Mark and label navaids, timber, brush piles, favorite fishing spots, submerged features, docks, ramps, any point of interest you want to remember on your map.

Your Quickdraw Contours maps are accurate:

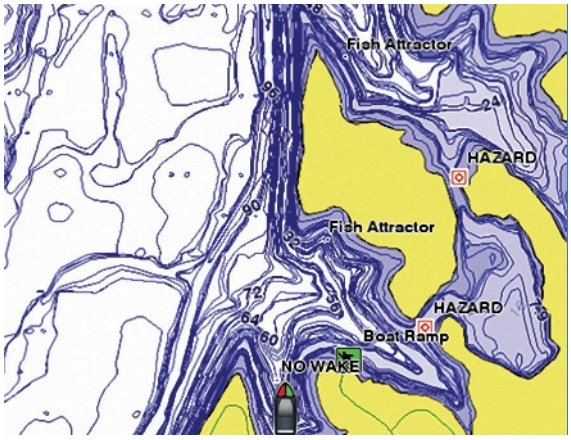

You will be amazed how easy it is to create your very own HD lake maps with 1′ contours. The better your transducer, the more detailed your maps. Imagine being able to see the bottom contours of your favorite farm pond, river or small lake, any unmapped body of water you like to fish, fresh or salt!

LAKEVÜ HD SERIES

LakeVü HD

- Over 17,000 U.S. lakes, rivers and reservoirs
- Now with 13,000 HD lakes with 1' contours shoreline to shoreline
- Interstates, highways, general roads and bridges
- Designated fishing areas
- Points of interest like docks, boat ramps, marinas and campgrounds
- Underwater features such as riverbeds, bridges, roads, fish attractors and potential hazards
- Shallow Water Shading that lets you input and shade a minimum depth
- Depth Range Shading for up to 10 ranges

LakeVü HD Part no: 010-C1087-00

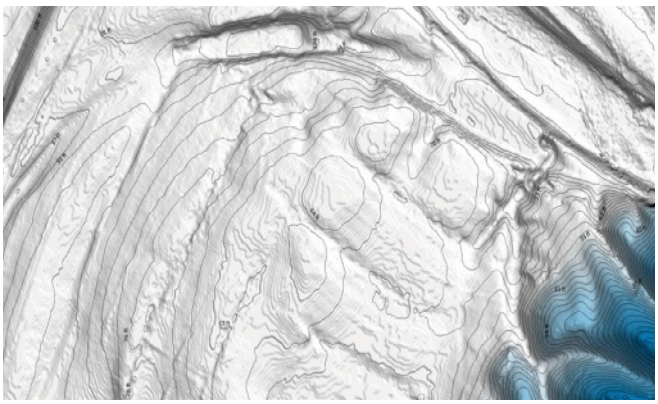

LakeVü HD Ultra with MaxDef Lakes

We recently set out on lakes throughout the United States with our own fleet of survey boats with special sonar technologies to create our own, exclusive ultra-high detail maps. A level of detail you have never seen before on any mapping product. We started with the most popular fishing lakes and are cruising around the country adding more lakes all the time.

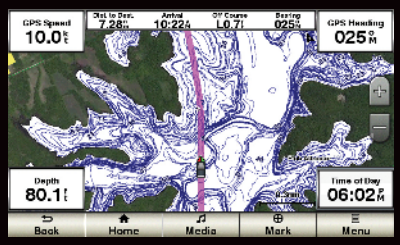

LakeVü HD Ultra includes everything available with LakeVü HD and adds these special features:

- Over 99 exclusive Garmin surveyed MaxDef lakes that are far more accurate, include sonar imagery, plus surface and side scan photos
- High-resolution relief shading on 13,000 HD lakes
- 3-D FishEye and 3-D MarinerEye perspective views
- Dynamic Lake Level setting adjusts maps based on current water levels on 13,000 HD lakes
- Patented Garmin Auto Guidance recommends the best path to a destination on 13,000 HD lakes
- Depth Range shading for up to 10 ranges to view your target depth at a glance on 13,000 HD lakes
- Satellite photos for enhanced situational awareness on 13,000 HD lakes

Auto Guidance

Garmin Auto Guidance automatically provides a visual path that avoids bridges, shallow water and other charted obstructions.

Depth Range Shading

Displays high-resolution Depth Range Shading to view your designated target depth

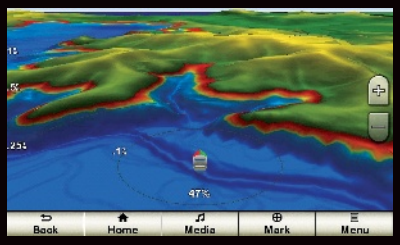

Dynamic Lake Level

Allows you to adjust charts based on current water levels

Sonar Imagery

Available with LakeVü HD Ultra gives a nearly photographic view of the bottom. Actually depicts areas with hard or soft bottom surfaces.

MarinerEye View

Provides a 3-D representation of the surrounding area both above and below the waterline.

Relief Shading

High resolution relief shading adds visual depth to the 2-D map making it easier to read.

Canada LakeVü HD

With maps of more than 13,500 Canadian lakes – many with 1-foot contours throughout – this high definition-mapping product brings new levels of detail to your chartplotter.

