

**SSF PN:** 911-573-056-03

**Mfg's PN:** 911-573-056-03

**Mfg:** Griffiths Technical Inc

**Description:** 911/930 Kuehl High Performance Serpentine Front Condenser

**Mfg Warranty:** 3 year limited warranty from date of purchase. See mfg's warranty statement.

### **Fits**

**Make:** Porsche

**Model/Yr:** 911/930, 1970-1989, LH & RH drive

**Cross overs:** 911-573-056-02

911-573-056-03

The Kuehl Serpentine High Performance front condenser is a True Direct Drop-In upgrade replacing the stock factory condenser. The Kuehl offers twice the cooling surface area of the original Kuehl unit design, and our new fin configuration allows for more air movement. This makes for a great Porsche 911 or 930 air conditioning improvement. The Kuehl condenser utilizes next generation “serpentine” tubing. The benefits of the Kuehl Serpentine lay in the unique serpentine tube design which is found in today’s vehicles using R134a. Rather than using old fashion round tubing with many braze joints the Kuehl Serpentine has one continuous multi-channel extrusion to channel the flow of refrigerant.

The Kuehl unit outperforms the old fashion OEM version by getting as much as 40% more air! – A combination of more surface area and better fin spacing gives you a greater volume of air flow and velocity moving across the Kuehl condenser. There are fewer “hot spots” as found with old OEM units design. The Kuehl unit fewer brazed joints as compared to the old OEM’s, so there is less of a chance for leakage. The genuine Kuehl unit does not reduce the ground clearance in the 911 or 930 undercarriage, fits under the existing stone guard. Includes o-rings and flare adapters for pre 84 years. Compatible with R134a as well as R12 refrigerants.
