

GT 3 Hi-Rise Billet Horn Button

Designed for use on:

- All GT 3 bolt Steering Wheels
- Most standard 3 bolt type Steering Wheels

Horn Button (1)
Base w/O-Ring (1)
Mounting Bolts (3)

Follow instructions supplied with installation hub up to the step to install steering wheel onto hub.

1. Install mounting base and tighten mounting bolts.
Torque requirements: 10 / 12 ft. lbs.
2. Connect wires to bottom of horn button and carefully push horn button onto base over O-ring until the horn button is flush with surface of wheel.

Note: If necessary, slightly wet the O-ring to ease installation.

Note: To remove horn button, insert small, non-marring plastic blade or screw driver between notch on bottom of horn button and wheel surface and carefully pry to release.