- Contains more than 4,800 HD lakes with 1-foot contours shore-to-shore in Alberta, British Columbia, Nova Scotia, Ontario, Quebec, Saskatchewan and Yukon provinces
- Includes coverage for the Great Lakes and Trent Severn Waterway
- Displays detailed shorelines, coastlines, streams, channels and fishing locations
- Includes underwater features, such as river beds and fish attractors
- Offers Shallow Water Shading — you input and shade your minimum depth to help you avoid running aground
- Depth Range Shading for up to 10 ranges

Canada LakeVü HD Ultra

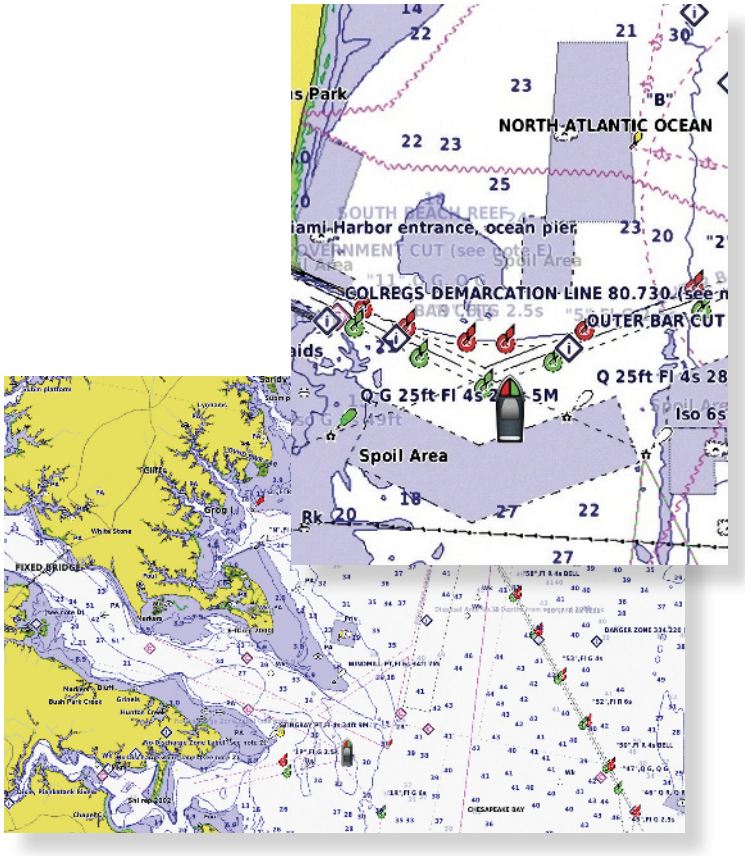

These are the most detailed freshwater Canada fishing maps ever. In addition to providing everything available with Canada LakeVü HD, including the more than 13,500 lakes, of which over 4,800 HD lakes, and special features, these maps also give you the following special advantages:

- Auto Guidance shows the best path to a destination
- Satellite imagery provides enhanced situational awareness
- High-resolution Relief Shading adds visual depth
- Depth Range shading for up to 10 ranges to view your target depth at a glance
- Dynamic Lake Level setting adjusts maps based on current water levels
- 3-D perspectives shows you terrain above and below the waterline

BLUECHART® HD SERIES NEW

BlueChart® g2 HD

- Seamless chart presentation with 1-foot HD contours
- Vector object-oriented data
- Shaded depth contours and intertidal zones with spot soundings
- Port plans
- Tidal stations for selected countries
- Aids to navigation with view range and coverage, including light sector information
- Wrecks, restricted areas, anchorages and obstructions
- Tidal current graphs
- 2-D or 3-D map perspective view
- Marina points of interest and slipways
- Full bathymetric fishing charts provide detailed contours
- HD contours provide a more accurate depiction of bottom structure for improved fishing charts and navigation in swamps, canals and port plans
- Available as accessory cards or via download; each region sold separately

BlueChart® g2 Vision® HD

Includes everything available with BlueChart g2 and adds:

- Garmin Auto Guidance 3.0 technology that quickly searches relevant charts to suggest a course according to your boat's dimensions and creates a visual path avoiding low bridges, shallow water and other charted obstructions
- Garmin Auto Guidance 3.0 also provides navigational solutions, such as entering and exiting marinas — regardless of the depth of water — with a path indicating where guidance is not conforming to user settings
- Aerial photos of ports, marinas, bridges and navigational landmarks
- Realistic "view from space" high-resolution satellite imagery
- 3-D FishEye and 3-D MarinerEye view
- Detailed coastal roads up to 5 miles inland (non-routable)
- Points of interest such as restaurants, lodging, entertainment and more
- Tidal current flow overlay
- Sold separately

FishEye view

3-D perspective below the waterline, showing depth and contours based on bathymetric chart data.

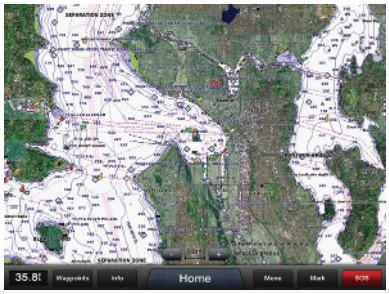

Auto Guidance 3.0

Provides point-to-point guidance and navigational solutions, such as entering and exiting marinas, regardless of water depth.

