

Piston Replacement for the 2003–2006 Ford Expedition

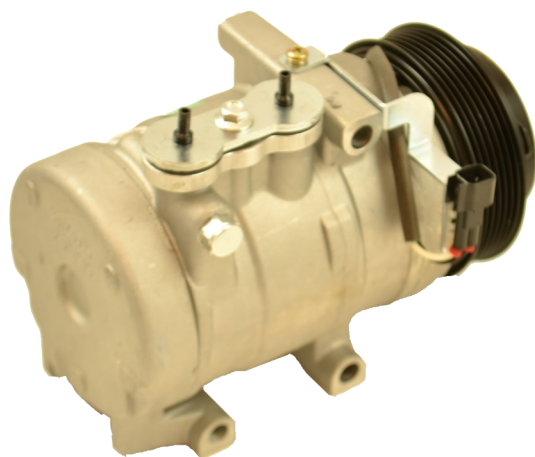

GLOBAL PARTS DISTRIBUTORS, LLC

Tech Tip

The 2003–2004 4.6 V8 and 2003–2006 5.4 V8 compressors for the Ford Expedition are commonly replaced compressors in the market. global parts distributors, llc (gpd) offers two options for this vehicle:

- gpd #6512988: Piston Replacement for the Scroll Compressor
- gpd #6511483: Scroll O.E. Style

#6512988

#6511483

The piston compressor is a direct bolt-off, bolt-on replacement for the scroll style compressor. gpd's piston design is more tolerable of debris left in the A/C system and performs better at lower RPMS than the O.E. scroll.

All gpd compressors come with the correct amount of oil for the A/C system. No matter which compressor is chosen for replacement, gpd strongly recommends that the condenser is replaced and the system is flushed.
