

### **Why do I need to add moisture before applying Gorilla Glue?**

Gorilla Glue is a moisture activated polyurethane adhesive, therefore, you need to apply a small amount of moisture to one surface. Then apply glue to the dry surface and clamp. For dense hardwoods, lightly dampen both surfaces prior to gluing.

### **How much Gorilla Glue should I apply?**

Apply a thin layer of glue. Gorilla Glue expands up to 3 times so little bit goes a long way. As a general guide, use a ½ ounce per square foot. Be careful of uncured “squeeze-out” or wet glue, particularly on finished furniture.

### **How do I remove Gorilla Glue from my body or skin?**

It is strongly recommended that gloves are worn during application. If you do get Gorilla Glue on your skin, try removing it with a dry cloth or paper towel first (particularly if the glue is still tacky). If that doesn't work, try washing with soap and cold water, or using an exfoliator with a gritty texture. Dry your skin and apply lotion. We do not recommend using any kind of alcohol, acetone, or other solvent.

### **How do I remove Gorilla Glue from my surface?**

If you need to remove any uncured “squeeze out” or wet glue, we recommend wiping with a dry cloth or using a standard paint thinner. Make sure to read and follow directions if using a paint thinner. Always wear gloves. Once Gorilla Glue is dry, it is best removed mechanically: Try sanding, chiseling, scraping or picking. The dried glue will not damage tools.

**FIRST AID TREATMENT:** If swallowed, call a Poison Control Center or doctor immediately. Do not induce vomiting. If in eyes, rinse with water for 15 minutes. If on skin, rinse well with water. If breathed in, move person into fresh air.

Do not microwave or heat. Do not leave in hot vehicle. May cause sensitization by inhalation and skin contact. Individuals with chronic asthmatic conditions should consult a physician prior to using product. May cause gastro-intestinal blockage if swallowed.

### **STORE AWAY FROM CHILDREN AND ANIMALS**

Rely on [premium automotive chemicals](#) by [Gorilla](#) if you're looking for quality and efficiency.