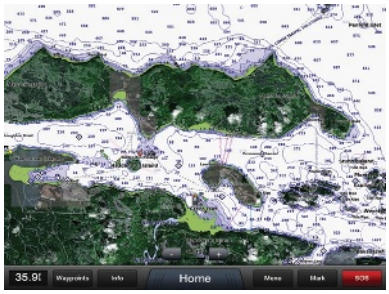

Aerial photos

The photos provide a realistic and detailed picture of harbors, marinas, navigation channels, landmarks and much more.

Information

Tides, currents, harbor information and road maps (coastal areas), etc.

Satellite images

Satellite images that can be laid over the traditional chart.

MarinerEye view

Marine chart in a 3-D perspective that provides an overview of your position for fast, simple and reliable navigation.

CARTOGRAPHY & APPS

Free Garmin Helm™ App

Garmin Helm is a free app that provides enhanced situational awareness for the mariner. It allows you to view and control your compatible GPSMAP® Series combos, chartplotters and GPSMAP 8000 Glass Helm series (see compatible devices) from an iPhone®, iPad® or Android™ device. In multiple GPSMAP 7400/7600 and GPSMAP 8000 Glass Helm series chartplotter installations, Garmin Helm provides thumbnail screen previews of each chartplotter screen to allow easy selection. You can even use multiple mobile devices simultaneously.

- View and control chartplotters from iPhone, iPad or Android device
- Maintain enhanced situational awareness for mariners
- Easily switch between chartplotters using thumbnail screen preview
- Works seamlessly with SmartMode™ sto group plotter thumbnails by station
- Use simple permission settings on chartplotter to allow or block app access
- Use multiple mobile devices simultaneously
- Compatible with GPSMAP 547, 741, 840xs, 1040xs, and 7400/7600 series.
- Compatible with Garmin GPSMAP 8000 Glass Helm series with addition of optional Garmin Marine Wi-Fi Adapter (sold separately)
- An iPhone or iPad can record a movie of your chartplotter screen to share

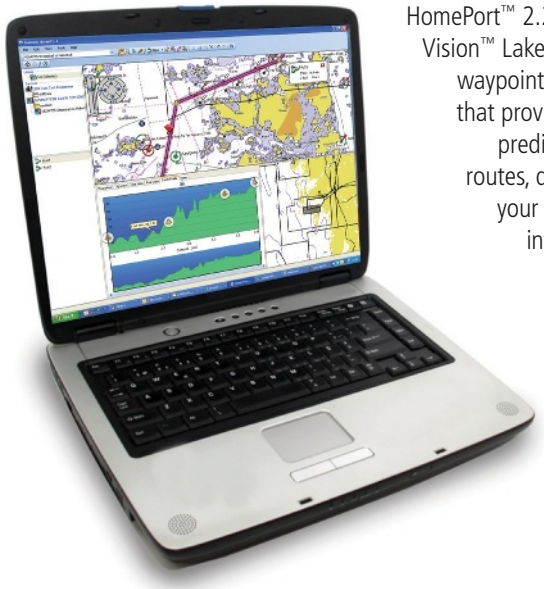

Available on the App Store

ANDROID APP ON Google play

iPhone and iPad are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc.

Wi-Fi is a registered trademark of the Wi-Fi Alliance.

Free HomePort™ Planning Program

HomePort™ 2.2 makes it easy to plan your next voyage using your BlueChart® g2, BlueChart® g2 Vision™ LakeVü™ HD or LakeVü HD Ultra map data on your computer. In addition to managing waypoints, routes and tracks, HomePort is also fully integrated with ActiveCaptain™ content that provides marina data, reviews, local knowledge, anchorages, and hazards. Plus, it helps predict fuel usage, tides, depth profiles, and more. You can quickly create point-to-point routes, determine distance and bearing measurements between checkpoints, and calculate your estimated travel time for each leg of your journey. Sonar playback capability stores information from past voyages and fishing trips right on your computer. Once you've planned your trip, it's easy to transfer the data from the computer back to your chartplotter via plug-in microSD™/SD™ data card. It even shares data with quatix™, the high-sensitivity GPS navigator marine watch from Garmin.

Mac Universal Compatible with Windows 7

Add GLO™ receiver for GPS + GLONASS accuracy

A GLO GPS/GLONASS receiver connects via Bluetooth® technology to give your iPad®, iPhone® or Android™ device access to precise position information. Using information from both the GPS and GLONASS satellite constellations, it can connect to 24 more satellites than devices that rely on GPS alone. This allows the GLO receiver to lock on to satellites approximately 20 percent faster and remain connected even at high speed. The GLO receiver also updates its position information 10 times per second — that's up to 10 times more often than the GPS receivers in most mobile devices. Battery can last 12 hours and recharges with included USB cable or optional 12/24 volt cigarette lighter adapter. An optional friction mount is available to keep the receiver safe and in full view of satellites.

GLO Part no: 010-01055-15

BlueChart Mobile 2.0

BlueChart Mobile 2.0 can provide a unique experience for boaters by providing worldwide weather to Garmin chartplotters via a seamless integration with a cellular-enabled Apple device streaming weather onto your chartplotter screen. Basic weather information is available for no charge and premium weather, including radar, is available as an optional in-app purchase.

