

Timing Belt Replacement Interval Guide

**Avoid Costly Engine Damage;
Change Your Timing Belt At
The Recommended Interval
Or Every 72 Months,
Which Ever Comes First.**

2010

A Tomkins Company

The World Runs on Gates.

Gates is the global leader in timing belt innovation. Gates global network of technical research and development centers work with virtually every Original Equipment Manufacturer worldwide to build timing belts for new vehicles as they're being designed. It is this strong Original Equipment (OE) relationship that enables us to develop timing system products for the Aftermarket that meet or exceed OE performance specifications. Install the original. Install Gates.

OE Supplier To:

- Acura
- Alfa Romeo
- Audi
- BMW
- Buick
- Cadillac
- Chevrolet
- Chrysler
- Citroën
- Daewoo
- Daihatsu
- Dodge
- Fiat
- Ford
- Honda
- Hyundai
- Infiniti
- Isuzu
- Jaguar
- Kia
- Lancia
- Land Rover
- Lexus
- Mazda
- Mercedes-Benz
- Mini
- Nissan
- Mitsubishi
- Opel
- Peugeot
- Porsche
- Range Rover
- Renault
- Saab
- Scion
- Skoda
- Smart
- Subaru
- Suzuki
- Toyota
- Volkswagen
- Volvo
- And More

UNITTA is Gates in Asia

Gates Unitta Asia Company conducts business throughout all Asian countries and is an OE parts supplier to vehicle manufacturers as well as the Automotive Aftermarket. This global network of design, development and manufacturing capabilities is unmatched by any competitor for both OE and Aftermarket products.

No One Comes Close to Gates.

Today, Gates is the world's largest manufacturer of Timing Belts and Timing Component Kits (TCKs). Import or Domestic, if there is a car in the U.S. with a timing belt in it, we have the replacement part for it. As the OE or OES supplier for virtual every vehicle manufacturer worldwide, you can be confident every time you install Gates. Restore your customers' drive system to factory original condition with Gates Timing Belts and Timing Component Kits.

Timing Belts

Gates timing belts are OE-equivalent or better in service life and performance.

- Aramid reinforced nylon jackets and back side jackets for longer wear.
- High grade HNBR rubber for superior heat and contamination resistance.
- Premium high strength tensile members.
- Unlike some competitors, Gates does not substitute inferior belt constructions for premium constructions specified by the OEM on any application.
- Most extensive coverage in the industry. Import or Domestic.

Timing Component Kits

Why take a chance? With Gates TCKs, you can avoid warranties and comebacks by replacing all critical system components at the same time.

- Popular kits covering over 31 million import applications include actual Original Equipment Tensioners and Idlers.
- Total solution for any application, including Belts, Idler(s), Tensioniers and supporting hardware with detailed installation instruction.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Timing Component Kits with Water Pump

Our Timing Component Kits with Water Pump offer the same OE components as our TCKs with the addition of a water pump. Timing belt driven water pumps should always be replaced when the timing belt is replaced.

- Includes a warranty equal to the OE replacement interval.
- Water Pumps are designed and built for long lasting, efficient cooling.
- Hydraulic tensioners included where available.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Hydraulic Tensioners

For applications with high loads and/or angular vibrations, where a mechanical automatic tensioner can not provide sufficient damping or tensioner movement.

- 100% OE parts.
- Market-leading application coverage.
- Gates tensioner pin set tool (PN#91010) for securing piston.

PowerGrip® Individual Timing Components

Gates PowerGrip® timing components for those who want to replace individual parts.

- Components include automatic, manual and hydraulic tensioners and idler pulleys.
- Only "OE" components for the most popular and problematic applications.

Index by Manufacturer

Manufacturer	Page	Manufacturer	Page
Acura	1-3	Lancia	34

Kia	32-34	Yugo	68

NOTE

Recommended replacement interval information was compiled by Gates from vehicle manufacturers' information where available. In the cases where vehicle manufacturers' recommended replacement intervals are not available, intervals shown are based on industry standards. Replacement intervals are *recommendations only* and are based on average vehicle operations under normal conditions. Belts may fail sooner, or last longer, depending on a variety of factors, including driving and temperature conditions. Gates assumes no responsibility whatsoever, for any errors or omissions in the information.

☆ Interference Engine Application.

Free Running or Interference Engine? You and Your Customers Need to Know.

Automobile engines can be classified as either Free-Running or Interference, depending on what occurs if piston/valve synchronization is lost.

As illustrated below, in the free-running engine with the crankshaft still moving, there is enough clearance between the valve and piston, even if the cam stops with a valve fully open.

However, interference engines usually sustain damage if synchronization is lost. As illustrated, disrupted synchronization allows the piston and valve to collide causing damage and very expensive repairs for the vehicle owner. Damage can occur to valves, pistons, or heads, and in some cases, completely ruin the engine. Most import (with higher compression engines) and most car and light truck diesel engines are interference. To avoid costly engine repairs, follow the auto manufacturers' mileage replacement recommendations or we recommend timing belt replacement at around 60,000 miles.

Free Running
No Valve/Piston Interference

Interference
Valve/Piston Interference

NOTE: For your convenience, interference engines have been footnoted with a star in the application listings of this publication. This lets you easily identify them, and pass that information on to your customers.

Since timing belts are inside the engine they tend to be an out-of-sight, out-of-mind item and are seldom thought of as a part of routine maintenance. Here are some questions to ask customers that will help sell belts and protect the customer from expensive repairs:

1. Did you buy the car new? If yes, they'll know if the belt has ever been replaced.
2. Did you buy the car used? If so, they won't know if the belt has been replaced. This is a flag for the customer to get the belt checked, replaced or at least be aware that he has a timing belt.
3. How many miles are on the vehicle? Generally belts should be replaced at around 60,000 miles or less. Our Timing Belt Replacement Recommendations Booklet is an excellent tool for determining replacement intervals.
4. Have you ever replaced the timing belt? If the answer is yes or no (and the customer knows the mileage) you can determine where the vehicle is in the replacement cycle.

Here's a helpful hint for customers with vehicles within a few thousand miles of the recommended replacement interval. If they are having any engine repair done, have the timing belt checked. If it needs replacing, do it along with the other repairs and save time and money
