

# NEW | Class I Dual Colour, LED Directional Surface Mount

▶▶ NOW AVAILABLE!

Introducing for the first time – a dual colour Class I directional LED warning lamp

78795

## FEATURES AND BENEFITS

This lamp offers the flexibility of two different colour outputs within a single unit. Lamps are constructed of aluminum housing, polycarbonate lens with encapsulated electronics, utilizing 12 high-intensity LEDs, with six LEDs per colour. Choose from Amber/Blue, Amber/Clear or Amber/Green colour options. Can be programmed to flash either colour individually or alternate between colours. Popular with municipal and maintenance vehicles.

## PRODUCT SPECIFICATIONS

- 12-24 VDC, 0.9 AMPS
- 11 flash patterns
- Temperature Range: -22°F to +122°F (-30°C to +50°C)