Available on the App Store

COMBOS

GPSMAP® 7400/7600xsv SERIES

Fully network capable chartplotter/sonar combos

Designed for sportsfishermen and cruisers who demand high performance, ease of operation, and feature integration in a multi-touch widescreen chartplotter/sonar combo. These premium units feature built-in advanced 1kW dual CHIRP sonar, the most sophisticated sonar technology available for the fishing and boating public. They also include both Garmin CHIRP DownVü™ and Garmin CHIRP SideVü™ scanning sonar that provide the clearest scanning sonar images on the water. View nearly photographic sonar images of fish and structure that pass below and to the sides of your boat. Suitable for use in salt or freshwater.

Minn Kota is a registered trademark of Johnson Outdoors Marine Electronics, Inc. iPhone and iPad are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android and Google Play are trademarks of Google Inc. Wi-Fi is a registered trademark of the Wi-Fi Alliance.

SERIES FEATURES >>>

- Available with high-performance, high-resolution 7", 8", 10", 12" or 16" multi-touch widescreen displays
- 7600 series available with both preloaded BlueChart g2 charts for the coastal US and LakeVü HD maps covering over 17,000 lakes of which 13,000 are HD lakes with 1' contours shore to shore
- 7400 series comes with worldwide basemap
- Built-in high performance 1kW true dual CHIRP sonar solution (8,000W peak to peak)
- Built-in CHIRP SideVü scanning sonar with the clearest images to the sides of your boat
- Built-in CHIRP DownVü scanning sonar with the clearest images below your boat
- Built-in HD-ID sonar
- Supports 50kHz/200kHz, 77kHz/200kHz and Minn Kota® and MotorGuide® trolling motor transducers.
- Supports Panoptix™ All-Seeing Sonar
- Integrated sonar capabilities allow simultaneous sharing of all internal sonar
- Purchase transducer separately. Offer a wide variety of transducers for any type of installation.
- Internal 10 Hz GPS updates position and heading 10 times per second
- Fully network capable for Garmin Marine Network and NMEA 2000. Supports NMEA 0183
- Supports radar, autopilot, instruments, multiple screens, FUSION-Link™, sensors, black box sonar, digital switching, thermal cameras, weather, GRID and more
- Built-in Wi-Fi® / ANT for use with Garmin Helm™, BlueChart® Mobile and wireless remote control
- Bail Mount Included
- FLIR® thermal camera support
- IP Camera support
- Video input – 1 composite video (7" & 8"); 2 composite video (10", 12" & 16"); Add DVI-D video output (for 10", 12" & 16")
- Ethernet ports - 2
- Media integration- Fusion-Link™
- 2 SD™ card slots makes it easy to add optional mapping (7" has 2 mico SD card slots)
- Supports optional mapping including BlueChart® g2 Vision® HD charts with exclusive Garmin Auto Guidance
- Supports LakeVü™ HD & LakeVü™ HD Ultra with exclusive Garmin Auto Guidance
- Supports User Data Sharing
- Download free Garmin Quickdraw™ Contours map creation software update to create your own HD fishing maps with 1' countours

GPSMAP® 1040xs/ 840xs

8″ and 10″ keyed combo with CHIRP scanning sonar and radar support

The 8″ and 10″ color GPSMAP 840xs and GPSMAP 1040xs keyed chartplotter/sonar combos come preloaded with both LakeVü HD U.S. lakes and BlueChart® g2 U.S. coastal mapping. They are all available with an all-in-one transducer for advanced 77/200 kHz HD-ID™ and Garmin DownVü™ with CHIRP technology for a nearly photographic view under your boat. Each features built-in 10 Hz GPS/GLONASS that updates position and heading 10 times per second. All support your choice of compatible Garmin transducers, including 50/200 kHz, 77/200 kHz, and CHIRP. For an ultra clear sonar picture of objects, structure and fish that pass below (DownVü) and to the sides (SideVü) of the boat, add the optional GCV™ 10 black box sonar for both Garmin DownVü™ and Garmin SideVü™ scanning sonar with CHIRP technology (sold separately). Sonar-recording capability saves digital sonar information. Special supported sailing features include laylines, enhanced wind rose, heading and course-over-ground lines, and true wind data fields. Networking capabilities allow you to share features with other compatible GPSMAP units such as radar, GCV10 DownVü and SideVü scanning sonar, supplemental maps, and user data such as waypoints, routes, and tracks. Wirelessly connect to compatible Apple® or Android® mobile digital devices for BlueChart® Mobile, Garmin Helm™. NMEA 2000® support. Suitable for use in salt or freshwater.

GPSMAP® 741xs

7" touchscreen combo scanning sonar and radar support

The popular Garmin GPSMAP 741xs chartplotter/sonar combo includes a 7" touchscreen with pinch-to-zoom, BlueChart® g2 charts for the coastal US and LakeVü HD maps covering over 17,000 lakes of which 13,000 are HD lakes with 1' contours shore to shore, and built-in HD-ID™ sonar. Supports a wide selection of optional Garmin transducers, including 50/200 kHz, 77/200 kHz, Garmin DownVü™ scanning sonar with CHIRP technology, and CHIRP. Also supports GCV™ 10 black box sonar that adds both DownVü and SideVü scanning sonar with CHIRP technology (sold separately). Internal high-sensitivity 10Hz GPS/GLONASS receiver updates position and heading 10 times per second. Sailing features include laylines, enhanced wind rose, heading and course-over-ground lines, and true wind data fields and tide/current/time slider. Gauge displays are designed to provide important need-to-know information at a glance. Garmin Marine Network and NMEA 2000® support for autopilot capability, radar, engine data, SiriusXM® weather, media integration, and more.

SERIES FEATURES >>>

- 7" WVGA color touchscreen with pinch-to-zoom
- Includes both BlueChart g2 US coastal and LakeVü HD cartography
- Built-in HD-ID™ sonar supports a wide selection of optional Garmin transducers, including 50/200 kHz, 77/200 kHz, Garmin DownVü™ scanning sonar with CHIRP technology, and CHIRP
- Transmit power: 1kW RMS (8000W peak-to-peak); CHIRP: 600W RMS (4800W peak-to-peak)
- Supports GCV™ 10 black box sonar that adds both Garmin DownVü™ and Garmin SideVü™ scanning sonar with CHIRP technology (sold separately)
- Internal high-sensitivity 10Hz GPS/GLONASS updates position and heading 10 times per second
- Compatible with BlueChart® g2 Vision® HD and LakeVü HD Ultra (sold separately)
- Supports optional external GPS for flexible mounting options
- NMEA 2000® support for autopilot capability, radar, engine data, SiriusXM weather, media integration and more
- Networked combos can share their internal sonar with any other compatible device
- 1 composite video input
- Sonar recording
- Wirelessly connect to a compatible smartphones or tablet with BlueChart® Mobile
- View and control chartplotter from a compatible smartphone or tablet with Garmin Helm app
- 2 microSD® data card slots for optional map data
- Flat, flush and bail mounting options
- Download free Garmin Quickdraw™ Contours map creation software update to create your own HD fishing maps with 1' countours

GPSMAP® 547xs

Our Premier 5" networking combo

Big features in a compact space. Our networking Garmin GPSMAP® 547xs chartplotter/sonar combo has a 5" VGA display and comes preloaded with both BlueChart g2 charts for the coastal US and LakeVü HD maps covering over 17,000 lakes of which 13,000 are HD lakes with 1' contours shore to shore, and built-in HD-ID™ sonar. Supports a wide selection of optional Garmin transducers, including 50/200 kHz, 77/200 kHz, Garmin DownVü™ scanning sonar with CHIRP technology, and CHIRP. Networked combos can share internal sonar with any other device on the network. Internal high-sensitivity 10Hz GPS/GLONASS receiver updates position and heading 10 times per second to display fluid vessel movement. Sonar recording saves digital information. NMEA 2000® support for engine data, sensors, VHF, autopilot and more. Built-in wireless connectivity allows you to connect to and access marine-specific apps via smartphone or tablet.

SERIES FEATURES >>>

- 5" VGA color display
- Includes preloaded BlueChart® g2 and LakeVü HD maps
- Built-in HD-ID™ sonar supports a wide selection of optional Garmin transducers, including 50/200 kHz, 77/200 kHz, Garmin DownVü™ scanning sonar with CHIRP technology, and CHIRP
- Transmit power: 1kW RMS (8000W peak-to-peak); CHIRP: 600W RMS (4800W peak-to-peak)
- Internal high-sensitivity 10Hz GPS/GLONASS updates position and heading 10 times per second
- Compatible with BlueChart® g2 Vision® HD and LakeVü HD Ultra (sold separately)
- Supports optional external GPS for flexible mounting options
- NMEA 2000® support for engine data, sensors, VHF, autopilot and more
- Networked combos can share their internal sonar with any other compatible device
- Sonar recording
- Wirelessly connect to iPhone® or iPad® with BlueChart® Mobile
- View and control chartplotter from a smartphone or tablet with Garmin Helm app
- 2 microSD® data card slots for optional map data
- Flat, flush and bail mounting options
- Download free Garmin Quickdraw™ Contours map creation software update to create your own HD fishing maps with 1' countours

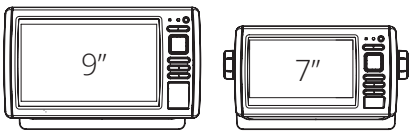

ECHOMAP™ CHIRP SV SERIES

NEW

The clarity of CHIRP sonar and Garmin CHIRP DownVü™ and CHIRP SideVü™.

It's time you started fishing with the power of CHIRP sonar. The easy-to-install, easy-to-use 7- and 9-inch echoMAP CHIRP SV series chartplotter/sonar combos includes a transducer for high wide CHIRP sonar and Garmin CHIRP SideVü™ and Garmin CHIRP DownVü™, the clearest scanning sonar on the water. It even supports Panoptix™ sonar. Also includes pre-installed Quickdraw Contours software to instantly create your very own HD maps with 1-foot contours on screen as you fish. Preloaded with either LakeVü™ HD maps or BlueChart® g2 charts. Internal 5 Hz GPS updates position and heading 5 times per second. It even provides NMEA 2000® support for engine data, sensors, autopilots and more. Cords plug directly into the mount, allowing you to quickly install and remove your device from power and mount. Transom and trolling motor mounts included.

SERIES FEATURES >>>

- Available with 7" or 9" color display with keypad control
- Built-in support for high wide CHIRP sonar and Garmin CHIRP SideVü™ and Garmin CHIRP DownVü™, the clearest scanning sonars on the water
- Panoptix™ all-seeing sonar support (transducer not included)
- Preloaded with your choice of BlueChart® g2 charts for the coastal U.S. or LakeVü™ HD maps covering 17,000 total lakes, of which 13,000 are HD lakes with 1-foot contours shore to shore
- Includes Quickdraw Contours custom HD map creation software
- Internal 5 Hz GPS updates position and heading 5 times per second
- Transom and trolling motor transducer mount included
- NMEA 2000® support for engine data, sensors, autopilots and more
- Tilting quick disconnect mount
- microSD™ card slot makes it easy to add optional mapping
- Supports optional mapping, including LakeVü HD Ultra maps with exclusive Garmin Auto Guidance
- Supports BlueChart® g2 Vision® HD charts with exclusive Garmin Auto Guidance
- Auto Guidance 3.0 capable
- Share waypoints with user data sharing cable

FISHFINDERS WITH GPS

Bill Dance
GARMIN

STRIKER™ SERIES

NEW

Finding fish is easier than ever with STRIKER fishfinders with built-in GPS. And now, you not only find fish, you can mark the spot! Mark and return to your favorite fishing spots, boat ramps and docks. All models feature CHIRP (77/200 kHz) transducer; 7sv features high wide CHIRP. Transom and trolling motor mounting hardware, cable and a tilt/swivel mount included. Share your favorite waypoints and routes with other STRIKER and echoMAP™ chartplotter combos. Smooth Scaling™ graphics provide uninterrupted imagery when switching between depth-range scales. Sonar history rewind allows you to scroll back through sonar images to mark waypoints you originally may have missed. Plus, it has a built-in flasher and displays speed data.

STRIKER™ 7SV

- Easy-to-use 7-inch color fishfinder with built-in, high-sensitivity GPS and CHIRP sonar, including CHIRP DownVü™ and CHIRP SideVü™ scanning sonar
- Includes Garmin GT52 transducer with high wide CHIRP 250W, 455/800 kHz CHIRP DownVü and CHIRP SideVü with 350 W power
- Upgrade to high-performance GT50 or GT51 Garmin CHIRP technology for crystal-clear sonar images with even more remarkable target separation and resolution from shallow to deeper depths

STRIKER™ 7DV

- Easy-to-use 7-inch color fishfinder with built-in, high-sensitivity GPS and CHIRP DownVü scanning sonar
- Includes Garmin GT20 Transducer – CHIRP (77/200 kHz) 500W (RMS) 4,000 peak to peak with 455/800 kHz CHIRP DownVü with 300W power
- Upgrade to a high performance CHIRP transducer with a GT22 or GT23 (sold separately)

STRIKER™ 5DV

- Easy-to-use 5-inch color fishfinder with built-in, high-sensitivity GPS and CHIRP DownVü scanning sonar
- Includes Garmin GT20 Transducer – CHIRP (77/200 kHz) 500W (RMS) 4,000 peak to peak with 455/800 kHz CHIRP DownVü with 300W power
- Upgrade to a high performance CHIRP transducer with a GT22 or GT23 (sold separately)

STRIKER™ 4DV

- Easy-to-use 3.5-inch color fishfinder with built-in, high-sensitivity GPS and CHIRP DownVü scanning sonar
- Includes Garmin GT20 Transducer – CHIRP (77/200 kHz) 300W (RMS) 2,400 peak to peak with 455/800 kHz CHIRP DownVü with 300W power
- Upgrade to a high performance CHIRP transducer with a GT22 or GT23 (sold separately)

STRIKER™ 4 PORTABLE KIT

- Easy-to-use 3.5-inch color fishfinder with built-in, high-sensitivity GPS
- Portable carrying case is perfect for kayak, canoe or ice fishing
- Includes a sealed, rechargeable battery with charger, built-in transducer cable management and storage, and suction cup transducer mount and float
- Includes CHIRP (77/200 kHz) sonar transducer; transmit power (200 W RMS)/(1,600 W Peak-To-Peak)
- Upgrade to a high performance CHIRP transducer with a GT8 or GT15 (sold separately)

STRIKER™ 4

- Easy-to-use 3.5-inch color fishfinder with built-in, high-sensitivity GPS
- Includes CHIRP (77/200 kHz) sonar transducer; transmit power (200 W RMS)/(1,600 W Peak-To-Peak)
- Upgrade to a high performance CHIRP transducer with a GT8 or GT15 (sold separately)

HANDHELDS & WEARABLES

QUATIX™ 3

NEW

This is the GPS smartwatch that belongs on the water. Equipped with important cruising, fishing and sailing capabilities, its appearance commands attention, even on land. More than a watch, it's a wearable instrument that streams data from compatible Garmin electronics. Plus, it has an anchor watch to warn you of drifting, fish catch counter and competition timer, and features a race timer, start line and tack assist for sailors. Delivers smart notifications for emails, text messages and more. It can even control your FUSION® stereo system. Also includes activity tracking[1] and multisport functions for running, hiking, swimming and more.

- More than a watch, it's a wearable instrument that streams data from compatible Garmin electronics
- 1.2-inch high-resolution, sunlight-readable Garmin Chroma Display™ technology
- Stainless steel EXO™ antenna with high-sensitivity, dual GPS and GLONASS satellite reception
- Water-rated to 10 ATM (100 meters)
- Battery performance: up to 20 hours in GPS mode, 50 hours in UltraTrac™ battery saver mode and 6 weeks in watch mode (depending on settings)
- High-strength, scratch-resistant domed sapphire lens
- Easy-to-use marine apps provide local tide data, sail racing data, including race timer, start line and tack assist, fish catch counter and competition timer, anchor watch, alarm clock and more
- Standalone Man Overboard (MOB) button allows the user to quickly save a location and navigate back to it
- Connect IQ™ platform compatibility to download apps to watch, including customized watch faces and data field configurations
- Download an app from Connect IQ that enables control of FUSION® stereo system
- Delivers smart notifications to let you see emails, texts and other alerts right on your watch
- Paddle sports functions allow you to track strokes and cadence and create an efficiency score
- Provides surfing tides and customizable activities feature
- Multisport functions for running, hiking, swimming and more
- Activity tracking[1] feature counts steps taken, calories burned and stairs climbed
- Connected features include automatic uploads, live tracking and social media sharing through our free Garmin Connect™ and Garmin Connect™ Mobile online fitness applications, plus optional downloads of unique apps for watch/phone integration
- Remotely control both the music from your phone and your VIRB® XE action camera
- Find My Phone and Find My Watch capabilities
- Sleep tracking monitors your total sleep and periods of movement or restful sleep
- Wireless connectivity support for automatic uploads through a wireless network

GARMIN

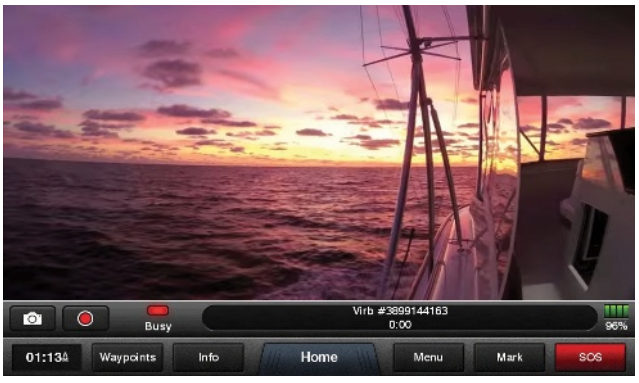

VIRB

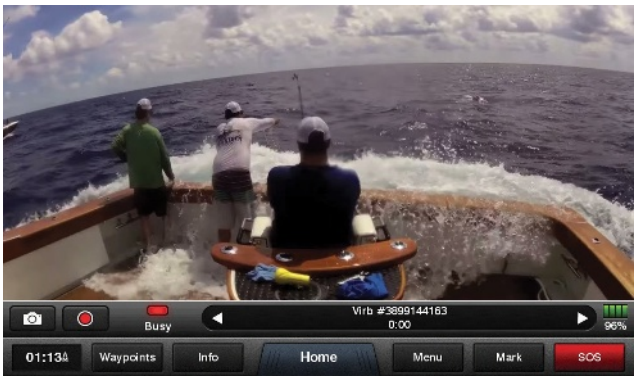

HD Action Cameras VIRB® XE | VIRB® X

Tell a better fish story.

With the Garmin VIRB® XE and VIRB® X we have truly created a line of HD action cameras that combine ease of use, uncompromising durability, high HD video recording quality and access to performance data from built-in and external sensors so you can add animated, synced gauges and graphs to your video. More importantly, you can control and stream video from a VIRB X/XE action camera to your GPSMAP® 7400, 7600 or 8000 series chartplotter with a simple software update. In fact, you can stream video from up to 5 VIRB X/XE action cameras and view the video on a compatible marine chartplotter. Device can display 4 video streams at one time. Each VIRB can be named for easy identification. You can also control your VIRB cameras to change VIRB video settings, including aspect ratio, video resolution, frames per second, photo size, field of view and more directly from the marine chartplotter. Send NMEA® 2000 boat information from the chartplotter to VIRB X/XE to be overlaid as G-Metrix™ data on the video using VIRB Edit. Some data requires optional accessories.

VIRB XE features:

For the pro – more control of settings, better resolution and frame rates. Garmin VIRB XE performance action camera shoots rich, high-definition footage at 1080p/60fps. Truly built for action sports and rough conditions, VIRB XE provides gyro based image stabilization and stunning clear 12MP photos at up to 30fps. The rugged, compact camera has a waterproof rating of 50 meters, with no case needed. G-Metrix™ lets you add animated, synchronized gauges and graphs to your video with performance data like speed, g-force and more.

VIRB XE includes: rechargeable battery pack, charging/data cable, flat and curved adhesive mounts, standard and vertical mount adapters, short and long extension arms, short and long screws, wrench, pivoting mount adapter pieces for use with collared mounts (sold separately) and manual

VIRB X features:

HD for all of us, with easy-to-use modes. The Garmin VIRB X action camera shoots rich, high-definition video at 1080p/30fps and 12MP photos at up to 10 frames per second. The rugged, compact camera fits every activity and all conditions with a waterproof rating of 50 meters, with no case needed. VIRB X features an intuitive user menu and one-touch control switch, making it incredibly easy to use. G-Metrix™ creates true excitement by recording video and data at the same time so you can add synched gauges and graphs to your video.

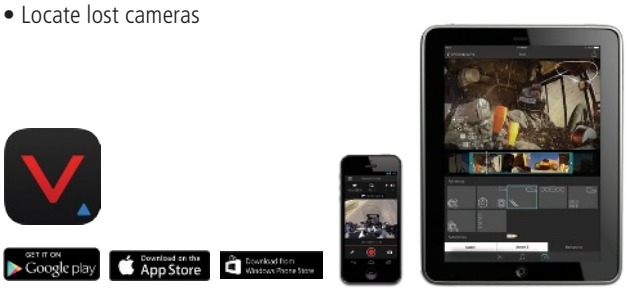

VIRB X includes: rechargeable battery pack, charging/data cable, flat and curved adhesive mounts, standard mount adapter, long screw, wrench, pivoting mount adapter pieces for use with collared mounts (sold separately) and manual

VIRB App:

Free app that turns your compatible smartphone or tablet into a Wi-Fi® remote control for your VIRB X or VIRB XE action camera.

- View and control multiple cameras even while you're recording
- Review and edit captured footage
- Add G-Metrix™ gauges and graphs
- Add music and adjust individual clip volume
- Publish directly to video and social sharing channels
- Locate lost cameras

VIRB Edit:

Free software that automatically generates great, ready-to-share videos of your experiences, thanks to the G-Metrix data collected by VIRB X or VIRB XE.

- Add G-Metrix gauges and graphs to your video
- Video editing tools: trim, split and combine video clips
- Apply slow motion to video clips
- Automatically synchronize video from multiple VIRB X and VIRB XE cameras
- Add music and adjust individual clip volume
- Publish directly to YouTube® or export to computer for easy online sharing
- Design, build and share your own custom performance gauges and graphs
- Locate lost cameras

Rugged Marine VIRB Cable:

Rugged power cable for the VIRB X and XE action cameras. Ensure your action camera is always powered and ready to go with this 10-meter (32-foot) bare wire power cable. The cable works with a power source ranging from 10 V to 30 V DC. When using the cable, change the VIRB X/XE charge mode to manual to prevent it from entering charge mode when plugged in. If this setting is not changed, the device will go into charging mode and will not be able to record video.

HANDHELDS

GPS 73 Handheld Navigator

Easy-to-use handheld navigator with high-sensitivity GPS marks and stores waypoints and tracks so you can navigate right back to them again. SailAssist for GPS 73 includes virtual starting line, heading line, countdown timers and tack assist. Provides sunrise/sunset, estimated time of arrival, other calculations and marine data. And it floats!

NEW

UNIT FEATURES >>>

- High-sensitivity GPS marks and stores 1,000 waypoints and 100 tracks
- Marks your favorite locations to easily navigate back to again
- SailAssist for GPS 73 includes virtual starting line, heading line, countdown timers and tack assist
- Sunrise/sunset, estimated time of arrival, other calculations and marine data
- Built-in backlight
- Up to 18-hour battery life with 2 AA batteries (sold separately)
- High-contrast monochrome display
- NMEA 0183 Support
- It floats!

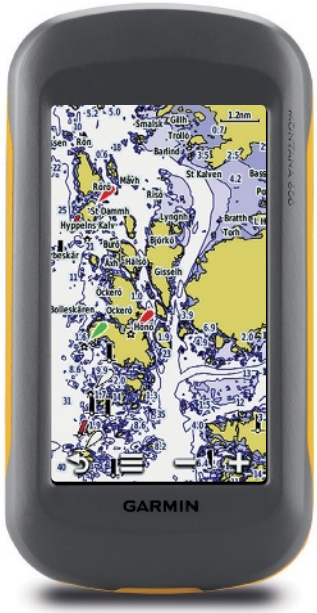

GPSMAP® 78, 78s & 78sc

If you need a high-performance marine-friendly handheld that floats, look to our GPSMAP 78 series. These units offer high-sensitivity GPS receivers with HotFix™ in a new contemporary design. They feature bright, sunlight readable, color displays and can save up to 2,000 waypoints/favorites/ locations and up to 200 routes. The GPSMAP 78 and 78s come preloaded with a worldwide shaded-relief basemap. The GPSMAP 78sc is preloaded with U.S. coastal marine charts. All support Garmin Custom Maps, BirdsEye Satellite Imagery, and have a NMEA 0183 serial interface, plus a dedicated MOB (man-over-board) button. And it floats.

Montana® Marine Bundle

No matter the setting – boat, car, RV, or ATV – Montana is right at home. The Montana marine bundle includes detailed BlueChart® g2 offshore maps for the U.S. Realistic navigation features show everything from shaded depth contours and coastlines to spot soundings, navaids, port plans, wrecks, obstructions, intertidal zones, restricted areas and IALA symbols. All of which looks great on the large 4" screen. The included marine mount includes an integrated power cable and tilts/swivels for optimum viewing at any angle.

UNIT FEATURES >>>

- 4" dual-orientation touchscreen display
- High-sensitivity, WAAS-enabled GPS receiver with HotFix®
- Preloaded with BlueChart g2 for the U.S.
- 3-axis compass and barometric altimeter
- Marine mount, USB cable
- Rugged and waterproof
- 3.5mm audio jack
- Wirelessly share routes, tracks, waypoints and more between compatible units
- microSD™ card slot to load additional maps
- High-speed USB and serial interface
- AC charger
- Includes rechargeable Li-ion battery pack, but can also use replaceable 3 AA batteries
